最新的 CIS-Service Management CIS-ITSM 免費考試真題 (Q120-Q125):

問題 #120

What role do you need to delete an incident record?

- A. service_owner
- B. incident_manager
- C. itil_admin
- D. itil

答案： C

解題說明：

In the standard ServiceNow security model for ITSM, the ability to delete records is highly restricted to prevent data loss and maintain the audit trail. While the itil role allows users to create and update incidents, and the incident_manager role allows for the oversight of the incident process, neither has the out-of-the-box permission to delete Incident records. The itil_admin role is specifically designed to grant elevated permissions-including the deletion of incidents-without requiring the full system admin role. This ensures a "least privilege" approach while still allowing administrative cleanup of the Incident table.

問題 #121

Which of the following is NOT a type of Article feedback that may be submitted by users?

- A. Endorsed
- B. Helpful (Yes / No)
- C. Flag Article
- D. Rate Article

答案： A

解題說明：

Explanation

The Knowledge Feedback [kb_feedback] table tracks all forms of feedback for Knowledge Articles, including Helpful (Yes/No), Star Rating, Comments, and Flags

問題 #122

Even Though some catalog items approval workflow might be similar, it is recommended to have separate approval workflow for each catalog item.

- A. False
- B. True

答案： A

解題說明：

Explanation

It is recommended to reuse the same workflow as much as possible for catalog items that have similar approval process. Maintaining a lot of workflows can be difficult.
