

DevOps-Foundation考試題庫 & DevOps-Foundation最新試題

從Google Drive中免費下載最新的Testpdf DevOps-Foundation PDF版考試題庫：<https://drive.google.com/open?id=1a4qHwtXrRiV-yfByIMAyqM63IJJoMiEle>

對於DevOps-Foundation認證考試，你是怎麼想的呢？作為非常有人氣的Peoplecert認證考試之一，這個考試也是非常重要的。但是，當你為了更好地準備考試而尋找參考資料的時候，你會發現找到一本非常優秀的參考書是很難的。那麼，應該怎麼辦才好呢？沒關係。Testpdf很好地體察到了你們的願望，並且為了滿足廣大考生的要求，向你們提供最好的考試考古題。

Peoplecert DevOps-Foundation 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">• Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.
主題 2	<ul style="list-style-type: none">• Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.
主題 3	<ul style="list-style-type: none">• Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI• CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.

主題 4	<ul style="list-style-type: none"> • Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
主題 5	<ul style="list-style-type: none"> • Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.
主題 6	<ul style="list-style-type: none"> • Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.

在資格考試中準確DevOps-Foundation考試題庫和領先供應者並完成 Peoplecert PeopleCert DevOps Foundationv3.6Exam

Testpdf長年以來一直向大家提供與Peoplecert認證考試相關的DevOps-Foundation參考資料。這是一個被廣大考生檢驗過的網站，可以向大家提供最好的考試考古題。Testpdf全面保證考生們的利益，得到了大家的一致好評。而且，Testpdf也是當前市場上最值得你信賴的網站。

最新的 PeopleCert DevOps DevOps-Foundation 免費考試真題 (Q37-Q42):

問題 #37

A large organization conducts a DevOps toolchain review and discovers that multiple development teams have built their own continuous delivery pipelines with a variety of different tooling.

Which of the following strategies would NOT help them manage their toolchain evolution moving forwards?

- A. Using sensible defaults to guide teams' choices
- **B. Telling all development teams they must immediately migrate to a standard set of tools dictated by IT Operations**
- C. Making the DevOps toolchain available self-service
- D. Having IT Operations or infrastructure squads architect and manage a DevOps toolchain service to offer to the development teams

答案: B

解題說明:

Forcing all development teams to immediately migrate to a standard set of tools dictated by IT Operations is not a recommended DevOps strategy.

* DevOps promotes collaboration, flexibility, and evolution of toolchains, allowing teams to choose what fits their needs while moving toward sensible defaults and integration over time.

* Abrupt, top-down mandates undermine trust and autonomy, often leading to resistance and lower adoption.

Why are the other options better?

* IT Ops or infra squads managing toolchain as a service (A), sensible defaults (C), and self-service (D) are all recognized best practices to support DevOps evolution and developer enablement.

Extract-style reference:

"Mandating a single toolset without considering team needs reduces engagement. Toolchains should be managed as self-service platforms with sensible defaults, supporting but not constraining teams."

-State of DevOps Report; DevOps Handbook

PeopleCert DevOps Foundation v3.6: Encourages enabling choice, not enforcing uniformity without context.

問題 #38

What is one of the PRIMARY benefits of Continuous Delivery?

- A. It ensures that all releases are deployed into production in a timely manner
- **B. It reduces the cost, time, and risk of delivering incremental changes to the business**
- C. It automates all of the tasks associated with development and operations
- D. It prioritizes working on new features over keeping software deployable

答案： B

解題說明：

Continuous Delivery's primary benefit is that it reduces the cost, time, and risk of delivering incremental changes. By keeping software deployable at all times, teams can ship small, low-risk releases as needed.

* A: Prioritizing features over deployability increases risk.

* B: Not all releases are deployed immediately; CD keeps them ready.

* D: CD doesn't automate everything-some manual steps may remain, especially in Continuous Delivery (vs. Continuous Deployment).

Extract-style reference:

"Continuous Delivery reduces deployment pain by ensuring that code is always in a deployable state, decreasing the cost, time, and risk associated with releases."

-Continuous Delivery, Jez Humble & David Farley

PeopleCert Syllabus: Highlights CD as a strategy for safer, more efficient business change.

問題 #39

Which of the following is NOT a characteristic of DevOps?

- A. Working towards a common goal
- B. World-class stability, reliability, availability and security
- C. Ensuring overall organizational success
- **D. Fast flow of unplanned work into production**

答案： D

解題說明：

A fast flow of unplanned work into production is not a characteristic of DevOps. In fact, DevOps practices strive to minimize unplanned work (like emergency changes or outages) through automation, testing, collaboration, and rigorous change control. The other options-ensuring organizational success, working toward a common goal, and world-class stability/reliability-are all key DevOps characteristics.

Reference: DevOps Foundation v3.6 syllabus section 1.4; State of DevOps Report.

問題 #40

Which of the following is NOT a dimension of transformational leadership?

- A. Intellectual stimulation
- **B. Coercive communication**
- C. Personal recognition
- D. Vision

答案： B

解題說明：

Coercive communication (using force or threat) is not a transformational leadership dimension.

Transformational leaders:

* Inspire vision

* Recognize contributions

* Stimulate new ideas (intellectual stimulation)

* Foster intrinsic motivation

Extract-style reference:

"Transformational leadership builds trust, motivates by vision, provides intellectual stimulation, and recognizes individuals-not by coercion, but by inspiration."

-Transformational Leadership (James Burns), PeopleCert DevOps Foundation v3.6

問題 #41

An organization is struggling to reduce delays when launching new projects. Which of the following automation practices could help reduce these delays?

- A. Test-driven development
- B. Automated continuous integration and builds
- C. Treating infrastructure as code
- D. All of the Above

答案: D

解題說明：

Reducing delays in launching projects requires eliminating manual, time-consuming tasks in the delivery process:

* A: Continuous Integration (CI) with automated builds speeds up integration and reduces defects.

* B: Test-Driven Development (TDD) ensures quality from the start, reducing rework and post-development bug fixing.

* C: Infrastructure as Code (IaC) enables rapid, repeatable provisioning of environments, avoiding manual setup delays.

All three practices contribute to faster, more reliable project starts. As PeopleCert notes, combining these practices creates a strong automation foundation, enabling organizations to move from idea to delivery quickly.

Therefore, D-All of the above-is correct.
