Salesforce Health Cloud Accredited Professional Sample Questions (Q92-Q97):

NEW QUESTION # 92

Bloomington Caregivers needs to monitor care plan adherence for the patients at various facilities within its network. What is available to extend the reporting capability of Health Cloud?

- A. Insights for Health Cloud
- B. Care Management Extension
- C. Reporting unmanaged package
- D. CRM Analytics for Health Cloud

Answer: D

Explanation:

CRM Analytics for Health Cloud (formerly Tableau CRM) is a powerful analytics platform integrated into Salesforce that extends the reporting capabilities of Health Cloud. It allows organizations to gain actionable insights into care plan adherence across facilities and provides advanced visualization and tracking features.

Key Features of CRM Analytics for Health Cloud:

Prebuilt Dashboards: Includes dashboards tailored for healthcare scenarios, such as care program adherence and patient outcomes.

Customizable Analytics: Enables creating custom reports to monitor adherence trends across multiple facilities.

AI-Powered Insights: Provides predictive insights to improve care plan management.

Why Other Options Are Incorrect:

A . Care Management Extension: Does not focus on reporting; it provides additional care coordination functionalities.

C . Insights for Health Cloud: This option is not a Salesforce feature for reporting or analytics.

D . Reporting Unmanaged Package: While it provides prebuilt reports, it lacks the advanced analytics and visualization of CRM Analytics.

Health Cloud Analytics

NEW QUESTION # 93

A company recently migrated from Service Cloud to Health Cloud and is working on strengthening their relationships within their provider network. Which object within the Provider Relationship Management data model can be used to track each of the different locations where a provider practiced?

- A. HealthcarePractitionerFacility
- B. HealthcareProvider
- C. HealthcareProviderSpeciality
- D. BusinessLicense
- E. HealthcareFacilityNetwork

Answer: A

NEW QUESTION # 94

Which Visual representation in Health Cloud would enable a care coordination to see all the relationships between a patient and the people and organizations participating in the patient's, including those across multiple care plans?

- A. Patient Card
- B. Care Team
- **C. Householding Map**
- D. Timeline view
- E. Lightning Empower Components

Answer: C

Explanation:

According to the Health Cloud Implementation Guide, Householding Map is the visual representation in Health Cloud that enables a care coordinator to see all the relationships between a patient and the people and organizations participating in the patient's care, including those across multiple care plans. Householding Map shows a graphical view of the patient's household members, care team members, providers, and other related entities. Timeline View, Care Team, Lightning Empower Components, and Patient Card are not visual representations that show all the relationships between a patient and their care participants.

NEW QUESTION # 95

A provider would like to create Salesforce reports to analyze patient outcomes and patient referrals.

Which three steps should a consultant recommend as part of the reporting setup to ensure the provider can view this report appropriately?

Choose 3 answers

- **A. Adjust template care management reports and dashboards.**
- **B. Create custom report types for clinical objects.**
- C. Leverage the Patient Referral Management unmanaged package.
- D. Enable the enhanced Analytics for Healthcare setting in Setup.
- **E. Assign appropriate permissions to internal users.**

Answer: A,B,E

Explanation:

Reporting Best Practices in Health Cloud:

* Exact Extract:

"For analytics on patients and referrals, create custom report types for Health Cloud clinical objects, use and adjust template dashboards, and assign the correct report permissions." Reference:Administer Health Cloud - Reports and Dashboards Other Options:

B). Unmanaged package:Not required for standard reporting.

D). Enhanced Analytics:Useful but not required for basic reporting setup.

NEW QUESTION # 96

A pharma customer requires a scheduling tool to book infusions with multiple steps as part of its Health Cloud implementation. It needs a solution for care coordinators to book appointments without having to manually check availability and resources themselves. Which solution should a consultant recommend?

- A. Advanced Therapy Management
- B. Procedure Scheduling
- **C. Intelligent Appointment Management**
- D. Salesforce Scheduler

Answer: C

Explanation:

A is correct because Intelligent Appointment Management (IAM) is a solution for care coordinators to book appointments without having to manually check availability and resources themselves. IAM aggregates multiple scheduling engines, such as Salesforce Scheduler or Electronic Health Record (EHR) scheduling engines, or both, so that schedulers and patients can see all available appointments in one place. IAM also supports complex appointment types, such as infusions, that require multiple steps or resources.

NEW QUESTION # 97

.....
