It is known to us that getting the PSPO-I certification is not easy for a lot of people, but we are glad to tell you good news. The PSPO-I study materials from our company can help you get the certification in a short time. Now we are willing to introduce our PSPO-I Practice Questions to you in detail, we hope that you can spare your valuable time to have a try on our products. Please believe that we will not let you down!

The Scrum PSPO-I exam is based on the Scrum Guide, which is the official guide to Scrum methodology, and covers a range of topics related to product ownership in Agile Scrum environments. Some of the key topics covered in the exam include product visioning, stakeholder management, product backlog management, and product value optimization. PSPO-I exam is designed to test the candidate's ability to apply Scrum principles and practices to real-world scenarios, and to demonstrate their understanding of Agile Scrum methodology. Upon successful completion of the exam, candidates will receive the PSPO-I Certification, which is a widely recognized credential in the Agile community.

The PSPO-I exam is a challenging assessment that requires candidates to demonstrate their proficiency in key areas such as product strategy, stakeholder management, product backlog management, and product delivery. It consists of 80 multiple-choice questions that need to be answered within a 60-minute time limit. PSPO-I Exam is available online and can be taken from anywhere in the world. The passing score for the PSPO-I exam is 85%, which means candidates need to answer at least 68 questions correctly to earn the certification.

Scrum Professional Scrum Product Owner I Sample Questions (Q112-Q117):

NEW QUESTION # 112

Which statement is true about the Product Backlog?

- A. It is the single source of work undertaken by the Scrum Team.
- B. It is managed by the Scrum Team.
- C. It is not allowed that a Developer is creating a Product Backlog item.

Answer: A

NEW QUESTION # 113

Who has the final decision about the order of items in the Product Backlog?
(choose the best answer)

- A. The Scrum Master.
- B. The Scrum Team.
- C. The Stakeholders.
- D. The Developers.
- E. The Product Owner.

Answer: D

Explanation:

In Scrum, the Product Owner is responsible for maximizing the value of the product resulting from the work of the Development Team. One of the primary ways the Product Owner does this is by managing the Product Backlog, which includes clearly expressing Product Backlog items, ordering the items to best achieve goals and missions, and ensuring that the Product Backlog is visible, transparent, and clear to all. This means that the Product Owner has the final authority on the order of items in the Product Backlog, as they are best positioned to understand the strategic and market value of the work to be done.

The Scrum Guide and the Professional Scrum Product Owner™ (PSPO I) study materials, specifically the sections on 'Managing Products with Agility' and 'Understanding and Applying the Scrum Framework', which outline the accountabilities of the Product Owner in managing the Product Backlog

NEW QUESTION # 114

The Scrum Master serves the Scrum Team in several ways, including:

- A. Supporting on Program Level with requirement prioritization.
- B. Ensuring that all Scrum events take place and are positive, productive, and kept within the timebox.
- C. Coaching the team members in self-management and cross-functionality.
- D. Helping the Scrum Team focus on creating high-value Increments that meet the Definition of Done.

Answer: B,C,D

NEW QUESTION # 115

The Sprint Goal is the single objective for the Sprint.

- A. FALSE
- B. TRUE

Answer: B
