Actual Zscaler ZDTA exam questions in our PDF format are ideal for restrictions-free quick preparation for the test. Zscaler ZDTA Real exam questions which are available for download in PDF format can be printed and studied in a hard copy format. Our Zscaler Digital Transformation Administrator (ZDTA) PDF file of updated exam questions is compatible with smartphones, laptops, and tablets. Therefore, you can use this Zscaler Digital Transformation Administrator PDF to prepare for the test without limits of time and place.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 2	<ul style="list-style-type: none">• Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.
Topic 3	<ul style="list-style-type: none">• This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.
Topic 4	<ul style="list-style-type: none">• Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.

Topic 5	<ul style="list-style-type: none"> • Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 6	<ul style="list-style-type: none"> • Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS • SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.
Topic 7	<ul style="list-style-type: none"> • Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.

ZDTA Updated Dumps - Free ZDTA Download Pdf

Our ZDTA question materials are designed to help ambitious people. The nature of human being is pursuing wealth and happiness. Perhaps you still cannot make specific decisions. It doesn't matter. We have the free trials of the ZDTA study materials for you. The initiative is in your own hands. Our ZDTA Exam Questions are very outstanding. People who have bought our products praise our company highly. In addition, we have strong research competence. So you can always study the newest version of the ZDTA exam questions.

Zscaler Digital Transformation Administrator Sample Questions (Q79-Q84):

NEW QUESTION # 79

What does an Endpoint refer to in an API architecture?

- A. A URL providing access to a specific resource
- B. An end-user device like a laptop or an OT/IoT device
- C. Zscaler API gateway providing access to various components
- D. Zscaler public service edges

Answer: A

Explanation:

In API architecture, an Endpoint is defined as a URL or URI that provides access to a specific resource or service within the API. It acts as a point of interaction where clients send requests and receive responses. This is a standard definition across API implementations, including Zscaler's API framework, where each endpoint represents a distinct function or data resource accessible via the API.

Option A refers to physical devices, which are not considered endpoints in API terms. Option C describes network infrastructure components but not API endpoints. Option D describes an API gateway, which manages API traffic but is not itself an endpoint. This explanation is consistent with the Zscaler Digital Transformation study guide's section on Integration and APIs, which clarifies that API endpoints are URLs pointing to specific resources or services within the API framework.

NEW QUESTION # 80

What is the immediate outcome or effect when the Zscaler Office 365 One Click Rule is enabled?

- A. Non-Office 365 traffic is blocked.
- B. Office 365 traffic is exempted from SSL inspection and other web policies.
- C. All Office 365 drive traffic is blocked.
- D. All traffic undergoes mandatory SSL inspection.

Answer: B

Explanation:

When the Zscaler Office 365 One Click Rule is enabled, Office 365 traffic is exempted from SSL inspection and other web policies to optimize performance and user experience. This rule simplifies policy configuration by automatically identifying and excluding Office 365 cloud traffic from inspection, reducing latency and avoiding potential conflicts with Office 365 services. The study guide clarifies that this rule helps balance security with seamless cloud application usage.

NEW QUESTION # 81

Cross-Site Scripting (XSS) attacks are a type of injection, in which malicious scripts are injected into otherwise benign and trusted websites. XSS includes which of the following?

- A. Anonymizers
- B. Spyware Callback
- C. Cookie Stealing
- D. IRC Tunneling

Answer: C

Explanation:

Cross-Site Scripting enables attackers to run malicious JavaScript in a user's browser - often used to steal session cookies and hijack user sessions, a technique known as cookie stealing.

NEW QUESTION # 82

An administrator would like users to be able to use the corporate instance of a SaaS application. Which of the following allows an administrator to make that distinction?

- A. URL filtering with SSL inspection
- B. Cloud application control
- C. Out-of-band CASB
- D. Endpoint DLP

Answer: B

Explanation:

Cloud application control is the feature that allows an administrator to distinguish and enforce policies specifically on the corporate instance of a SaaS application. This enables granular control, allowing users to access the approved corporate SaaS while restricting access to personal or unauthorized instances. Out-of-band CASB generally provides visibility but does not enforce real-time distinctions in this context. URL filtering with SSL inspection and Endpoint DLP serve different purposes, such as content inspection and endpoint data protection, respectively.

The study guide explains that Cloud Application Control policies identify and enforce controls based on SaaS application instances, providing precise policy enforcement aligned with corporate SaaS usage requirements.

NEW QUESTION # 83

What is the main purpose of Sandbox functionality?

- A. Balance thread detection across customers around the world
- B. Block malware that we have previously identified
- C. Identify Zero-Day Threats
- D. Build a test environment where we can evaluate the result of policies

Answer: C

Explanation:

The primary role of Sandbox functionality is to detect and analyze zero-day and other unknown threats by executing suspicious files in an isolated environment before they reach users.

NEW QUESTION # 84

We have professional technicians to check the website at times, therefore we can provide you with a clean and safe shopping environment if you buy ZDTA training materials. In addition, we have free demo for you before purchasing, so that you can have a better understanding of what you are going to buying. Free update for 365 days is available, and you can get the latest information for the ZDTA Exam Dumps without spending extra money. We have online and offline chat service stuff, and they possess the professional knowledge for the ZDTA training materials, if you have any questions, just contact us.
