## C-SIGDA-2403 Valid Exam Labs & C-SIGDA-2403 Online Test

If you choose our C-SIGDA-2403 exam review questions, you can share fast download. As we sell electronic files, there is no need to ship. After payment you can receive C-SIGDA-2403 exam review questions you purchase soon so that you can study before. If you are urgent to pass exam our exam materials will be suitable for you. Mostly you just need to remember the questions and answers of our SAP C-SIGDA-2403 Exam Review questions and you will clear exams. If you master all key knowledge points, you get a wonderful score.

## SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q47-Q52):

### NEW QUESTION # 47

What are the benefits of running a syntax check of your process?Note: There are 2 correct answers to this question.

- A. It verifies that the used BPMN elements are set correctly.
- B. It ensures consistency of the process model.
- C. It shows all bottlenecks in a process.

- D. It ensures the correct order of tasks.

**Answer: A,B**

#### NEW QUESTION # 48

You are in the SAP Signavio Process Manager and want to get an overview about costs and resources. Which features do you use?  
Note: There are 2 correct answers to this question.

- A. Value Widget
- B. Analytics
- C. Simulation
- D. Reporting

**Answer: C,D**

#### NEW QUESTION # 49

How can SAP Signavio's Process Governance be used to ensure process compliance and audit readiness?

- A. By implementing strong access control mechanisms
- B. By using data encryption for all stored process models
- C. By creating comprehensive process documentation automatically
- D. By ensuring all changes are logged and reviewed

**Answer: D**

#### NEW QUESTION # 50

How would you start capturing process documentation? Note: There are 3 correct answers to this question.

- A. Creating process-related surveys
- B. Conducting process interviews
- C. Creating task descriptions
- D. Running workshops with process participants
- E. Verifying customer data

**Answer: A,B,D**

Explanation:

Capturing process documentation in SAP Signavio involves gathering detailed information about how processes are executed. The SAP Signavio Process Manager Documentation provides guidance:

\* Exact Extract: "To capture process documentation, organizations should:

\* Run workshops with process participants to map out process steps and responsibilities.

\* Create process-related surveys to collect input from stakeholders on process details.

\* Conduct process interviews to gather in-depth insights from key process owners or performers." (SAP Signavio Process Manager User Guide, section on "Process Documentation Methods").

\* Explanation:

\* Option A (Running workshops with process participants): Workshops bring together stakeholders to collaboratively map processes, identify steps, and document roles, often using tools like SAP Signavio Process Manager for modeling.

\* Option D (Creating process-related surveys): Surveys collect feedback from a broader group of process participants, capturing details about tasks, challenges, or variations that may not emerge in workshops.

\* Option E (Conducting process interviews): Interviews with process owners or key performers provide detailed, qualitative insights into process execution, helping to refine documentation.

\* Option B (Creating task descriptions) is incorrect as task descriptions are an output of documentation, not a method to start capturing it.

\* Option C (Verifying customer data) is incorrect because customer data verification is related to data quality, not process documentation.

Reference: SAP Signavio Process Manager User Guide, section on "Process Documentation Methods"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 2: Documentation Techniques.

### NEW QUESTION # 51

Which are the main aspects of filters in SAP Signavio Process Intelligence? Note: There are 2 correct answers to this question.

- A. They can be used to filter different data sets.
- B. They can be applied across processes.
- C. They can be additive.
- D. They can be applied on the investigation, on the chapter, and a Widget.

**Answer: C,D**

Explanation:

Filters in SAP Signavio Process Intelligence play a crucial role in managing and analyzing process data. The main aspects of filters include:

\* Option A (They can be applied on the investigation, on the chapter, and a Widget): Filters can be set at different levels within SAP Signavio Process Intelligence, allowing for a granular or broad application of data filtering. This flexibility helps users to drill down into specific details or get a general overview as needed.

\* Option D (They can be additive): Filters can be additive, meaning that applying multiple filters can refine the dataset incrementally. This allows users to narrow down their data analysis to very specific conditions or criteria, enhancing the insights derived from the process data.
