# 100% Pass Rate H11-861_V4.0 Valid Test Notes Covers the Entire Syllabus of H11-861_V4.0

BONUS!!! Download part of VCEPrep H11-861_V4.0 dumps for free: https://drive.google.com/open?id=1a142bEOh0fTQU0ZDk9GtUcLe0Hj4MohZ

There is no exaggeration that you can be confident about your coming exam just after studying with our H11-861_V4.0 preparation questions for 20 to 30 hours. Tens of thousands of our customers have benefited from our H11-861_V4.0 Exam Materials and passed their exams with ease. The data showed that our high pass rate is unbelievably 98% to 100%. Without doubt, your success is 100% guaranteed with our H11-861_V4.0 training guide.

Huawei H11-861_V4.0 Exam Syllabus Topics:

Topic	Details
Topic 1	• Integration and Application: This section targets Solution Developers and System Integrators involved in integrating IIoT systems with existing enterprise applications, cloud platforms, and analytics tools for data-driven decision making.
Topic 2	• Implementation and Configuration: This domain targets IIoT Solution Architects and System Integrators, focusing on configuring IoT devices, network connectivity, communication protocols, and edge computing components used in IIoT deployments.
Topic 3	• Operations and Maintenance: This domain measures skills of Operations Engineers and Network Administrators in monitoring IIoT systems, troubleshooting network and device issues, and maintaining overall system health and performance.
Topic 4	• Technical Concepts: This section measures skills of Industrial IoT Engineers and Network Engineers and covers fundamental technical principles relevant to Industrial Internet of Things (IIoT), including architectures, protocols, data management, and integration technologies.

Topic 5	• Cybersecurity and Risk Management: This section assesses the expertise of Security Engineers and Compliance Officers in securing IIoT environments by applying security frameworks, identity and access management, threat detection, and risk mitigation strategies.

Certification H11-861_V4.0 Training | Exam H11-861_V4.0 Papers

It is not easy for you to make a decision of choosing the H11-861_V4.0 prep guide from our company, because there are a lot of study materials about the exam in the market. However, if you decide to buy the H11-861_V4.0 test practice files from our company, we are going to tell you that it will be one of the best decisions you have made in recent years. As is known to us, the H11-861_V4.0 Preparation materials from our company are designed by a lot of famous experts and professors in the field. There is no doubt that the H11-861_V4.0 prep guide has the high quality beyond your imagination.

Huawei HCIP-Collaboration V4.0 Sample Questions (Q41-Q46):

NEW QUESTION # 41
Which of the following statements are true about the SC cluster reconstruction deployment scenario? (Choose all that apply.)

- A. If the number of SIP endpoints is far less than that of H.323 endpoints, you are advised not to deploy the SC cluster.
- B. If the number of SIP endpoints is much greater than that of H.323 endpoints, an SC cluster can be deployed for SIP endpoint access. The non-cluster registration SC is reserved for H.323 endpoint access.
- C. If the number of connected extranet soft clients is greater than 2000, you are advised to reconstruct a non-cluster proxy SC into a proxy SC cluster.
- D. If the number of SIP endpoints is much greater than that of H.323 endpoints, an SC cluster can be deployed for SIP and H.323 endpoint access.

Answer: A,B,C

Explanation:
When SIP endpoints greatly outnumber H.323 endpoints, you deploy an SC cluster to serve the SIP devices while leaving a standalone SC for the H.323 endpoints.
If SIP registrations are much fewer than H.323 registrations, clustering the SC for SIP isn't recommended, as the scale doesn't justify the added complexity.
A proxy SC supports up to 2,000 external soft-client registrations; if you exceed this, you should rebuild it as a proxy-SC cluster to handle the extra load.

NEW QUESTION # 42
In a SIP multipoint conference, if BFCP Trans Type is set to TCP on the MCU, the BFCP communication protocol must be set to TCP on the endpoint.

- A. TRUE
- B. FALSE

Answer: A

Explanation:
BFCP transport must match between the MCU and endpoints; if the MCU is configured for TCP, endpoints must also use TCP for BFCP.

NEW QUESTION # 43
A company deployed a new Huawei video conferencing system last year (conference rooms are managed by organization). Now, the company plans to add 50 Box 610 devices to meet service requirements. In addition, the company plans to change the conference room management mode to area management in the SMC system to meet their new conference room management requirements. In this case, before provisioning new conference rooms, you can directly click Organization Management to switch to

Area Management on the SMC web interface.

- A. TRUE
- B. FALSE

Answer: B

Explanation:
You cannot directly switch from organization to area management when existing conference rooms are bound under organization management; you must first complete the migration process (such as unbinding or reassigning rooms) before the switch becomes available.

NEW QUESTION # 44

When the SMC is used to provision system administrator users, each user can be bound to an endpoint that is used as the conference joining device of the user.

- A. TRUE
- B. FALSE

Answer: B

Explanation:
System administrator accounts in the SMC are management-only and do not support binding to endpoints for use as conference-joining devices; endpoint binding applies only to conference user or room accounts.

NEW QUESTION # 45

Which of the following statements is false about point-to-point calls?

- A. During a point-to-point call, the Alerting signaling is used during the H.225/RAS connection.
- B. During a point-to-point call, the called endpoint sends a call request to the GK after receiving a SETUP message.
- C. During a point-to-point call, the GK receives two call requests.
- D. During a point-to-point call, H.245 performs capability set matching before the logical channel is opened.

Answer: A

Explanation:
Alerting is part of the H.225 call-signaling sequence, not the RAS interface, so it is not used over the RAS channel.

NEW QUESTION # 46

......

We can say that how many the H11-861_V4.0 certifications you get and obtain qualification certificates, to some extent determines your future employment and development, as a result, the H11-861_V4.0 exam guide is committed to helping you become a competitive workforce, let you have no trouble back at home. Actually, just think of our H11-861_V4.0 Test Prep as the best way to pass the H11-861_V4.0 exam is myopic. They can not only achieve this, but ingeniously help you remember more content at the same time.
