Many people often feel that their memory is poor, and what they have learned will soon be forgotten. In fact, this is because they did not find the right way to learn. Implementing and Operating Cisco Security Core Technologies exam tests allow you to get rid of the troubles of reading textbooks in a rigid way, and help you to memorize important knowledge points as you practice. Industry experts hired by 350-701 Exam Question explain the hard-to-understand terms through examples, forms, etc. Even if you just entered the industry, you can easily understand their meaning. With 350-701 test guide, you will be as relaxed as you do normally exercise during the exam.

BootcampPDF Cisco 350-701 exam information are cheap and fine. We use simulation questions and answers dedication to our candidates with ultra-low price and high quality. We sincerely hope that you can pass the exam. We provide you with a convenient online service to resolve any questions about Cisco 350-701 Exam Questions for you.

>> Latest Cisco 350-701 Dumps Files <<

100% Pass 2026 350-701: Implementing and Operating Cisco Security Core Technologies Newest Latest Dumps Files

In recent years, our 350-701 test torrent has been well received and have reached 99% pass rate with all our dedication. As a powerful tool for a lot of workers to walk forward a higher self-improvement, our 350-701 certification training continue to pursue our passion for advanced performance and human-centric technology. A good deal of researches has been made to figure out how to help different kinds of candidates to get Implementing and Operating Cisco Security Core Technologies certification. We revise and update the Implementing and Operating Cisco Security Core Technologies guide torrent according to the changes of the syllabus and the latest developments in theory and practice. We base the 350-701 Certification Training on the test of recent years and the industry trends through rigorous analysis.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q374-Q379):

NEW QUESTION # 374

Refer to the exhibit.

ASA# show service-policy sfr

CISCO

Global policy:

Service-policy: global_policy

Class-map: SFR

SFR: card status Up, mode fail-open monitor-only

Packet input 0, packet output [REDACTED] drop 0, reset-drop 0

What are two indications of the Cisco Firepower Services Module configuration?

(Choose two.)

- A. Traffic continues to flow if the module fails.
- B. The module fails to receive redirected traffic.
- C. The module is operating in IPS mode.
- D. Traffic is blocked if the module fails.
- E. The module is operating in IDS mode.

Answer: A,E

Explanation:

sfr {fail-open | fail-close [monitor-only]} <- There's a couple different options here. The first one is fail-open which means that if the Firepower software module is unavailable, the ASA will continue to forward traffic. fail-close means that if the Firepower module fails, the traffic will stop flowing. While this doesn't seem ideal, there might be a use case for it when securing highly regulated environments. The monitor-only switch can be used with both and basically puts the Firepower services into IDS-mode only. This might be useful for initial testing or setup.

NEW QUESTION # 375

Which attack is preventable by Cisco ESA but not by the Cisco WSA?

- A. phishing
- B. SQL injection
- C. DoS
- D. buffer overflow

Answer: A

Explanation:

Explanation

The following are the benefits of deploying Cisco Advanced Phishing Protection on the Cisco Email Security Gateway:

Prevents the following:

- + Attacks that use compromised accounts and social engineering.
- + Phishing, ransomware, zero-day attacks and spoofing.
- + BEC with no malicious payload or URL.

NEW QUESTION # 376

Which threat intelligence standard contains malware hashes?

- A. open command and control
- B. advanced persistent threat
- C. trusted automated exchange of indicator information
- D. structured threat information expression

Answer: C

Explanation:

The threat intelligence standard that contains malware hashes is trusted automated exchange of indicator information (TAXII). TAXII is a protocol that enables the exchange of cyber threat information in a standardized and automated manner. It supports various types of threat intelligence, such as indicators of compromise (IOCs), observables, incidents, tactics, techniques, and procedures (TTPs), and campaigns.

Malware hashes are one example of IOCs that can be shared using TAXII. Malware hashes are cryptographic signatures that uniquely identify malicious files or programs. They can be used to detect and block malware infections on endpoints or networks. TAXII uses STIX (structured threat information expression) as the data format for representing threat intelligence. STIX is a language that defines a common vocabulary and structure for describing cyber threat information. STIX allows threat intelligence producers and consumers to share information in a consistent and interoperable way. STIX defines various objects and properties that can be used to represent different aspects of cyber threat information, such as indicators, observables, incidents, TTPs, campaigns, threat actors, courses of action, and relationships. Malware hashes can be expressed as observables in STIX, which are

concrete items or events that are observable in the operational domain.

Observables can have various types, such as file, process, registry key, URL, IP address, domain name, etc.

Each observable type has a set of attributes that describe its properties. For example, a file observable can have attributes such as name, size, type, hashes, magic number, etc. A hash attribute can have a type (such as MD5, SHA1, SHA256, etc.) and a value (such as the hexadecimal representation of the hash). A file observable can have one or more hash attributes to represent different hashing algorithms applied to the same file. For example, a file observable can have both MD5 and SHA256 hashes to increase the confidence and accuracy of identifying the file.

The other options are incorrect because they are not threat intelligence standards that contain malware hashes.

Option A is incorrect because advanced persistent threat (APT) is not a standard, but a term that describes a stealthy and sophisticated cyberattack that aims to compromise and maintain access to a target network or system over a long period of time.

Option B is incorrect because open command and control (OpenC2) is not a standard that contains malware hashes, but a language that enables the command and control of cyber defense components, such as sensors, actuators, and orchestrators. Option C is incorrect because structured threat information expression (STIX) is not a standard that contains malware hashes, but a data format that represents threat intelligence. STIX uses TAXII as the transport protocol for exchanging threat intelligence, including malware hashes. References:

- * TAXII
- * STIX
- * Malware Hashes

NEW QUESTION # 377

An engineer wants to generate NetFlow records on traffic traversing the Cisco ASA. Which Cisco ASA command must be used?

- A. flow exporter
- B. ip flow monitor input
- C. ip flow-export destination 1.1.1.1 2055
- D. **flow-export destination inside 1.1.1.1 2055**

Answer: D

Explanation:

The syntax of this command is: flow-export destination interface-name ipv4-address | hostname udp-port This command is used on Cisco ASA to configure Network Secure Event Logging (NSEL) collector to which NetFlow packets are sent. The destination keyword indicates that a NSEL collector is being configured.

+ The interface-name argument is the name of the ASA and ASA Services Module interface through which the collector is reached.

+ The ipv4-address argument is the IP address of the machine running the collector application.

+ The hostname argument is the destination IP address or name of the collector.

+ The udp-port argument is the UDP port number to which NetFlow packets are sent.

You can configure a maximum of five collectors. After a collector is configured, template records are automatically sent to all configured NSEL collectors.

NEW QUESTION # 378

Which CoA response code is sent if an authorization state is changed successfully on a Cisco IOS device?

- A. COA-MAB
- B. **CoA-ACK**
- C. CoA-NAK
- D. CoA-NCL

Answer: B

NEW QUESTION # 379

.....

Our website offer considerate 24/7 services with non-stopping care for you after purchasing our 350-701 practice materials. Although we cannot contact with each other face to face, but there are no disparate treatments and we treat every customer with

consideration like we are around you at every stage during your review process. We will offer help insofar as I can. While our 350-701 practice materials are beneficiary even you lose your chance of winning this time. Full refund or other version switch is accessible.

Exam 350-701 Prep: https://www.bootcamppdf.com/350-701_exam-dumps.html

Cisco Latest 350-701 Dumps Files Besides, work has plays a central role in our life and necessary certificates have become an integral part of workers requirements, With Exam 350-701 Prep - Implementing and Operating Cisco Security Core Technologies practice material pdf, does there still anything deter you for your certification, Comparing to spending many money and time on exams they prefer to spend 350-701 practice questions cost and pass exam easily, especially the Cisco exam cost is really expensive and they do not want to try the second time, Cisco Latest 350-701 Dumps Files We would like to tell you how to buy the most suitable and helpful study materials.

To be an effective manager, you must be an effective 350-701 leader of transformation, When I work and use a process, I like to fix it and adjust it, Besides, work has plays a central role in Latest 350-701 Dumps Files our life and necessary certificates have become an integral part of workers requirements.

Fast Download Latest 350-701 Dumps Files - First-Grade 350-701 Exam Tool Guarantee Purchasing Safety

With Implementing and Operating Cisco Security Core Technologies practice material pdf, does there still **Latest 350-701 Dumps Files** anything deter you for your certification, Comparing to spending many money and time on exams they prefer to spend 350-701 Practice Questions cost and pass exam easily, especially the Cisco exam cost is really expensive and they do not want to try the second time.

We would like to tell you how to buy the most suitable and Exam 350-701 Prep helpful study materials, Completing the preparation for the Implementing and Operating Cisco Security Core Technologies exam on time is the most important aspect.
