Reliable PTCE Exam Guide, Exam PTCE Overviews

The Medical Tests PTCE practice questions come with three easy-to-use and install formats. The certification for the Medical Tests PTCE exam is a valuable, well-recognized professional credential. You can develop your skills and become a recognized specialist with the Pharmacy Technician Certification Exam PTCE Certification in addition to learning about new technology requirements.

Medical Tests PTCE Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Order Entry and Processing: This section measures the skills of Pharmacy Technicians and assesses procedures for compounding non-sterile products, calculations, ratios, proportions, conversions, Sig codes, abbreviations, medical terminology, administration equipment, lot numbers, expiration dates, NDC numbers, and procedures for handling medications and supplies¹². It emphasizes accuracy and efficiency in prescription processing.
Topic 2	<ul style="list-style-type: none"> • Patient Safety and Quality Assurance: This section measures the skills of Pharmacy Technicians and covers high-alert medications, error prevention strategies, issues requiring pharmacist intervention, event reporting, prescription error types, and hygiene standards¹². It focuses on safe pharmacy practices and error handling.
Topic 3	<ul style="list-style-type: none"> • Medications: This section measures the skills of Pharmacy Technicians and covers knowledge of generic and brand names, classifications, therapeutic equivalence, drug interactions, contraindications, strengths, dosage forms, administration routes, side effects, indications, drug stability, narrow therapeutic index medications, incompatibilities, and proper storage¹²⁴⁶. It requires a comprehensive understanding of medication properties and handling.
Topic 4	<ul style="list-style-type: none"> • Federal Requirements: This section assesses the competencies of Pharmacy Managers in federal laws and regulations related to handling and disposal of substances, controlled substance prescriptions, restricted drug programs, and FDA recall requirements¹². It emphasizes compliance and regulatory expertise.

Medical Tests Pharmacy Technician Certification Exam Sample Questions (Q195-Q200):

NEW QUESTION # 195

Lorazepam oral concentrate should be stored in a pharmacy under the same temperature conditions as:

- A. Lanoxin oral solution.
- B. Lunesta tablets.
- C. Lyumjev KwikPen.
- D. Lamictal chewable tablets.

Answer: A

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

Lorazepam oral concentrate (Ativan) should be stored at controlled room temperature (20-25°C or 68-77° F) and protected from light. It should not be refrigerated or frozen.

#Explanation of Answer Choices#B. Lanoxin oral solution#Correct. Like Lorazepam, Lanoxin (Digoxin) requires room temperature storage.#A. Lamictal chewable tablets# Incorrect. Stored at room temperature, but not a liquid formulation.#C. Lyumjev KwikPen# Incorrect. Insulin pens require refrigeration.#D. Lunesta tablets# Incorrect. A solid dosage form, not comparable to a liquid oral concentrate.

#Reference:

* USP <1079>: Storage and Handling of Pharmaceuticals

* FDA Storage Recommendations for Lorazepam

NEW QUESTION # 196

Vistarilis a brand name for:

- A. Ranolazine
- B. Hydroxyzine
- C. Meclizine
- D. Prochlorperazine

Answer: B

Explanation:

- * Vistaril = Hydroxyzine, an antihistamine used for anxiety, nausea, and allergies.
 - * Meclizine (Antivert) is also an antihistamine but is used primarily for motion sickness and vertigo.
- #Reference: FDA Approved Drug List, PTCE Medication Guide.

NEW QUESTION # 197

According to federal law, a prescription for a Schedule IV controlled substance may be refilled a maximum of

- A. 4 times in 6 months.
- B. 3 times in 4 months.
- C. 5 times in 6 months.
- D. 2 times in 3 months.

Answer: C

Explanation:

According to federal law (Controlled Substances Act, CSA) and Drug Enforcement Administration (DEA) regulations, a prescription for a Schedule III or IV controlled substance may be refilled a maximum of five (5) times within six (6) months from the date the prescription was written.

* Refill Limit: A Schedule IV prescription may be refilled up to five (5) times within six (6) months from the issue date, if authorized by the prescriber.

* Expiration: The prescription expires six (6) months after the date it was written.

* Recordkeeping: The pharmacy must maintain accurate refill records either electronically or manually.

* Additional Refills Beyond 5: If the patient needs refills after the 5-refill limit, a new prescription must be issued by the prescriber.

* Partial Fills: Partial dispensing is allowed, but the total quantity dispensed cannot exceed the originally prescribed amount.

* A. 2 times in 3 months. # Incorrect. Federal law allows more than 2 refills for Schedule IV drugs.

* B. 3 times in 4 months. # Incorrect. This underestimates the legal refill limit.

* C. 4 times in 6 months. # Incorrect. Schedule IV drugs may be refilled up to 5 times, not just 4, within 6 months.

* DEA Pharmacist's Manual - Controlled Substances Act (21 CFR 1306.22).

* PTCB PTCE Exam Content Outline - Federal Pharmacy Law and Controlled Substances.

* FDA and DEA Guidelines on Schedule III-V Prescription Refills.

* Mosby's Pharmacy Technician: Principles and Practice - Controlled Substances Regulations.

Key DEA Rules for Schedule III and IV Prescriptions: Why the Other Answer Choices Are Incorrect:

NEW QUESTION # 198

A prescription for acetaminophen with codeine oral solution is written for a quantity of 4 oz. What volume, in mL, should be dispensed?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

* 1 oz = 30 mL

* 4 oz × 30 mL = 120 mL

#Reference: PTCE Pharmacy Conversions Guide.

NEW QUESTION # 199

A pharmacy is notified that an oral solution has been recalled due to temperature excursions during transport.

The first step pharmacy staff should take is to:

- A. remove any affected product from dispensing stock.
- B. switch patients from the oral solution to oral capsules.
- C. contact all prescribers who recently prescribed the product.

- D. contact patients who received a therapeutically equivalent product.

Answer: A

Explanation:

When a drug recall occurs due to temperature excursions (exposure to temperatures outside the manufacturer's recommended range during transport or storage), the pharmacy must immediately remove all affected product from its inventory to prevent dispensing compromised medication.

* Remove the Affected Product: Quarantine the recalled drug to ensure it is not dispensed.

* Verify the Recall Details: Confirm the lot number, expiration date, and reason for the recall using FDA or manufacturer recall notices.

* Document the Recall Action: Log details in the pharmacy's recall records for compliance.

* Follow Manufacturer or FDA Instructions: Some recalls require returning the product, while others require disposal according to hazardous waste guidelines.

* Notify Patients and Providers (If Necessary): If the medication has already been dispensed, further action may be needed depending on recall severity.

* B. Contact patients who received a therapeutically equivalent product. # Incorrect. The recall applies to the specific affected lot, not all similar medications. Pharmacists would first verify which patients received the recalled drug before contacting them.

* C. Switch patients from the oral solution to oral capsules. # Incorrect. The recall does not automatically require a formulation change. The pharmacy must verify availability of unaffected stock or alternative treatments before making substitutions.

* D. Contact all prescribers who recently prescribed the product. # Incorrect. While prescribers may need notification if the recall affects patient treatment, the first step is ensuring the recalled product is removed from stock to prevent further dispensing.

* PTCE PTCE Exam Content Outline - Medication Safety and Recall Procedures.

* FDA Drug Recall Guidelines (www.fda.gov).

* USP <1079> Good Storage and Distribution Practices for Pharmaceuticals.

* National Association of Boards of Pharmacy (NABP) Recall Compliance Standards.

* Manufacturer Recall Notices (Example: Pfizer, Eli Lilly, etc.).

* Mosby's Pharmacy Technician: Principles and Practice - Recall Classifications and Actions.

Steps to Follow in a Drug Recall: Why the Other Answer Choices Are Incorrect: Pharmacy Technician References:
