### NEW QUESTION # 136

- A. A diverging color palette that has six stepped colors
- B. A single color gradient
- C. A diverging color palette that has five stepped colors
- D. A sequential color gradient

**Answer: C**

### NEW QUESTION # 137

You have a dashboard that contains confidential information about patients health. The data needs to always be up to date for a team of healthcare workers. How should you share the dashboard with the healthcare workers?

- A. Publish the dashboard to Tableau Server
- B. Print the dashboard to PDF
- C. Publish the dashboard to Tableau Public
- D. Export the dashboard as a .twbx

**Answer: A**

Explanation:

To share a dashboard that contains confidential information about patients health and needs to always be up to date for a team of healthcare workers, you should publish it to Tableau Server. This will allow you to control who can access and interact with your dashboard, as well as schedule automatic refreshes of your data source or extract. Publishing to Tableau Public would expose your data to anyone on the internet, printing to PDF would not update your data, and exporting as a .twbx would require sending a large file that might not be compatible with other versions of Tableau. References: [https://help.tableau.com/current/pro/desktop/en-us/publish\\_workbooks\\_share.htm](https://help.tableau.com/current/pro/desktop/en-us/publish_workbooks_share.htm) [https://help.tableau.com/current/pro/desktop/en-us/publish\\_workbooks\\_tableauserver.htm](https://help.tableau.com/current/pro/desktop/en-us/publish_workbooks_tableauserver.htm)

When sharing sensitive and confidential information that needs to be kept up-to-date, such as patient health data for a team of healthcare workers, the best practice is to publish the dashboard to Tableau Server. Tableau Server is designed for secure, controlled access and can be configured to ensure that data is refreshed as needed. Publishing to Tableau Public is not secure for

confidential data, printing to PDF or exporting as a .twbx does not allow for live data updates.
