

# NSE6\_FSR-7.3 Exam Questions - Successful Guidelines For Preparation [2026]

What's more, part of that Dumpcollection NSE6\_FSR-7.3 dumps now are free: <https://drive.google.com/open?id=1VDHvzuEHq3g4a2wJ8y5uskif8TYmAeoC>

At the fork in the road, we always face many choices. When we choose job, job are also choosing us. Today's era is a time of fierce competition. Our NSE6\_FSR-7.3 exam question can make you stand out in the competition. Why is that? The answer is that you get the certificate. What certificate? Certificates are certifying that you have passed various qualifying examinations. Watch carefully you will find that more and more people are willing to invest time and energy on the NSE6\_FSR-7.3 Exam, because the exam is not achieved overnight, so many people are trying to find a suitable way.

## Fortinet NSE6\_FSR-7.3 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• SOC and SOAR Overview: Security Engineers can gain an understanding of SOC and SOAR deployment requirements, including licensing management for FortiSOAR.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• System Monitoring and Maintenance: For FortiSOAR Administrators, this domain covers using various tools for system monitoring to ensure consistent performance. This includes how to regularly oversee FortiSOAR processes, along with other critical functions.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• System Configuration: FortiSOAR requires careful setup of applications for FortiSoar System Administrators. It covers system fixtures, and proxy settings to function optimally.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Security Management: This section covers how Security Engineers implement role-based access control (RBAC) and set up team structures within FortiSOAR to streamline security management.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• System Operation: For System Engineers, this section covers Elasticsearch data management that may need to be externalized or migrated to accommodate system needs. Additionally, this section covers configuring the recommendation engine and utilizing the war room functionality.</li></ul>

## 100% Pass Reliable Fortinet - Latest NSE6\_FSR-7.3 Test Format

The language in our NSE6\_FSR-7.3 test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether you are a novice or an experienced staff who has abundant experience for

many years. It should be a great wonderful idea to choose our NSE6\_FSR-7.3 Guide Torrent for sailing through the difficult test. On the whole, nothing is unbelievable, to do something meaningful from now, success will not wait for a hesitate person, go and purchase!

## Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q21-Q26):

### NEW QUESTION # 21

Which two ports must be open between FortiSOAR HA nodes'? (Choose two.)

- A. Port 25
- B. Port 6380
- C. Port 9200
- D. Port 5432

**Answer: C,D**

Explanation:

In a FortiSOAR HA configuration, certain ports must be open for communication between nodes. Port 5432 is required for PostgreSQL database communication, which is essential for data replication between HA nodes.

Port 9200 is used by Elasticsearch, which FortiSOAR leverages for indexing and search functions across the nodes. These ports must be accessible between nodes to ensure seamless operation and data consistency within the cluster.

### NEW QUESTION # 22

An administrator is issuing the following command on a node trying to join a FortiSOAR duster as a standby: `csadm ha join-cluster -status active -role secondary --primary-node 10.0.1.160` The node fails to join the cluster. What is the issue?

- A. The primary node needs to be resolvable via FQDN.
- B. The status value should be passive.
- C. The role value should be worker.
- D. The IP address should be for secondary-node Instead of primary-node.

**Answer: B**

Explanation:

When joining a FortiSOAR cluster as a standby node, the correct status value should be passive. Using active would imply that the node is trying to join as an active node, which could cause conflicts in the cluster setup. In FortiSOAR, standby nodes must be set as passive to ensure they are recognized correctly and to avoid conflicts with the primary node or other active nodes within the cluster. Therefore, setting the status to passive will resolve the issue and allow the node to join the cluster as intended.

### NEW QUESTION # 23

Which statement about licensing on FortiSOAR is true? (Choose one answer)

- A. The perpetual trial license has a limit on actions per day but no limit on user count.2
- B. The subscription license requires connectivity to [globalupdate.fortinet.net](https://globalupdate.fortinet.net) to retrieve information.
- C. The evaluation license has an expiry date but no limit on user count.3
- D. A FortiSOAR VM with a perpetual license needs access to [update.fortiguard.net](https://update.fortiguard.net).1

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From FortiSOAR 7.3 Exact Extract study guide:

According to the FortiSOAR 7.3 Deployment and Administration Guide under the "Licensing FortiSOAR" section:

\* Connectivity Requirements:For the FortiSOAR license deployment and validation process to succeed, the instance must have outbound connectivity to <https://globalupdate.fortinet.net>. This URL is specifically used by the FortiSOAR license manager to fetch entitlements, verify the subscription status, and retrieve product information from the Fortinet licensing servers. If this connectivity is blocked (and a FortiManager is not being used as a local FDN proxy), the license deployment will fail.4

\* License Limits:Every FortiSOAR license-whether Perpetual, Subscription, or Trial-strictly enforces a maximum number of active users(concurrent or named) and often a limit on the number of automation actions per day.5

\* Perpetual Trial Licenses(often called "Free Trial") are restricted to a specific user count (typically 2 or 3) and a daily action limit

(e.g., 200 or 1000 actions). Therefore, options C and D are incorrect as they suggest "no limit on user count."

\* URL Clarification: While `update.fortiguard.net` is a common Fortinet endpoint for security signatures (IPS/AV), FortiSOAR's specific licensing and entitlement communication is directed to the `globalupdate.fortinet.net` service.

#### NEW QUESTION # 24

Which two relationship types are configurable on FortiSOAR?  
(Choose two.)

- A. Siblings
- B. Parents
- C. Relatives
- D. Grandparents

Answer: A,B

#### NEW QUESTION # 25

What two permissions must you assign to a user to allow the purge of audit logs for all users? (Choose two answers)

- A. Delete permission on the Audit Log Activities module
- B. Delete permission on the Users module
- C. Delete permission on the People module
- D. Delete permission on the Security module

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From FortiSOAR 7.3 Exact Extract study guide:

According to the FortiSOAR 7.3 Administration Guide under the "Audit Logs" and "Role-Based Access Control (RBAC)" sections, managing the lifecycle of system logs requires elevated administrative privileges.

To perform a manual purge of audit logs, the system validates permissions across two specific areas:

\* Audit Log Activities Module: The user must have Delete permissions on this specific module because it is the repository where the actual log records are stored. Without "Delete" rights here, the application cannot remove the database entries.

\* Security Module: Because the purging of audit logs is a sensitive security operation that affects the system's accountability trail, FortiSOAR requires the Delete permission on the Security module. This acts as a secondary administrative guardrail to ensure only authorized security administrators can permanently remove audit trails.

Permissions on the People or Users modules (Options C and D) are used for managing user profiles and account attributes, but they do not grant the authority to manipulate system-level audit databases.

#### NEW QUESTION # 26

.....

All three Fortinet NSE6\_FSR-7.3 exam questions formats are easy to use and compatible with all devices, operating systems, and the latest browsers. Now take the best decision for your career and take part in the Fortinet NSE 6 - FortiSOAR 7.3 Administrator NSE6\_FSR-7.3 Certification test and start preparation with Fortinet NSE6\_FSR-7.3 PDF Questions and practice tests.
