### 問題 #125

The administrator of a VMware environment has a critical virtual machine that has crashed and will not reboot. The administrator was able to bring it back online quickly using Instant VM Recovery.

What else is required to complete the recovery?

- A. Commit fallback
- **B. Migrate to production**
- C. Commit failover
- D. Merge delta file

答案: B

### 問題 #126

A company has an application on a VMware VM that stores customer photos. Customers may request their photos be removed at any time. The server needs to be restored from last week's backup. What Veeam restore process allows for custom scripting to be run to automatically remove any required photos before the server is returned to production?

- A. Instant Disk Recovery
- **B. Staged Restore**
- C. Secure Restore
- D. Instant VM Recovery

答案: B

解題說明:

The Veeam restore process that allows for custom scripting to be run before returning a server to production is Staged Restore. This feature enables administrators to perform necessary operations, like running a script to remove customer photos, during the restore process before the VM is brought back online.
