### Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q38-Q43):

#### NEW QUESTION # 38

Which two statements about ADVPN are true? (Choose two.)

- A. All FortiGate devices must be in the same autonomous system (AS).
- B. The hub adds routes based on IKE negotiations.
- C. You must configure phase 2 quick mode selectors to 0.0.0.0 0.0.0.0.
- D. You must disable add-route in the hub.

**Answer: B,C**

Explanation:

C). The hub adds routes based on IKE negotiations: This is part of the ADVPN functionality where the hub learns about the networks behind the spokes and can add routes dynamically based on the IKE negotiations with the spokes.

D). You must configure phase 2 quick mode selectors to 0.0.0.0 0.0.0.0: This wildcard setting in the phase 2 selectors allows any-to-any tunnel establishment, which is necessary for the dynamic creation of spoke-to-spoke tunnels.

These configurations are outlined in Fortinet's documentation for setting up ADVPN, where the hub's role in route control and the use of wildcard selectors for phase 2 are emphasized to enable dynamic tunneling between spokes.

#### NEW QUESTION # 39

Refer to the exhibit, which contains a partial BGP combination.

```
config router bgp
  set as 65200
  set router-id 172.16.1.254
  config neighbor
    edit 100.1.1.254
      set remote-as 65100
    next
  end
end
```

You want to configure a loopback as the OGP source.

Which two parameters must you set in the BGP configuration? (Choose two)

- A. update-source
- B. recursive-next-hop
- C. **ebgp-enforce-mulihop**
- D. ibgp-enfoce-mulihop

**Answer: A,C**

Explanation:

To configure a loopback as the BGP source, you need to set the "ebgp-enforce-mulihop" and "update-source" parameters in the BGP configuration. The "ebgp-enforce-mulihop" allows EBGP connections to neighbor routers that are not directly connected, while "update-source" specifies the IP address that should be used for the BGP session1. - B. **It exchanges a minimum of four messages to establish a secure tunnel**
- C. **It supports the extensible authentication protocol (EAP)**
- D. Phase 1 includes main mode

**Answer: B,C**
