C_S4PM2_2507 Valid Exam Experience | C_S4PM2_2507 Detailed Study Plan

Failure in the C_S4PM2_2507 test of the SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects credential leads to loss of time and money. Therefore preparing with SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects actual test questions matters a lot to save time and money. The prep material of Exam-Killer comes in three different formats so that users with different study styles can prepare with ease. We have made this SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects product after taking feedback of experts so that applicants can prepare for the SAP C_S4PM2_2507 Exam successfully.

SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q30-Q35):

NEW QUESTION # 30

What does the Side-by-Side extensibility option mean?

- A. Extending SAP S/4HANA using SAP ABAP Development Workbench.

- B. SAP S/4HANA extensions are context-aware and focused on tight integration.
- C. There are two SAP S/4HANA instances: one for standard code and another for custom developments
- **D. Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub.**

Answer: D

Explanation:

Step 1 - Understanding the Question

The question refers to the Side-by-Side extensibility concept in SAP S/4HANA Cloud, which is one of the three extensibility approaches defined by SAP:

- * In-App extensibility- Extensions made directly inside the SAP S/4HANA system using key-user tools.
- * Classic extensibility- Custom developments using ABAP in the SAP core system.
- * Side-by-Side extensibility- Building and running extensions outside the SAP S/4HANA core on the SAP Business Technology Platform (BTP).

Step 2 - Evaluate Each Option

A). Extending SAP S/4HANA using SAP ABAP Development Workbench

- * This is classic extensibility, not Side-by-Side.
- * It modifies the core ABAP stack directly, which contradicts the clean-core principle for cloud environments.

Result: Incorrect.

B). Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub

- * Side-by-Side extensibility leverages SAP BTP for building external applications and services that communicate with SAP S/4HANA using standard APIs and events.
- * The APIs used for these extensions are published on the SAP Business Accelerator Hub (formerly API Business Hub).
- * This approach allows creating custom UIs, workflows, or integrations without modifying the core system.

Result: Correct - This defines the Side-by-Side extensibility model.

C). There are two SAP S/4HANA instances: one for standard code and another for custom developments

- * SAP does not create a separate instance for custom code in Side-by-Side extensibility.
- * Extensions are built externally on SAP BTP, not as a second SAP S/4HANA instance.

Result: Incorrect.

D). SAP S/4HANA extensions are context-aware and focused on tight integration

- * This describes the In-App extensibility model, where extensions are embedded within the core system and maintain contextual awareness.

Result: Incorrect.

NEW QUESTION # 31

What should you do if you encounter an issue with the "RISE with SAP system transition workbench"? Note: There are 3 correct answers to this question.

- **A. Utilize the Built-in AI Assistant**
- B. Check for Version Updates
- **C. Review Known Limitations**
- D. Perform Manual Database Synchronization
- **E. Create an SAP Incident**

Answer: A,C,E

NEW QUESTION # 32

During a system conversion, which of the following does SAP recommend you do in the Discover phase of the SAP Activate methodology?

- A. Create a cutover plan.
- **B. Define a system conversion strategy.**
- C. Define an integration test strategy.
- D. Perform a sandbox conversion.

Answer: B

Explanation:

In a system conversion project using the SAP Activate methodology, the Discover Phase focuses on understanding the project scope,

evaluating readiness, and planning conversion activities.

D). Define a system conversion strategy

During the Discover Phase, SAP recommends defining the system conversion strategy. This includes analyzing the existing system landscape, determining conversion prerequisites, and defining the overall approach for technical and functional conversion activities. Other options:

- * A. Define an integration test strategy: Performed later in the Realize Phase.
- * B. Create a cutover plan: Defined during the Deploy Phase.
- * C. Perform a sandbox conversion: Conducted during the Prepare or Explore Phase.

NEW QUESTION # 33

What are the key components of RIISE with SAP Methodology? Note: There are 3 correct answers to this question.

- A. Leverage the integrated toolchain
- B. Provide solution activations
- C. Explore Business AI scenarios
- D. Access to expert guidance
- E. Follow a standardized framework

Answer: A,D,E

NEW QUESTION # 34

You are preparing for an SAP S/4HANA Cloud Private Edition implementation project. What do you find in the Roadmap Viewer? Note: There are 2 correct answers to this question.

- A. Tasks and deliverables to complete each phase
- B. Business process flows
- C. Clean Core quality gates
- D. Solution process setup instructions

Answer: A,C

NEW QUESTION # 35

.....

As we all know, Exam-Killer's SAP C_S4PM2_2507 exam training materials has very high profile, and it is also well-known in the worldwide. Why it produces such a big chain reaction? This is because Exam-Killer's SAP C_S4PM2_2507 Exam Training materials is really good. And it really can help us to achieve excellent results.
