CloudSec-Pro Pass4sure Training - CloudSec-Pro Latest Vce & CloudSec-Pro Free Demo

One of the most effective strategies to prepare for the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam successfully is to prepare with actual Palo Alto Networks CloudSec-Pro exam questions. It would be difficult for the candidates to pass the CloudSec-Pro exam on the first try if the CloudSec-Pro study materials they use are not updated. Studying with invalid

CloudSec-Pro practice material results in a waste of time and money. Therefore, updated Palo Alto Networks CloudSec-Pro practice questions are essential for the preparation of the CloudSec-Pro exam

Palo Alto Networks Cloud Security Professional Sample Questions (Q190-Q195):

NEW QUESTION # 190

Prisma Cloud cannot integrate which of the following secrets managers?

- A. IBM Secret Manager
- B. AzureKey Vault
- C. HashiCorp Vault
- D. AWS Secret Manager

Answer: A

Explanation:

Prisma Cloud integrates with various secret managers to manage sensitive information such as passwords, tokens, and keys. However, it cannot integrate with IBM Secret Manager. The other options, Azure Key Vault, HashiCorp Vault, and AWS Secret Manager, are supported for integration with Prisma Cloud, providing secure storage and handling of secrets.

NEW QUESTION # 191

Which of the below actions would indicate - "The timestamp on the compliance dashboard?"

- A. indicates when the data was ingested
- B. indicates the most recent alert generated
- C. indicates when the data was aggregated for the results displayed
- D. indicates the most recent data

Answer: C

Explanation:

The timestamp on the compliance dashboard in a cloud security context typically reflects the point in time when data from various sources is collected, processed, and then consolidated to present the compliance status or results. This aggregation process involves compiling data from multiple scans, logs, and other compliance-related information to provide a comprehensive overview of the current compliance posture. Therefore, the timestamp usually indicates when this aggregation was completed, ensuring that users are viewing the most up-to-date and relevant compliance information based on the latest data compilation.

NEW QUESTION # 192

Which two bot categories belong to unknown bots under Web-Application and API Security (WAAS) bot protection? (Choose two.)

- A. News bots
- B. Search engine crawlers
- C. Web scrapers
- D. HTTP libraries

Answer: C,D

Explanation:

Under Web-Application and API Security (WAAS) bot protection in Prisma Cloud, unknown bots are categorized based on their behavior and characteristics. Web scrapers and HTTP libraries fall into the category of unknown bots. Web scrapers are automated scripts or programs that extract data from websites, often without permission, while HTTP libraries are tools used for making HTTP requests. Both can be used benignly but may also be employed in malicious activities, hence their classification as unknown bots requiring further analysis.

NEW QUESTION # 193

A customer has Defenders connected to Prisma Cloud Enterprise. The Defenders are deployed as a DaemonSet in OpenShift. How should the administrator get a report of vulnerabilities on hosts?

- **A. Navigate to Monitor > Vulnerabilities > Hosts**
- B. Navigate to Defend > Vulnerabilities > Hosts
- C. Navigate to Defend > Vulnerabilities > VM Images
- D. Navigate to Monitor > Vulnerabilities > CVE Viewer

Answer: A

Explanation:

To view the vulnerabilities identified on a host, navigating to the "Monitor > Vulnerabilities > Hosts" section within the Prisma Cloud Console is the correct approach. This section is specifically designed to provide a comprehensive overview of all detected vulnerabilities within the host environment, offering detailed insights into each vulnerability's nature, severity, and potential impact. This pathway allows users to efficiently assess the security posture of their hosts, prioritize vulnerabilities based on their severity, and take appropriate remediation actions. The "Hosts" section under "Vulnerabilities" is tailored to display vulnerabilities related to host configurations, installed software, and other host-level security concerns, making it the ideal location within the Prisma Cloud Console for this purpose.

NEW QUESTION # 194

Which of the following is a reason for alert dismissal?

- A. ALERT_RULE_ADDED
- B. SNOOZED_AUTO_CLOSE
- **C. POLICY_UPDATED**
- D. USER_DELETED

Answer: C

Explanation:

<https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/manage-prisma-cloud-alerts/prisma-cloud-alert-resolution-reasons>

In Prisma Cloud, POLICY_UPDATED is a valid reason for the dismissal of an alert. This reason indicates that an alert can be dismissed if the policy that triggered the alert has been updated. When a policy is updated to no longer apply to certain resources or conditions, any open alerts that were generated based on the previous version of the policy may be dismissed as they are no longer relevant.

The other options, such as SNOOZED_AUTO_CLOSE, ALERT_RULE_ADDED, and USER_DELETED, are not standard reasons for the dismissal of an alert in Prisma Cloud. SNOOZED_AUTO_CLOSE refers to the temporary suspension of an alert, ALERT_RULE_ADDED is related to the creation of a new alert rule, and USER_DELETED would pertain to the removal of a user account, not directly to alert dismissal.

NEW QUESTION # 195

.....

Are you still hesitating about which kind of CloudSec-Pro exam torrent should you choose to prepare for the exam in order to get the related certification at ease? I am glad to introduce our CloudSec-Pro study materials to you. Our company has already become a famous brand all over the world in this field since we have engaged in compiling the CloudSec-Pro practice materials for more than ten years and have got a fruitful outcome. In order to let you have a general idea about our CloudSec-Pro training materials, we have prepared the free demo in our website for you to download.
