Free PDF Quiz 2026 Accurate Oracle Test 1Z0-1163-1 King

In the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) Web-based Practice Test, you will get the 1Z0-1163-1 questions that are real and accurate. Furthermore, the 1Z0-1163-1 practice exam works smoothly on all operating systems including Mac, Linux, IOS, Android, and Windows. It is a browser-based Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) practice test software, there is no need for any specific software installation or additional plugins to function correctly.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.
Topic 2	<ul style="list-style-type: none">• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.

Topic 3	<ul style="list-style-type: none"> • OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.
Topic 4	<ul style="list-style-type: none"> • OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.
Topic 5	<ul style="list-style-type: none"> • Oracle Cloud Success Navigator & Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.
Topic 6	<ul style="list-style-type: none"> • Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which process in Oracle Fusion Cloud SCM ensures real-time communication between suppliers and buyers?

- A. Supplier Qualification.
- **B. Supply Chain Collaboration.**
- C. Manufacturing Execution.
- D. Cost Accounting.

Answer: B

Explanation:

Supply Chain Collaboration (B) in Oracle Fusion Cloud SCM is designed to facilitate real-time communication between suppliers and buyers through tools like the Supplier Portal and collaboration workspaces. This process enables sharing of critical information—such as order statuses, inventory levels, and delivery schedules—instantly, fostering transparency and responsiveness. For example, a buyer can notify a supplier of an urgent order change, and the supplier can confirm availability within minutes, reducing delays. Option A (Supplier Qualification) focuses on evaluating supplier eligibility, not ongoing communication. Option C (Cost Accounting) tracks financial data, unrelated to supplier-buyer interaction. Option D (Manufacturing Execution) manages shop floor activities, not external collaboration. Supply Chain Collaboration ensures a synchronized supply chain, mitigating risks like stockouts or misaligned expectations by keeping all parties informed in real time.

NEW QUESTION # 15

Which key metric measures the effectiveness of the Demand to Management OMBP?

- **A. Forecast Accuracy.**
- B. Order Fill Rate.
- C. Customer Acquisition Cost.
- D. Employee Turnover Rate.

Answer: A

Explanation:

The Demand to Management Oracle Manufacturing Business Process (OMBP) in Oracle Fusion Cloud SCM focuses on translating demand signals into actionable supply plans, making Forecast Accuracy the key metric for measuring its effectiveness. Forecast Accuracy compares predicted demand to actual demand, revealing how well the system anticipates customer needs. For instance, if a forecast predicts 1,000 units sold but actual sales are 900, the accuracy is 90%, highlighting areas for improvement. Option A (Employee Turnover Rate) is an HR metric unrelated to demand management. Option C (Customer Acquisition Cost) pertains to marketing, not supply chain processes. Option D (Order Fill Rate) measures fulfillment efficiency, which is a downstream outcome, not a direct indicator of demand forecasting effectiveness. High forecast accuracy ensures inventory aligns with demand, reducing overstock or shortages, and supports strategic decision-making across procurement and production.

NEW QUESTION # 16

What is a primary advantage of the Replenishment Planning process in Oracle Fusion Cloud SCM?

- A. It ensures optimal inventory levels by predicting demand and adjusting supply plans accordingly.
- B. It reduces supplier payment cycles.
- C. It guarantees inventory levels remain static regardless of demand fluctuations.

Answer: A

Explanation:

Replenishment Planning in Oracle Fusion Cloud SCM optimizes inventory levels by predicting demand and adjusting supply plans to prevent overstocking or stockouts. It uses demand forecasting and supply data to ensure inventory aligns with business needs. Option A (reducing payment cycles) is unrelated to replenishment planning. Option B (static inventory) is incorrect as the process dynamically adjusts to demand fluctuations, not maintains static levels. This advantage enhances operational efficiency and cost savings.

NEW QUESTION # 17

Which feature in Oracle Fusion Cloud Procurement automates the creation of purchase orders from contracts?

- A. Supplier Portal.
- B. Intelligent Document Recognition (IDR).
- C. Receipt Accounting.
- D. Contract Fulfillment Automation.

Answer: D

Explanation:

Contract Fulfillment Automation (C) in Oracle Fusion Cloud Procurement automates the creation of purchase orders (POs) directly from contract terms, streamlining the procurement process. This feature uses predefined contract details-such as items, quantities, pricing, and delivery schedules-to generate POs without manual intervention. For example, if a contract stipulates 1,000 units of a product at \$10 each over six months, Contract Fulfillment Automation triggers POs as needed (e.g., 200 units monthly), ensuring accuracy and compliance with the agreement. Option A (Receipt Accounting) records goods received, not PO creation. Option B (Supplier Portal) enables supplier interaction but doesn't automate PO generation from contracts. Option D (IDR) extracts data from documents like invoices, not contracts for PO creation. This automation reduces errors (e.g., mismatched quantities), saves time, and ensures procurement aligns with negotiated terms, enhancing efficiency and supplier relationships.

NEW QUESTION # 18

Which two Oracle Redwood Design System UX features, when integrated with Oracle Fusion Applications SCM, deliver a superior user experience?

- A. Enhanced Mobile Accessibility.
- B. Advanced Data Visualization.
- C. Simplified User Interface (UI).
- D. Automated Task Management.

Answer: B,C

Explanation:

The Oracle Redwood Design System enhances Oracle Fusion Applications SCM's user experience with Simplified User Interface
