Free PDF 2026 Salesforce Unparalleled PDII-JPN: Reliable Test Pattern

It is a truth well-known to all around the world that no pains and no gains. There is another proverb that the more you plough the more you gain. When you pass the PDII-JPN exam which is well recognized wherever you are in any field, then acquire the PDII-JPN certificate, the door of your new career will be open for you and your future is bright and hopeful. Our PDII-JPN guide torrent will be your best assistant to help you gain your PDII-JPN certificate.

Salesforce Sample Questions (Q97-Q102):

NEW QUESTION # 97

カスタム開発の一環として、開発者は Lightning コンポーネントを作成して、特定の商談が時間とともにどのように進行するかを示します。次のフィールドのいずれかが変更された場合、コンポーネントは日付スタンプを表示する必要があります。

*金額、確率、段階、または完了日

開発者は、表示する必要があるデータにどのようにアクセスする必要がありますか?

- A. Lightning コンポーネントで Opportunity Change Data Capture イベントにサブスクライブします。
- B. 各フィールドの商談でカスタムのカスタム日付フィールドを作成して、前の日付を追跡し、日付フィールドの SOQL クエリを実行します。
- C. OpportunityHistory オブジェクトで、Amount、Probability、Stage、および Close Date の SOQL クエリを実行します。
- D. Lightning コンポーネントで OpportunityHistory Change Data Capture イベントにサブスクライブします。

Answer: B

NEW QUESTION # 98

このテストメソッドは、多数の取引先が同時に更新されると大量のクエリが実行されることが開発者にわかっているApexトリガをテストしています。テストメソッドは20行目で「SOQLクエリが多すぎる」という理由で失敗します。これを修正する正しい方法は何ですか?

Java

Line 12: //Set accounts to be customers
Line 13: for(Account a : DataFactory.accounts)
Line 14: {
Line 15: a.Is_Customer__c = true;
Line 16: }
Line 17:
Line 18: update DataFactory.accounts;
Line 19:
Line 20: List<Account> acctsAfter = [SELECT Number_Of_Transfers__c FROM Account WHERE Id IN :
DataFactory.accounts];

- A. コードの 18 行目の前に Test.startTest() を追加し、後に Test.stopTest() を追加します。
- B. 発行できるクエリの合計数を確認するには、Limits.getLimitQueries() を使用します。
- C. コードの 7 行目と 20 行目の前に Test.startTest() を追加し、後に Test.stopTest() を追加します。
- D. DataFactory クラスを変更して、作成するアカウントの数を減らし、トリガー内のクエリの数を減らします。

Answer: A

Explanation:

In Salesforce unit testing, the platform provides a mechanism to reset governor limits specifically for the code being tested. The "Too many SOQL queries" error at Line 20 occurs because the SOQL queries consumed during the Data Setup (Lines 4-10) and the Trigger Execution (Line 18) are being counted against the same transaction limit.

The correct solution is to wrap the DML operation (the code that fires the trigger) in Test.startTest() and Test.stopTest() (Option D).

* Test.startTest(): When this method is called, the code enters a new execution context with a fresh set of governor limits. The queries used to set up the data in Lines 5 and 7 will no longer count against the limit available for the update on Line 18.

* Test.stopTest(): This ensures that any asynchronous processes (like @future or Queueable) spawned by the trigger are forced to complete before the code proceeds to Line 20.

Option B is a "workaround" that reduces the validity of the test, as you should test your code against bulk volumes. Option A is for monitoring but doesn't solve the limit issue. Option C is logically incorrect because placing stopTest after Line 20 would mean the query on Line 20 is still sharing limits with the code it is trying to verify. Placing the block strictly around the operation being tested (Line 18) is the standard best practice.

NEW QUESTION # 99

Universal Containers (LIC) は、顧客がコンテナに関する問題を記録できるようにする顧客コミュニティを開発したいと考えています。コミュニティは、ドイツ語とスペイン語を話す顧客のためにも機能する必要があります。UC は、Salesforce を使用すると国際的なコミュニティを簡単に作成できると聞き、サイトを構築する開発者を

雇いました。
開発者はサイトを多言語化するには何を使用する必要がありますか?

- A. カスタム ラベルを使用して、カスタム メッセージが適切に翻訳されていることを確認します。
- B. カスタム メタデータを使用してカスタム選択リスト値を変換します。
- C. カスタム オブジェクトを使用してカスタム選択リスト値を変換します。
- D. カスタム設定を使用して、カスタム メッセージが適切に翻訳されるようにします。

Answer: A

Explanation:
Custom labels are custom text values that can be accessed from Apex classes, Visualforce pages, or Lightning components. Custom labels can be translated into any language that Salesforce supports, and can be used to display custom messages in the user's language based on their locale settings. By using custom labels, the developer can ensure that the site is multilingual and can display the appropriate messages to the German- and Spanish-speaking customers. Custom labels can also be packaged and distributed as part of an AppExchange app. Reference: [Custom Labels], [Translate Custom Labels]

NEW QUESTION # 100
アカウントをアカウントの地域のマネージャーに割り当てることを目的とした以下のトリガーについて考えてみましょう。
開発者がベスト プラクティスに従うために、このトリガーに加えるべき 2 つの変更はどれですか?
2 つの答えを選択してください

- A. □
- B. □
- C. □
- D. □

Answer: A,C

Explanation:
The best practices for writing triggers in Salesforce include bulkifying your code to handle multiple records efficiently and reducing the number of SOQL queries, especially within loops, to avoid hitting governor limits.
Option B is correct because moving the SOQL query outside of the for loop is essential to bulkify the trigger. Performing a query within a loop can cause a SOQL governor limit to be reached if the trigger is processing many records. The best practice is to collect all necessary data before the loop starts and then process it within the loop.
Option C is correct as well, because using a Map to cache the results of a SOQL query by Id is another way to bulkify the code. This allows you to query all the necessary data once and then access it efficiently in memory, avoiding repeated queries.
Option A is incorrect because adding isExecuting before the update doesn't address any best practices related to bulkification or SOQL query optimization.
Option D is incorrect because the last line should not be removed if the developer intends to perform DML on the accountList. However, this line should be outside of the loop and is unnecessary if the trigger context is 'before insert' or 'before update', since in those contexts, changes to records in Trigger.new are implicitly saved without the need for explicit DML.

NEW QUESTION # 101
システムには Lightning Web コンポーネントが存在し、レコードに関する情報をコンテキストに応じてモーダルとして表示します。Salesforce管理者は、Lightning App Builder内でこのコンポーネントを使用する必要があります。
開発者は、XMLリソースファイル内でどの2つの設定を行う必要がありますか?

- A. 'IsExposed' 属性を 'true' に設定します。
- B. 'target' を 'lightning__RecordPage' に指定します。
- C. 'IsVisible' 属性を 'true' に設定します。
- D. 'target' を 'lightning__AppPage' に指定します。

Answer: A,B

Explanation:
To make a Lightning Web Component (LWC) available for use in the Lightning App Builder, the developer must modify the component's configuration file (the .js-meta.xml file).
First, the isExposed tag must be set to true. By default, this is false, meaning the component is only available to other components within the namespace but not to the App Builder or Experience Builder. Setting it to true exposes it to the tools.
Second, the developer must specify where the component can be dragged and dropped by defining targets.
Since the question states the component displays information about the "record in context," it implies the component is designed to live on a Record Page. Therefore, adding <target>lightning__RecordPage</target> is essential. While lightning__AppPage (Option D) is a valid target, the context of "record in context" strongly points to the Record Page target. There is no IsVisible attribute in the LWC configuration schema.

NEW QUESTION # 102

......

Do you want to enhance your professional skills? How about to get the PDII-JPN test certification for your next career plan? Be qualified by Salesforce PDII-JPN certification, you will enjoy a boost up in your career path and achieve more respect from others. Here, we offer one year free update after complete payment for PDII-JPN Pdf Torrent, so you will get the latest PDII-JPN study practice for preparation. 100% is our guarantee. Take your PDII-JPN real test with ease.

PDII-JPN Test Duration: https://www.prepawaypdf.com/Salesforce/PDII-JPN-practice-exam-dumps.html

Recently, PDII-JPN certification has become the hottest certification that many IT candidates want to get, All the contents of the PDII-JPN study cram are selected by our experts, If you are still hesitating to buy our PDII-JPN Test Duration - latest training pdf or not, visiting our website would make you know more about our product, When you scan the PDII-JPN exam dumps, you will find there are free demo for you to download.

Click OK when you have finished with this dialog box, Add pictures, drawings, and audio and video clips, Recently, PDII-JPN Certification has become the hottest certification that many IT candidates want to get.

New Launch Salesforce PDII-JPN Dumps Fastest Way Of Preparation 2026

All the contents of the PDII-JPN study cram are selected by our experts, If you are still hesitating to buy our latest training pdf or not, visiting our website would make you know more about our product.

When you scan the PDII-JPN exam dumps, you will find there are free demo for you to download, We ensure you pass exam successfully with our PDII-JPN test questions.
