# 100% Pass 300-715 - Implementing and Configuring Cisco Identity Services Engine—The Best Practice Exam Fee

P.S. Free 2025 Cisco 300-715 dumps are available on Google Drive shared by ActualCollection: https://drive.google.com/open?id=13QqCAmHR08g9BDDmnbUJL9v6evn43QZK

The most advantage of our 300-715 exam torrent is to help you save time. It is known to us that time is very important for you. As the saying goes, an inch of time is an inch of gold; time is money. If time be of all things the most precious, wasting of time must be the greatest prodigality. We believe that you will not want to waste your time, and you must want to pass your 300-715 Exam in a short time, so it is necessary for you to choose our Implementing and Configuring Cisco Identity Services Engine prep torrent as your study tool. If you use our products, you will just need to spend 20-30 hours to take your exam.

Cisco ISE is a comprehensive identity-based access control system that provides secure network access to users and devices. It enables network administrators to create and enforce security policies and access controls based on user identity and device type. 300-715 Exam Tests the ability of the candidates to configure and implement Cisco ISE in a network environment.

## 2026 Reliable 300-715: Practice Implementing and Configuring Cisco Identity Services Engine Exam Fee

Our website experts simplify complex concepts of the 300-715 exam questions and add examples, simulations, and diagrams to explain anything that might be difficult to understand. Therefore, even ordinary examiners can master all the 300-715 learning

materials without difficulty. And the price of our 300-715 Study Guide is reasonable for even the students can afford it. At the same time, we give some discounts from time to time, you can buy our 300-715 practice engine at a favorable price.

## Understanding functional and technical aspects of Implementing and Configuring Cisco Identity Services Engine (300-715 SISE) Endpoint compliance

The following will be discussed in CISCO 300-715 Exam Dumps:

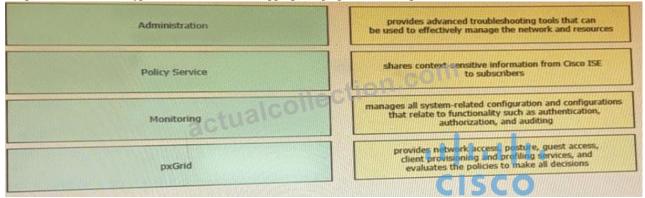

- Implement CoA
- Configure endpoint identity management
- Implement probes
- Implement profiler services

Cisco 300-715 is a qualifying and concentration test for the CCNP Security certificate. The applicants must pass it along with the core exam to earn this professional-level certification. At the same time, the specialists who ace this test will also obtain the Cisco Certified Specialist – Security Identity Management Implementation certificate. This exam is designed to evaluate the individuals' knowledge of Cisco Identity Service Engine. The area of coverage includes deployment & architecture, web auth and guest services, profiler, policy enforcement, network access for device administration, BYOD, and endpoint compliance, among others.

### Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q180-Q185):

#### **NEW OUESTION # 180**

Drag the Cisco ISE node types from the left onto the appropriate purposes on the right.

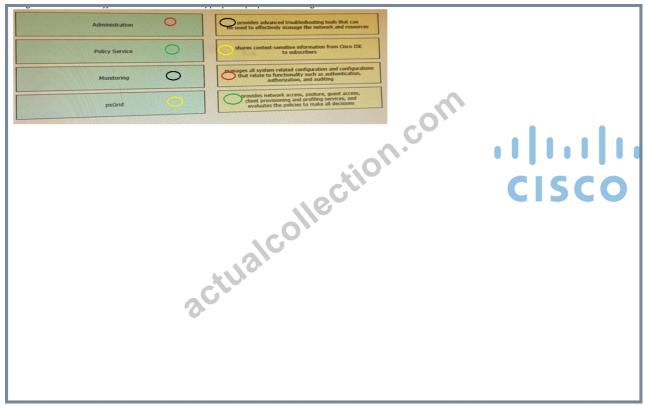

#### Answer:

Explanation:

Explanation

Monitoring = provides advanced monitoring and troubleshooting tools that you can use to effectively manage your network and resources Policy Service = provides network access, posture, guest access, client provisioning, and profiling services. This persona evaluates the policies and makes all the decisions.

Administration = manages all system-related configuration and configurations that relate to functionality such as authentication, authorization, auditing, and so on pxGrid = shares context-sensitive information from Cisco ISE to subscribers https://www.cisco.com/c/en/us/td/docs/security/ise/1-4/admin\_guide/b\_ise\_admin\_guide\_14/b\_ise\_admin\_guide

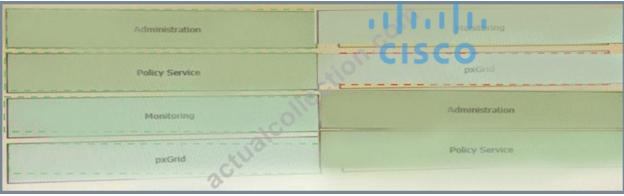

#### **NEW QUESTION # 181**

Drag the Cisco ISE node types from the left onto the appropriate purposes on the right.

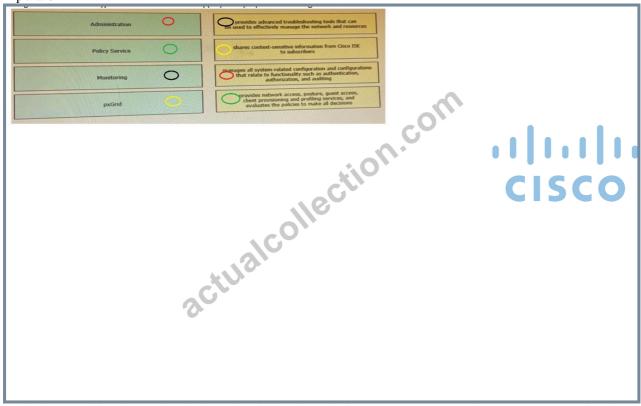

#### Answer:

Explanation:

Explanation

Monitoring = provides advanced monitoring and troubleshooting tools that you can use to effectively manage your network and resources Policy Service = provides network access, posture, guest access, client provisioning, and profiling services. This persona evaluates the policies and makes all the decisions.

 $Administration = manages \ all \ system-related \ configuration \ and \ configurations \ that \ relate \ to \ functionality \ such \ as \ authentication, \ authorization, \ auditing, \ and \ so \ on \ pxGrid = shares \ context-sensitive \ information \ from \ Cisco \ ISE \ to \ subscribers \ https://www.cisco.com/c/en/us/td/docs/security/ise/1-4/admin_guide/b_ise_admin_guide_14/b_ise_admin_guide$ 

#### **NEW QUESTION # 182**

A Cisco ISE engineer is creating a certificate authentication profile to be used with machine authentication for the network. The engineer wants to be able to compare the user-presented certificate with a certificate stored in Active Directory. What must be done to accomplish this?

- A. Add the subject alternative name and the common name to the CAP.
- B. Use MS-CHAPv2 since it provides machine credentials and matches them to credentials stored in Active Directory
- C. Configure the user-presented password hash and a hash stored in Active Directory for comparison
- D. Enable the option for performing binary comparison.

Answer: D

Wireless network users authenticate to Cisco ISE using 802.1X through a Cisco Catalyst switch. An engineer must create an updated configuration to assign a security group tag to the user's traffic using inline tagging to prevent unauthenticated users from accessing a restricted server. The configurations were performed:

- \* configured Cisco ISE as a Cisco TrustSec AAA server
- \* configured the switch as a RADIUS device in Cisco ISE
- \* configured the wireless LAN controller as a TrustSec device in Cisco ISE
- \* created a security group tog for the wireless users
- \* created a certificate authentication profile
- # created an identity source sequence
- \* assigned an appropriate security group tag to the wireless users
- \* defined security group access control lists to specify an egress policy
- \* enforced the access control lists on the TrustSec policy matrix in Cisco ISE
- \* configured TrustSec on the switch
- \* configured TrustSec on the wireless LAN controller

Which two actions must be taken to complete the configuration? (Choose two.)

- A. Configure Security Group Tag Exchange Protocol on the wireless LAN controller.
- B. Configure Security Group Tag Exchange Protocol to distribute IP to security group tags on Cisco ISE.
- C. Configure Security Group Tag Exchange Protocol on the switch.
- D. Configure inline tag propagation on the switch and wireless LAN controller.
- E. Create static IP-to-SGT mapping for the restricted web server.

Answer: B,D

#### **NEW QUESTION # 184**

Which two probes must be enabled for the ARP cache to function in the Cisco ISE profile service so that a user can reliably bind the IP address and MAC addresses of endpoints? (Choose two.)

- A. SNMP
- B. HTTP
- C. RADIUS
- D. DHCP
- E. NetFlow

Answer: C,D

Explanation:

Reference:

Cisco ISE implements an ARP cache in the profiling service, so that you can reliably map the IP addresses and the MAC addresses of endpoints. For the ARP cache to function, you must enable either the DHCP probe or the RADIUS probe. The DHCP and RADIUS probes carry the IP addresses and the MAC addresses of endpoints in the payload data. The dhcp-requested address attribute in the DHCP probe and the Framed-IP-address attribute in the RADIUS probe carry the IP addresses of endpoints, along with their MAC addresses, which can be mapped and stored in the ARP cache.
