DEP-2025 Latest Exam Duration, Download DEP-2025 Demo

Our valid Apple DEP-2025 dumps make the preparation easier for you. With these real DEP-2025 Questions, you can prepare for the test while sitting on a couch in your lounge. Whether you are at home or traveling anywhere, you can do DEP-2025 exam preparation with our Apple DEP-2025 Dumps. Apple Deployment and Management Exam (DEP-2025) test candidates with different learning needs can use our three formats to meet their needs and prepare for DEP-2025 test successfully in one go. Read on to check out the features of these three formats.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 2	<ul style="list-style-type: none">• Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
Topic 3	<ul style="list-style-type: none">• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 4	<ul style="list-style-type: none">• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 5	<ul style="list-style-type: none">• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 6	<ul style="list-style-type: none">• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 7	<ul style="list-style-type: none">• Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.

Apple Deployment and Management Exam Sample Questions (Q190-Q195):

NEW QUESTION # 190

Which MDM management capabilities are available on an iPhone enrolled using account-driven User Enrollment?

- A. Require a passcode
- B. Access device location
- C. Remotely wipe the entire device
- D. Disable Activation Lock

Answer: A

Explanation:

Account-driven User Enrollment limits MDM scope. The iOS Deployment Reference states, "MDM can enforce policies like requiring a passcode with User Enrollment, but it cannot access location, wipe the device, or disable Activation Lock." References: iOS Deployment Reference, "User Enrollment" section.

Apple Platform Deployment Guide, "BYOD Management" section.

NEW QUESTION # 191

Which statement is true when you buy content in Apple Business Manager?

- A. Licenses for purchased apps can be transferred to another location.
- B. Content is automatically assigned to user accounts.
- C. Organizations are restricted to only free content available in the store.
- D. Only IT administrators can make purchases on behalf of the organization.

Answer: A

Explanation:

Apple's Apps and Books program within Apple Business Manager (ABM) allows organizations to purchase apps and books in volume. A critical benefit is the ability to transfer licenses between locations within the same ABM account. Apple Learning specifies that this feature enables schools, campuses, or departments to redistribute app licenses as organizational needs evolve, without changing the overall license count. Content is not automatically assigned to user accounts; admins choose device- or user-based assignment. Both free and paid apps are available, so there is no restriction to free content. Additionally, purchasing can be delegated to roles such as Content Managers, not just administrators. The ability to move licenses across locations makes management flexible and cost-efficient, while maintaining organizational ownership of the content.

References: Apple Business Manager User Guide - "Apps and Books purchases and license transfers."

NEW QUESTION # 192

Which Kerberos feature allows users to sign in once and access multiple authenticated services?

- A. OAuth
- **B. Ticket-granting ticket (TGT)**
- C. SAML
- D. Sign in with Apple at Work & School

Answer: B

Explanation:

In Kerberos, the Ticket-Granting Ticket (TGT) is the feature that enables single sign-on (SSO). After initial authentication, the user receives a TGT from the Key Distribution Center (KDC). The TGT is then used to obtain service tickets for accessing various resources without re-authenticating, providing a seamless SSO experience. Sign in with Apple at Work & School (option A) is an Apple-specific feature, not a Kerberos component. OAuth (option B) and SAML (option D) are separate SSO protocols, not Kerberos features. The Apple Platform Security Guide explains the TGT's role in Kerberos SSO.

NEW QUESTION # 193

A user receives their organization-owned iPhone and completes the setup. What's the Location Services status if you configured Setup Assistant to skip the Location Services pane?

- A. The user is prompted to configure it
- **B. It's off, but the user can turn it on in Settings**
- C. It's off, and the user can't turn it on
- D. It's on by default

Answer: B

Explanation:

Skipping the pane leaves Location Services off but adjustable. The iOS Deployment Reference states, "When the Location Services pane is skipped in Setup Assistant, it remains off by default, but users can enable it in Settings unless restricted by MDM." Option A reflects this flexibility.

References:

iOS Deployment Reference, "Setup Assistant" section.

Apple Platform Deployment Guide, "Location Services Configuration" section.

NEW QUESTION # 194

What's required to use Find My on a device?

- A. Supervision
- B. A VPN configuration
- C. An MDM solution
- **D. An Apple ID**

Answer: D

Explanation:

Find My requires an Apple ID (personal or Managed) to enable device tracking, remote locking, or wiping via iCloud. It's a user-initiated feature activated in device settings, not dependent on organizational tools. An MDM solution (option A) can manage Find My settings but isn't required to use it. Supervision (option C) enhances management but isn't necessary for Find My. A VPN configuration (option D) is unrelated.

The Apple Platform Security Guide specifies an Apple ID as the prerequisite for Find My.

Reference: Apple Platform Security Guide (Section: Find My).

NEW QUESTION # 195

.....

One of the key factors for passing the exam is practice. Candidates must use DEP-2025 practice test material to be able to perform at their best on the real exam. This is why PrepPDF has developed three formats to assist candidates in their DEP-2025 Preparation. These formats include desktop-based DEP-2025 practice test software, web-based practice test, and a PDF format.
