IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q54-Q59):

NEW QUESTION # 54

SCENARIO

Please use the following to answer the next QUESTION:

John is the new privacy officer at the prestigious international law firm - A&M LLP. A&M LLP is very proud of its reputation in the practice areas of Trusts & Estates and Merger & Acquisition in both U.S. and Europe.

During lunch with a colleague from the Information Technology department, John heard that the Head of IT, Derrick, is about to outsource the firm's email continuity service to their existing email security vendor - MessageSafe. Being successful as an email hygiene vendor, MessageSafe is expanding its business by leasing cloud infrastructure from Cloud Inc. to host email continuity service for A&M LLP.

John is very concerned about this initiative. He recalled that MessageSafe was in the news six months ago due to a security breach. Immediately, John did a quick research of MessageSafe's previous breach and learned that the breach was caused by an unintentional mistake by an IT administrator. He scheduled a meeting with Derrick to address his concerns.

At the meeting, Derrick emphasized that email is the primary method for the firm's lawyers to communicate with clients, thus it is critical to have the email continuity service to avoid any possible email downtime.

Derrick has been using the anti-spam service provided by MessageSafe for five years and is very happy with the quality of service provided by MessageSafe. In addition to the significant discount offered by MessageSafe, Derrick emphasized that he can also speed up the onboarding process since the firm already has a service contract in place with MessageSafe. The existing on-premises email continuity solution is about to reach its end of life very soon and he doesn't have the time or resource to look for another solution.

Furthermore, the off-premises email continuity service will only be turned on when the email service at A&M LLP's primary and secondary data centers are both down, and the email messages stored at MessageSafe site for continuity service will be automatically deleted after 30 days.

Which of the following is NOT an obligation of MessageSafe as the email continuity service provider for A&M LLP?

- A. Data breach notification to A&M LLP.
- **B. Certifications to relevant frameworks.**
- C. Privacy compliance.
- D. Security commitment.

Answer: B

NEW QUESTION # 55

Under which circumstances would people who work in human resources be considered a secondary audience for privacy metrics?

- A. They do not receive training on privacy issues
- **B. They do not have privacy policy as their main task**
- C. They do not interface with the financial office
- D. They do not have frequent interactions with the public

Answer: B

Explanation:

People who work in human resources would be considered a secondary audience for privacy metrics if they do not have privacy policy as their main task. A secondary audience is a group of stakeholders who are indirectly involved or affected by the privacy program, but do not have primary responsibility or authority over it. They may use privacy metrics to support their own functions or objectives, such as hiring, training, or compliance. Reference: IAPP CIPM Study Guide, page 23.

NEW QUESTION # 56

SCENARIO

Please use the following to answer the next question

You were recently hired by InStyle Date Corp as a privacy manager to help InStyle Data Corp become compliant with a new data protection law. The law mandates that businesses have reasonable and appropriate security measures in place to protect personal data. Violations of that mandate are heavily fined and the legislators have stated that they will aggressively pursue companies that don't comply with the new law. You are paired with a security manager and tasked with reviewing InStyle Data Corp's current state and advising the business how it can meet the "reasonable and appropriate security" requirement. InStyle Data Corp has grown rapidly and has not kept a data inventory or completed a data mapping. InStyle Data Corp has also developed security-related policies ad hoc and many have never been implemented. The various teams involved in the creation and testing of InStyle Data Corp's products experience significant turnover and do not have well-defined roles. There's little documentation addressing what personal data is processed by which product and for what purpose. Work needs to begin on this project immediately so that InStyle Data Corp can become compliant by the time the law goes into effect. You and your partner discover that InStyle Data Corp regularly sends files containing sensitive personal data back to its customers through email, sometimes using InStyle Data Corp employees' personal email accounts. You also learn that InStyle Data Corp's privacy and information security teams are not informed of new personal data flows, new products developed by InStyle Date Corp that process personal data, or updates to existing InStyle Data Corp products that may change what or how the personal data is processed until after the product or update has gone live. Through a review of InStyle Date Corp's test and development environment logs, you discover InStyle Data Corp sometimes gives login credentials to any InStyle Data Corp employee or contractor who requests them. The test environment only contains dummy data but the development environment contains personal data including Social Security Numbers, health
