SAP Certified Associate - Validating Business Transformation Sample Questions (Q11-Q16):

NEW QUESTION # 11

What tool offers access to SAP Activate roadmaps?

- A. Process Explorer
- B. Cloud ALM Dashboard
- C. Readiness Check
- D. Roadmap Viewer

Answer: D

NEW QUESTION # 12

What is used to run fit-to-standard workshops during the design phase?

- A. Compatibility lists
- B. Template roadmaps
- C. Best practice content
- D. Simplification lists

Answer: C

Explanation:

Fit-to-standard workshops rely on SAP Best Practice content to demonstrate standard business processes. This content includes ready-made process models, configuration guides, test scripts, and role definitions that help validate whether standard processes meet business requirements. Simplification and compatibility lists are used for system conversion impact analysis, not for fit-to-

standard design activities. Therefore, best practice content is the correct basis for these workshops.

NEW QUESTION # 13

What is used to run fit-to-standard workshops during the design phase?

- B. It is instantly available for use as a subscription service.
- C. It supports process mining with plug & gain.
- D. It reduces TCO of solution landscape.
- E. It supports only cloud implementation scenarios.

Answer: A,B,D

NEW QUESTION # 15

What transformation method does SAP Signavio use to offer fast insights with minimal setup?

- A. Lift and Shift
- B. Plug and Gain
- C. Clone and Execute
- D. Extend and Merge

Answer: B

Explanation:

SAP Signavio's Plug and Gain approach is designed to provide organizations with rapid process insights without requiring extensive configuration or long deployment cycles. The method allows companies to connect their SAP systems to Signavio in a streamlined manner so the platform can immediately begin analyzing transactional data, identifying performance gaps, and revealing improvement opportunities. This makes it particularly valuable during early stages of transformation, when leadership needs fast visibility into system performance and process inefficiencies.

Plug and Gain eliminates the need for heavy upfront modeling or manual data migration. Instead, it leverages automated data integration and prebuilt best-practice process models to start generating insights almost immediately. As a result, companies can accelerate their discovery phase, understand current process behavior, and prepare for fit-to-standard workshops much more efficiently.

Options A, C, and D refer to general transformation concepts that are not tied to SAP Signavio's methodology. Plug and Gain is the only method specifically developed for Signavio to offer quick, meaningful insights with minimal effort. It supports transformation readiness by helping teams identify high-priority areas early and align their process improvement initiatives with quantifiable data.
