Furthermore, PTCE exam dump are high-quality, since we have experienced professionals to edit and verify them. We offer you free demo for you to have a try before buying PTCE Exam Braindumps, so that you can have a deeper understanding of what you are going to buy. You can enjoy free update for one year for PTCE exam dumps, and the update version for PTCE exam dumps will be sent to your email automatically.

Although this may not sound like the hardest job in the world, being a pharmacy technician isn't easy, as the work these people do directly affects the health of others. Therefore, it is vitally important that people hired as pharmacy technicians are qualified for this job. This is why more and more pharmacies and pharmacy chains expect their employees to have a valid PTCEB credential.

Medical Tests Pharmacy Technician Certification Exam Sample Questions (Q314-Q319):

NEW QUESTION # 314

According to NIOSH, pharmacy staff should wear appropriate personal protective equipment (PPE) when handling crushed or broken tablets of

- A. megestrol and dutasteride
- B. glipizide and zolpidem
- C. furosemide and buspirone
- D. glyburide and acetazolamide

Answer: A

Explanation:

NIOSH classifies certain medications as hazardous due to carcinogenicity, teratogenicity, reproductive toxicity, organ toxicity at low doses, or genotoxicity. Megestrol (a progestin) and dutasteride (a 5-alpha-reductase inhibitor) are included on the NIOSH Hazardous Drug List as reproductive risk agents. NIOSH recommends using appropriate PPE (e.g., gloves and a protective gown) when handling crushed or broken tablets/capsules of hazardous drugs to prevent dermal and inhalation exposure. In contrast, the other listed drugs (furosemide, buspirone, glyburide, acetazolamide, glipizide, zolpidem) are not listed by NIOSH as hazardous and do not routinely require HD-level PPE for handling in crushed/broken form.

References (Pharmacy Technician documents/Study Guides):

* NIOSH Hazardous Drug List and NIOSH guidance on PPE for handling hazardous drugs (including requirements for crushing/breaking tablets or opening capsules).

* USP <800> Hazardous Drugs-Handling in Healthcare Settings: PPE requirements when manipulating dosage forms that can aerosolize powder (e.g., crushing tablets).

* PTCEB-aligned Pharmacy Technician study materials on hazardous drug handling and NIOSH classifications.

NEW QUESTION # 315

Which of the following medications usually end in "-pril" and are used to relax blood vessels?

- A. ACE inhibitors
- B. Statins
- C. Beta blockers
- D. Calcium channel blockers

Answer: A

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

ACE inhibitors (Angiotensin-Converting Enzyme inhibitors) are medications that relax blood vessels and lower blood pressure. Drugs in this class typically end in "-pril" (e.g., Lisinopril, Enalapril, Ramipril).

#Explanation of Answer Choices#C. ACE inhibitors#Correct. These lower blood pressure and reduce strain on the heart.#A. Beta blockers# Incorrect. End in "-olo" (e.g., Metoprolol, Propranolol), reduce heart rate.#B.

Calcium channel blockers# Incorrect. End in "-dipine" (e.g., Amlodipine, Nifedipine), lower blood pressure differently.#D. Statins# Incorrect. End in "-statin" (e.g., Atorvastatin, Simvastatin), used for cholesterol, not blood pressure.

* FDA Drug Classification Database

NEW QUESTION # 316

CORRECT TEXT

An oral suspension comes in 100mg/5 ml. The doctor orders 0.25g PO tid. How many milliliters will this patient receive daily?

Answer:

Explanation:

1 2.5 ml

NEW QUESTION # 317

SIMULATION

The Orange Book provides information about what?

Answer:

Explanation:

Generic

NEW QUESTION # 318

According to the Centers for Disease Control and Prevention (CDC), pharmacy technicians should wash their hands with soap and water whenever:

- A. their hands are visibly clean, after eating, and before each patient.
- B. they have finished filling prescriptions, before eating, and after each patient.
- **C. their hands are visibly dirty, before eating, and after using the restroom.**
- D. they have time, before eating, and after eating.

Answer: C

Explanation:

According to CDC Hand Hygiene Guidelines, pharmacy technicians should wash their hands with soap and water instead of alcohol-based hand sanitizer when:

* Hands are visibly dirty# Alcohol-based sanitizers are ineffective against certain contaminants like dirt, grease, and some bacteria.

* Before eating# Prevents ingestion of harmful pathogens.

* After using the restroom# Soap and water are required to remove potential fecal contamination.

* A. They have time, before eating, and after eating###Incorrect

* Handwashing is mandatory when hands are dirty or after using the restroom, not just when there's time.

* B. Their hands are visibly clean, after eating, and before each patient###Incorrect

* Washing is not required if hands appear clean-sanitizer is acceptable in most situations except when visibly soiled.

* C. They have finished filling prescriptions, before eating, and after each patient###Incorrect

* Hand hygiene is important, but hand sanitizer is typically used between patients unless hands are visibly dirty.

* CDC Hand Hygiene in Healthcare Settings- Recommends soap and water for visibly soiled hands and after restroom use.

* USP <797> Guidelines for Aseptic Technique- Emphasizes proper handwashing for sterile compounding.

* PTCEB PTCE Exam Content Outline- Covers infection control and hand hygiene protocols.
