To help you learn with the newest content for the CloudSec-Pro preparation materials, our experts check the updates status every day, and their diligent works as well as professional attitude bring high quality for our CloudSec-Pro practice materials. You may doubtful if you are newbie for our CloudSec-Pro training engine, free demos are provided for your reference. The free demo of CloudSec-Pro exam questions contains a few of the real practice questions, and you will love it as long as you download and check it.

Candidates who become Palo Alto Networks CloudSec-Pro certified demonstrate their worth in the Palo Alto Networks field. The Palo Alto Networks Cloud Security Professional (CloudSec-Pro) certification is proof of their competence and skills. This is a highly sought-after skill in large Palo Alto Networks companies and makes a career easier for the candidate. To become certified, you must pass the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) certification exam. For this task, you need high-quality and accurate Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam dumps. We have seen that candidates who study with outdated Palo Alto Networks Cloud Security Professional (CloudSec-Pro) practice material don't get success and lose their resources.

## Valid CloudSec-Pro Exam Fee | Real CloudSec-Pro Exam Dumps

Everyone has their own dreams. What is your dream? Is it a promotion, a raise or so? My dream is to pass the Palo Alto Networks CloudSec-Pro exam. I think with this certification, all the problems will not be a problem. However, to pass this certification is a bit difficult. But it does not matter, because I chose itPass4sure's Palo Alto Networks CloudSec-Pro Exam Training materials. It can help me realize my dream. If you also have a IT dream, quickly put it into reality. Select itPass4sure's Palo Alto Networks CloudSec-Pro exam training materials, and it is absolutely trustworthy.

## Palo Alto Networks Cloud Security Professional Sample Questions (Q220-Q225):

### NEW QUESTION # 220

A customer has a requirement to scan serverless functions for vulnerabilities.  
Which three settings are required to configure serverless scanning? (Choose three.)

- A. Provider
- B. Region
- C. Credential
- D. Defender Name
- E. Console Address

**Answer: A,B,C**

Explanation:

To configure serverless scanning in a cloud security platform like Prisma Cloud, the system needs to know where (Region) the serverless functions are deployed, how to access them (Credential), and on which cloud platform they are running (Provider). These settings ensure that the scanning tool can accurately locate and authenticate to the serverless functions across different cloud environments for vulnerability assessment. This aligns with the principle of providing comprehensive visibility and consistent security across multi-cloud environments as outlined in the "Guide to Cloud Security Posture Management Tools" document.

Reference: [https://docs.paloaltonetworks.com/prisma/prisma-cloud/21-04/prisma-cloud-compute-edition-admin/vulnerability\\_management/serverless\\_functions.html](https://docs.paloaltonetworks.com/prisma/prisma-cloud/21-04/prisma-cloud-compute-edition-admin/vulnerability_management/serverless_functions.html)

### NEW QUESTION # 221

An organization wants to be notified immediately to any "High Severity" alerts for the account group "Clinical Trials" via Slack.

Which option shows the steps the organization can use to achieve this goal?

- A. 1. Create an alert rule and select "Clinical Trials" as the account group2.Under the "Select Policies" tab, filter on severity and select "High"3.Under the Set Alert Notification tab, choose Slack and populate the channel4.Set Frequency to "As it Happens"5.Set up the Slack Integration to complete the configuration
- **B. 1. Configure Slack Integration2.Create an alert rule and select "Clinical Trials" as the account group3. Under the "Select Policies" tab, filter on severity and select "High"4.Under the Set Alert Notification tab, choose Slack and populate the channel5.Set Frequency to "As it Happens"**
- C. 1. Configure Slack Integration2.Create an alert rule3.Under the "Select Policies" tab, filter on severity and select "High"4.Under the Set Alert Notification tab, choose Slack and populate the channel5.Set Frequency to "As it Happens"
- D. 1. Under the "Select Policies" tab, filter on severity and select "High"2.Under the Set Alert Notification tab, choose Slack and populate the channel3.Set Frequency to "As it Happens"4.Configure Slack Integration5.Create an Alert rule

**Answer: B**

Explanation:

To achieve immediate notification for "High Severity" alerts for a specific account group via Slack, the steps outlined in option A provide a comprehensive and effective approach. Firstly, configuring the Slack Integration establishes the necessary communication channel between Prisma Cloud and the Slack workspace.

Creating an alert rule with the specified account group and severity filters ensures that only relevant alerts trigger notifications.

Selecting Slack as the notification channel and setting the frequency to "As it Happens" ensures real-time alerting for critical issues.

This method leverages Prisma Cloud's alerting capabilities and Slack's real-time messaging platform to promptly notify the security team, enabling swift action to mitigate risks. This approach is in line with Prisma Cloud's flexible and configurable alerting system, designed to integrate with various external platforms for efficient incident response.

### NEW QUESTION # 222

A security team has a requirement to ensure the environment is scanned for vulnerabilities. What are three options for configuring vulnerability policies? (Choose three.)

- **A. individual grace periods for each severity level**
- B. customize message on blocked requests
- **C. apply policy only when vendor fix is available**
- **D. individual actions based on package type**
- E. output verbosity for blocked requests

**Answer: A,C,D**

Explanation:

[https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/vulnerability\\_management/vuln\\_management\\_rules](https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/vulnerability_management/vuln_management_rules)

Configuring vulnerability policies within Prisma Cloud involves several options that cater to different aspects of vulnerability management and policy enforcement. Options A, C, and D are valid configurations for vulnerability policies:

A). Individual actions based on package type allow for tailored responses to vulnerabilities found in specific types of software packages, enabling more granular control over the remediation process.

C). Applying policies only when a vendor fix is available helps prioritize the remediation of vulnerabilities for which a patch or update has been released by the software vendor, ensuring efficient use of resources in addressing the most actionable security issues.

D). Setting individual grace periods for each severity level allows organizations to define different time frames for addressing

vulnerabilities based on their severity, enabling a prioritized and risk-based approach to vulnerability management. These configurations support a comprehensive vulnerability management strategy by allowing customization and prioritization based on the nature of the vulnerability, the availability of fixes, and the risk level associated with each vulnerability.

### NEW QUESTION # 223

An administrator has been tasked with creating a custom service that will download any existing compliance report from a Prisma Cloud Enterprise tenant.

In which order will the APIs be executed for this service?

(Drag the steps into the correct order of occurrence, from the first step to the last.)

**Answer:**

Explanation:

Explanation:

1. Post /Login 2. Get /report 3. Get report/id/download

### NEW QUESTION # 224

Which command correctly outputs scan results to stdout in tabular format and writes scan results to a JSON file while still sending the results to Console?

- A. `$ twistcli images scan--address--user--password--stdout-tabular--output-file scan-results.jsonnginx:latest`
- B. `$ twistcli images scan--address--u--p--details--output-file scan-results.jsonnginx:latest`
- C. `$ twistcli images scan--address--user--password--details--file-output scan-results.jsonnginx:latest`
- D. `$ twistcli images scan--address--username--password--details--json-output scan-results.jsonnginx:latest`

**Answer: C**

Explanation:

The correct command to output scan results to stdout in tabular format and write scan results to a JSON file while still sending the results to Console is:

```
$ twistcli images scan \  
--address <console_address> \  
--user <username> \  
--password <password> \  
--output-file scan-results.json \  
--publish \  
nginx:latest
```

This command uses the `--output-file` option to write the scan results to a file and the `--publish` option to send the results to the Console. The `--stdout-tabular` option is not necessary as by default, `twistcli` writes scan results to stdout in a human-readable format. The placeholders `<console_address>`, `<username>`, and `<password>` should be replaced with the actual address of the Console, and the user's credentials<sup>12</sup>.

Please replace the placeholders with your actual Prisma Cloud Console address and credentials to execute the command successfully. If you have any more questions or need further assistance, feel free to ask.

### NEW QUESTION # 225

.....

Our company is famous for its high-quality in this field especially for CloudSec-Pro certification exams. It has been accepted by thousands of candidates who practice our study materials for their CloudSec-Pro exam. In this major environment, people are facing more job pressure. So they want to get a certification rise above the common herd. How to choose valid and efficient CloudSec-Pro Guide Torrent should be the key topic most candidates may concern.

**Valid CloudSec-Pro Exam Fee:** <https://www.itpass4sure.com/CloudSec-Pro-practice-exam.html>

We have a professional team to collect the latest information of the CloudSec-Pro exam dumps, therefore the quality can be guaranteed, Palo Alto Networks CloudSec-Pro Practice Exam Questions We absolutely guarantee that you will have no losses, And as you know, difficult questions of CloudSec-Pro exam guide are always so complex because they are intertwined with all

kinds of small questions, so much as to be a kaleidoscope, So why don't you choose our CloudSec-Pro real dumps and CloudSec-Pro exam guide as a comfortable passing plan?

Pattern recognition is a major asset as a human being. This allows the creation of highly available network architectures that use routing to control data forwarding paths in the case where any physical interface may go down.

## Quiz 2026 Palo Alto Networks CloudSec-Pro: Palo Alto Networks Cloud Security Professional Pass-Sure Practice Exam Questions

We have a professional team to collect the latest information of the CloudSec-Pro Exam Dumps, therefore the quality can be guaranteed, We absolutely guarantee that you will have no losses.

And as you know, difficult questions of CloudSec-Pro exam guide are always so complex because they are intertwined with all kinds of small questions, so much as to be a kaleidoscope.

So why don't you choose our CloudSec-Pro real dumps and CloudSec-Pro exam guide as a comfortable passing plan, Our company has been engaged in compiling the training materials for CloudSec-Pro Practice Exam Questions the IT workers during the 10 years, and now has become the bellwether in this field.
