

# AIGP Regualer Update | Latest AIGP Exam Pdf

BONUS!!! Download part of Lead2Passed AIGP dumps for free: <https://drive.google.com/open?id=1HzDdON6kMIQcKJ6kFDRDT2WJM3IaHV3>

Lead2Passed has designed IAPP Certified Artificial Intelligence Governance Professional which has actual exam Dumps questions, especially for the students who are willing to pass the IAPP AIGP exam for the betterment of their future. The study material is available in three different formats. IAPP Practice Exam are also available so the students can test their preparation with unlimited tries and pass IAPP Certified Artificial Intelligence Governance Professional (AIGP) certification exam on the first try.

The IAPP AIGP pdf questions learning material provided to the customers from Lead2Passed is in three different formats. The first format is PDF format which is printable and portable. It means it can be accessed from tablets, laptops, and smartphones to prepare for the IAPP Certified Artificial Intelligence Governance Professional (AIGP) exam. The IAPP AIGP PDF format can be used offline, and candidates can even prepare for it in the classroom or library by printing questions or on their smart devices.

## Latest IAPP AIGP Exam Pdf | AIGP Exam Dump

Are you planning to appear in the IAPP Certified Artificial Intelligence Governance Professional (AIGP) certification test and need to know where to get updated practice questions? Then you are at the right place because IAPP Certified Artificial Intelligence Governance Professional (AIGP) has made the learning material for the applicants to prepare successfully for the certification exam in a short time.

### IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Understanding the Foundations of AI Governance:</b> This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Understanding How to Govern AI Deployment and Use:</b> This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Understanding How Laws, Standards, and Frameworks Apply to AI:</b> This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li> </ul>

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q77-Q82):

### NEW QUESTION # 77

The planning phase of the AI life cycle articulates all of the following EXCEPT the?

- A. Context in which the model will operate.
- B. Objective of the model.
- C. Choice of the architecture.
- **D. Approach to governance.**

**Answer: D**

Explanation:

The planning phase of the AI life cycle typically includes defining the objective of the model, choosing the appropriate architecture, and understanding the context in which the model will operate. However, the approach to governance is usually established as part of the overall AI governance framework, not specifically within the planning phase. Governance encompasses broader organizational policies and procedures that ensure AI development and deployment align with legal, ethical, and operational standards. Reference: AIGP Body of Knowledge, AI lifecycle planning phase section.

### NEW QUESTION # 78

The White House Executive Order from November 2023 requires companies that develop dual-use foundation models to provide reports to the federal government about all of the following EXCEPT?

- A. The physical and cybersecurity protection measures of their dual-use foundation models.
- **B. Any environmental impact study for each dual-use foundation model.**
- C. The results of red-team testing of each dual-use foundation model.
- D. Any current training or development of dual-use foundation models.

**Answer: B**

Explanation:

The White House Executive Order from November 2023 requires companies developing dual-use foundation models to report on

their current training or development activities, the results of red-team testing, and the physical and cybersecurity protection measures. However, it does not mandate reports on environmental impact studies for each dual-use foundation model. While environmental considerations are important, they are not specified in this context as a reporting requirement under this Executive Order.

Reference: AIGP BODY OF KNOWLEDGE, sections on compliance and reporting requirements, and the White House Executive Order of November 2023.

#### NEW QUESTION # 79

All of the following types of testing can help evaluate the performance of a responsible AI system EXCEPT?

- A. Statistical sampling.
- B. Adversarial robustness.
- C. Decision analysis.
- D. Risk probability/severity.

**Answer: D**

Explanation:

Risk probability/severity testing is not typically used to evaluate the performance of an AI system. While important for risk management, it does not directly assess an AI system's operational performance. Adversarial robustness, statistical sampling, and decision analysis are all methods that can help evaluate the performance of a responsible AI system by testing its resilience, accuracy, and decision-making processes under various conditions. Reference: AIGP Body of Knowledge on AI Performance Evaluation and Testing.

#### NEW QUESTION # 80

All of the following are unique characteristics of AI that require a comprehensive approach to governance EXCEPT?

- A. Autonomy
- B. Adaptability
- C. Superintelligence
- D. Speed and scale
- E. Automation

**Answer: C**

Explanation:

The correct answer is E - Superintelligence.

While the other options (Autonomy, Automation, Adaptability, Speed and Scale) are commonly cited as real-world characteristics that affect governance today, superintelligence remains a theoretical concept.

From the AIGP ILT Guide and AI Governance in Practice Report 2025:

"Core AI characteristics-such as automation, adaptability, speed, and autonomy-require active governance due to their impact on decision-making, legal liability, and risk." However, superintelligence is speculative and not a current feature of AI systems under governance frameworks like the EU AI Act or NIST RMF.

Thus, it's not a current characteristic requiring governance in real-world enterprise settings.

#### NEW QUESTION # 81

Scenario:

A mid-sized tech firm is building its AI governance program and is exploring ISO/IEC standards that could support consistency in terminology and risk assessment processes across teams.

ISO/IEC 22989 and ISO/IEC 42001 can be valuable resources for AI Governance professionals in all of the following ways EXCEPT:

- A. Being applicable to organizations of any size and industry seeking to use AI responsibly and effectively in their design processes, information systems and controls
- B. Addressing specific issues related to managing procurement processes with third parties that provide or develop AI systems for their organization
- C. Establishing terminology and describing concepts so that governance team members can communicate with diverse parties

- D. Recommending key activities to assess and manage risk: test, evaluate, verify and validate (TEVV)

Explanation:

From the AIGP Body of Knowledge - Standards Section:

"These standards help establish common language and risk governance procedures. Procurement governance typically falls under separate frameworks or sector-specific guidance." Thus, procurement governance (Option C) is not a central use case for these standards.
