When the reviewing process gets some tense, our C_WME_2506 practice materials will solve your problems with efficiency. With high-quality C_WME_2506 Guide materials and flexible choices of learning mode, they would bring about the convenience and easiness for you. Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember.

SAP C_WME_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.
Topic 2	Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.

Topic 3	• Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q13-Q18):

NEW QUESTION # 13

Your company just provided you with the new company logo that they want you to use in all of your WalkMe deployables. Where is the best place to store the logo?

- A. Local Settings
- B. WalkMe Admin Center
- **C. The Asset Library**
- D. Engaged Elements

Answer: C

NEW QUESTION # 14

Which of the following options would be appropriate to create a Segment in the Segmentation center? Note: There are 3 correct answers to this question.

- **A. Department**
- **B. User Role**
- **C. Geographic location**
- D. IP Address
- E. Autoplay on 1 page

Answer: A,B,C

Explanation:

The WalkMe Segmentation Center allows Builders to create Segments to target content to specific user groups based on attributes. Appropriate options include:

- * Department(C): Segments can target users based on their department (e.g., Sales, Finance).
- * Geographic location(D): Segments can use location data to tailor content by region or country.
- * User Role(E): Segments can target roles (e.g., Admin, User) for role-specific guidance.

The other options are incorrect:

- * IP Address(A) is not a standard segmentation attribute in WalkMe.
- * Autoplay on 1 page(B) is a content trigger, not a user segment.

Extract from Official WalkMe Documentation:

According to the WalkMe Admin Center User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 3.3: Segmentation):

"Segments in the Segmentation Center can be based on attributes like Department, Geographic Location, and User Role, enabling targeted content delivery." The course *Getting Started with Building WalkMe Solutions* states:

"Create Segments using criteria like Department, Location, or Role to ensure content is relevant to specific user groups." Options C, D, and E are appropriate for Segments.

NEW QUESTION # 15

While doing Quality Assurance for a SmartTip, you notice that when you scroll up and down the page, the SmartTip appears to scroll up and down as well before snapping back to its proper location next to your element. Which configuration should you adjust to fix this?

- **A. Lock to Element**
- B. Display Condition
- C. Selected Element # Appears and disappears as a result of end user action
- D. Z-Index

Answer: A

Explanation:

The issue described-where a SmartTip scrolls with the page before snapping back to its intended position- indicates that the SmartTip is not properly anchored to its associated element. The **Lock to Element** configuration ensures that the SmartTip remains fixed relative to the selected element, even during scrolling or dynamic page changes. Enabling this setting in the WalkMe Editor prevents the SmartTip from moving independently and ensures it stays aligned with the target element.

The other options are incorrect:

* Display Condition(A) controls when the SmartTip appears based on rules, not its positioning behavior.

* Z-Index(B) affects stacking order, not scrolling alignment.

* Appears and disappears as a result of end user action(C) relates to element visibility triggers, not anchoring during scrolling.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5: SmartTips):

"The 'Lock to Element' setting ensures that a SmartTip remains anchored to its selected element, preventing it from scrolling independently or misaligning during page interactions like scrolling." The course *Advancing Your Skills in Building WalkMe Solutions* advises:

"If a SmartTip moves with page scrolling before snapping back, enable 'Lock to Element' in the Editor to maintain consistent positioning relative to the target element." Option D, Lock to Element, resolves the scrolling issue observed during Quality Assurance.

Course: *Advancing Your Skills in Building WalkMe Solutions*, Module 8: Troubleshooting SmartTip Configurations.

NEW QUESTION # 16

Which of the following types of WalkMe content can be added to the Menu?

Note: There are 3 correct answers to this question.

- **A. Onboarding Tasks**
- **B. Smart Walk-Thrus**
- C. SmartTips
- **D. Resources**
- E. ShoutOuts

Answer: A,B,D

NEW QUESTION # 17

When building SmartTips with multi-language support, which practice should you avoid to ensure compatibility?

- Answer: D**
