Peoplecert PeopleCert DevOps Site Reliability Engineer (SRE) Sample Questions (Q21-Q26):

NEW QUESTION # 21

What is the MOST widely tracked Service Level Objective (SLO)?

- A. Securability
- **B. Availability**
- C. Observability

- D. Performance

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Availability is the most widely tracked and commonly understood SLO across nearly all digital services. It measures whether users are able to successfully access and use the system. Because unavailability directly impacts user experience, revenue, trust, and reliability, it is the primary SLO used across industries.

The Site Reliability Engineering Book, Chapter "Service Level Objectives," states:

"Availability is one of the most common and important SLOs since it reflects the basic ability of the service to function for users." The SRE Workbook also notes:

"Availability targets (e.g., 99.9%, 99.99%) are the most widely used form of SLOs and form the foundation of error budget policies." While performance SLOs are also common, availability SLOs are almost universal and foundational.

Thus, D. Availability is the correct answer.

NEW QUESTION # 22

Which of the following is the BEST description of a customer reliability engineer (CRE)?

- **A. They use deep engineering expertise to improve the cloud provider's services**
- B. They integrate with the customer's operations team to share responsibilities
- C. They work with the cloud provider's SRE team to ship and build new features
- D. They take a software engineering approach to redesign all cloud services

Answer: A

NEW QUESTION # 23

Which of the following BEST describes capacity planning?

- A. Monitoring the percentage of capacity of resources being used over a time period
- B. Determining the maximum amount that any resource can accommodate or deliver
- C. Activities performed to manage provider resources and provide multiple services
- **D. Activities used to create a plan that manages resources to meet service demand**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

SRE defines capacity planning as the discipline of ensuring that a system has enough resources to meet expected demand, both now and in the future. The SRE Book states: "Capacity planning ensures that services have sufficient resources available to meet reliability and performance targets, accounting for growth, trends, and forecasted usage." (SRE Book - Chapter: Capacity Planning). This involves forecasting workloads, analyzing trends, and creating plans to scale infrastructure so that service-level objectives can continue to be met.

Option C correctly describes capacity planning as creating a resource management plan to meet demand.

Option A refers to capacity monitoring, not planning.

Option B reflects generic resource management or cloud provider operations, not SRE capacity planning.

Option D refers to determining maximum capacity, which is a measurement activity-not full planning.

Thus, C is the correct SRE-aligned answer.

NEW QUESTION # 24

Which of the following BEST describes the most important rationale for NOT seeking an SLO of 100% availability?

- A. It is not realistic for the complexity and scale of services.
- B. There is no room for improvements if targets are so high.
- C. The user satisfaction score is affected by a low percent
- D. The likely result is failure where such targets are defined.

Answer: A

NEW QUESTION # 25

Which scenario BEST illustrates the swarming concept used during incident management?

- A. An incident analyst route escalates by assessing a consolidated list of next-level support teams and their area of expertise
- B. A high-level specialist support team constantly reviews their incoming incident queue to respond instantly to escalations
- C. A mid-level support team continually monitors escalated incidents to assigned teams to ensure they are making progress
- D. A group of specialist teams meet and review a queue of escalated incidents to determine who should work on which one

Answer: D
