NEW QUESTION # 61

You have the Build permission for the BI Finance dataset but you do NOT have permissions for the workspace, You need to connect to BI Finance and create a report.

Which actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From the Power BI service, create a new report and select a published dataset
- B. From Power BI Desktop, connect to a Dataverse data source.
- C. From Power BI Desktop, connect to a shared dataset
- D. From the Power BI service, create a dataflow to the dataset by using DirectQuery.

Answer: A,C

Explanation:

When you create a report in Power BI Desktop, the data in that report is stored in a data model.

When you publish a report to the Power BI service, the data model is also published to the service as a dataset at the same time.

When you share the report with others, you can give them Build permission for the dataset that the report is built on, so they can discover and reuse it for their own reports, dashboards, etc.

If you have Reshare and Build permission on a dataset, and you share a report or dashboard you built on that dataset, you can

specify that the recipients also get Build permission for the dataset.
