### 정답：B,D,E

### 설명：
Explanation
Some characteristics of the material ledger are that it is used to valuate materials in different currencies, it is mandatory in SAP S/4HANA, and it is used to calculate different prices for material valuation. The material ledger is not used to calculate the standard price or must be activated per controlling area.References: [SAP Help Portal - Material Ledger Overview]

### 질문 # 26
Which object is determined using an access sequence in message determination?

- A. Message schema for a document category
- B. Output device in an output condition record
- C. Output condition record for a message type
- D. Message type in a message schema

### 정답：C

### 설명：
Explanation
An access sequence is a search strategy that determines how the system finds an output condition record for a message type. An output condition record contains information such as output medium, output time, and output partner for a message type. **질문 # 29**

You want to create a purchase order An irilo teco-d is available for the material-supplier combination What iogic does the system use to determine a pnee from the info record?
Note: There are 2 correct answers to this question.

- A. The system always proposes the valid plan'-specific if available.
- B. If there are NO valid conditions, the system can propose the price from the last purchase order, if available.
- C. The system always proposes the price slotec al purchasing organization level, if available
- D. The system always proposes the price from the last purchase order. If availabe.

**정답：B,D**

**설명：**
Explanation
To determine a price from the info record, the system uses the following logic:
The system always proposes the valid plant-specific price, if available. This means that if there is an info record for the material and supplier combination at plant level, the system will use the price from that info record.
If there are no valid conditions, the system can propose the price from the last purchase order, if available. This means that if there is no info record or no valid price in the info record, the system will use the price from the most recent purchase order for the same material and supplier combination.
