Our study materials with high quality and high pass rate in order to help you get out of your harassment. So, act now! Use our AWS-Developer Quiz prep.

The AWS Certified Developer Associate Exam (DVA-C02) certification exam covers a wide range of topics related to AWS development, including AWS core services, database technologies, messaging services, and application deployment. AWS-Developer Exam also includes questions on developing and maintaining AWS-based applications, including best practices for security, performance, and cost optimization. Candidates must be able to demonstrate their ability to use AWS services to design, develop, and deploy applications that meet customer requirements.

Earning the AWS Certified Developer - Associate certification demonstrates a developer's ability to design and deploy applications on the AWS platform, which is rapidly becoming the preferred choice for enterprises that want to embrace the cloud. AWS Certified Developer Associate Exam (DVA-C02) certification not only validates a developer's skills but also helps them stand out in a competitive job market. Additionally, the certification provides access to a community of AWS-certified professionals, resources, and events that can help developers stay up-to-date with the latest trends and best practices in cloud computing.

Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample

Questions (Q202-Q207):

NEW QUESTION # 202

When a Simple Queue Service message triggers a task that takes 5 minutes to complete, which process below will result in successful processing of the message and remove it from the queue while minimizing the chances of duplicate processing?

- A. Retrieve the message with increased DelaySeconds, delete the message from the queue, process the message
- B. Retrieve the message with an increased visibility timeout, process the message, delete the message from the queue
- C. Retrieve the message with increased DelaySeconds, process the message, delete the message from the queue
- D. Retrieve the message with an increased visibility timeout, delete the message from the queue, process the message

Answer: B

NEW QUESTION # 203

A company runs an application on AWS that needs to be accessed only by employees. Most employees work from the office, but others work remotely or travel.
How can the Security Engineer protect this workload so that only employees can access it?

- A. Create a virtual gateway for VPN connectivity for each employee, and restrict access to the workload from within the VPC.
- B. Add each employee's home IP address to the security group for the application so that only those users can access the workload.
- C. Use a VPN appliance from the AWS Marketplace for users to connect to, and restrict workload access to traffic from that appliance.
- D. Route all traffic to the workload through AWS WAF. Add each employee's home IP address into an AWS WAF rule, and block all other traffic.

Answer: A

NEW QUESTION # 204

A physician's office management application requires that all data in transit between an EC2 instance and an Amazon EBS volume be encrypted Which of the following techniques fulfills this requirement? (Select TWO)

- A. Use 1AM roles to limit access to the Amazon EBS volume
- B. Create encrypted snapshots into Amazon S3
- C. Enable EBS encryption
- D. Leverage OS-level encryption
- E. Use Amazon RDS with encryption

Answer: B,C

NEW QUESTION # 205

After restoring an Amazon RDS snapshot from 3 days ago, a company's Development team cannot connect to the restored RDS DB instance. What is the likely cause of this problem?

- A. The production DB instance is using a custom parameter group
- B. The restored DB instance does not have Enhanced Monitoring enabled
- C. The production DB instance is using a custom option group
- D. The restored DB instance is using the default security group

Answer: A

NEW QUESTION # 206

A Developer is creating a mobile application that will not require users to log in.
What is the MOST efficient method to grant users access to AWS resources?

- A. Use Amazon Cognito to associate unauthenticated users with an IAM role that has limited access to resources.
- B. Create credentials using AWS KMS and apply these credentials to users when using the application.
- C. Use an identity provider to securely authenticate with the application.
- D. Create an AWS Lambda function to create an IAM user when a user accesses the application.

Answer: A
