Cisco Small and Medium Business Engineer Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which Cisco program offers knowledge about security resilience and how the Cisco Secure portfolio can help customers achieve it?

- A. EBC
- **B. Fire Jumper**
- C. MINT
- D. U-Learn

Answer: B

Explanation:

The Cisco Fire Jumper program is designed to provide knowledge about security resilience and how the Cisco Secure portfolio can assist customers in achieving it. This program educates and enables partners on Cisco's security architecture, helping them to understand and sell Cisco security solutions effectively. It covers various aspects of security resilience, including threat defense, secure network access, and end-to-end protection, which are all crucial elements of the Cisco Secure portfolio.

NEW QUESTION # 39

Which resource is used to learn about Cisco APIs and connect with other developers in Cisco communities?

- A. WebCad
- B. Black Belt
- **C. DevNet**
- D. DevCad

Answer: C

Explanation:

Cisco DevNet is the dedicated resource for learning about Cisco APIs and connecting with other developers within the Cisco community. It provides a wealth of information including API documentation, SDKs, learning labs, and a sandbox environment for practical, hands-on experience. DevNet also hosts events and offers a platform for developers to collaborate, share knowledge, and find support1. References :=

NEW QUESTION # 40

Which platform does Cisco use to enhance customer experiences through APIs and automation?

- **A. Cisco DevNet**
- B. Cisco DNA Center
- C. Cisco Meraki
- D. Cisco Webex

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation: Cisco DevNet is the platform Cisco uses to enhance customer experiences through APIs and automation. DevNet is a developer program and community that provides tools, resources, and APIs to integrate Cisco technologies into custom applications and workflows. It empowers developers and businesses to automate processes, create tailored solutions, and improve user experiences by leveraging Cisco's extensive API ecosystem (e.g., Meraki Dashboard API, Webex APIs). For SMBs, this means partners or IT teams can build integrations that streamline operations or enhance customer-facing services, such as automated ticketing systems or personalized network management dashboards.

* A. Cisco Meraki: While Meraki offers a cloud-managed platform with some API capabilities, it's primarily an end-user solution for networking, not a developer-focused platform for broader API and automation enhancement.

* B. Cisco DNA Center: This is a network management and automation platform, but its APIs are specific to network operations, not a general customer experience enhancement tool like DevNet.

* C. Cisco Webex: Webex supports collaboration with some API integration, but it's a communication tool, not a comprehensive

platform for API-driven customer experience innovation.

Cisco DevNet (D) stands out as the dedicated platform for API and automation-driven enhancements, serving both SMBs and enterprises.

References: Cisco DevNet's official site (developer.cisco.com) and SMB-focused developer resources highlight its role in automation and API integration, aligned with the 700-750 SMBE exam topics on leveraging Cisco platforms for innovation.

NEW QUESTION # 41

Which Cisco product is part of the Secure SMB experience for enabling people?

- A. Stealth watch
- **B. Umbrella**
- C. Meraki MX
- D. Cisco Secure Email

Answer: B

Explanation:

Cisco Umbrella is a crucial component of the Secure SMB experience, particularly in enabling people within an organization to work safely, regardless of their location. Umbrella provides a cloud-delivered security service that protects users from malicious internet destinations whether they are on or off the network. It operates by enforcing security at the DNS layer, which is the first step in internet connectivity. Umbrella's strength lies in its ability to block requests to malicious destinations before a connection is even established, offering proactive security that is both effective and easy to deploy. For SMBs, this means enhanced protection against threats like malware, phishing, and ransomware without the complexity of traditional security solutions. By securing internet access across all devices and locations, Umbrella plays a pivotal role in enabling secure and efficient remote work, making it an essential product for the Secure SMB experience.

NEW QUESTION # 42

What is the number one threat vector?

- A. IoT Devices
- **B. Email**
- C. Web Page Spoofing
- D. DOS Attacks

Answer: B

Explanation:

Email is considered the top threat vector for small and medium businesses. This is because it is the most common method attackers use to deliver malware, phishing attempts, and other malicious activities. Research from HP Wolf Security indicates that email accounts for 79% of threats, making it a significant concern for cybersecurity efforts¹.
