IIBA Entry Certificate in Business Analysis (ECBA) Sample Questions (Q192-Q197):

NEW QUESTION # 192

Which of the following techniques would a business analyst (BA) use to conduct elicitation?

- A. Reviews
- B. Estimation
- C. Prioritization

- **D. Observation**

Answer: D

Explanation:
elicitation techniques

NEW QUESTION # 193

If a business analyst (BA) asks Questions during the job shadowing with a subject matter expert, which approach is being used?

- A. Inactive Observation Approach
- **B. Active Observation Approach**
- C. Passive Observation Approach
- D. Contextual Inquiry Observation

Answer: B

Explanation:

The Active Observation Approach is used when a business analyst (BA) asks questions during the job shadowing with a subject matter expert. This approach involves the observer interacting with the person performing the task, allowing the BA to ask questions and gain immediate understanding of the process and reasoning behind actions taken during the activity. It is a method that enables the BA to quickly comprehend undocumented processes and the rationale behind the tasks being observed.

NEW QUESTION # 194

A stakeholder who verifies that prioritized requirements will deliver value from a customer perspective is the:

- A. regulator,
- B. domain subject matter expert.
- **C. end user.**
- D. sponsor.

Answer: C

Explanation:

The end user is best positioned to verify that prioritized requirements will deliver value from a customer perspective because they directly interact with the solution and experience its outcomes. Their feedback ensures that the requirements meet usability, functionality, and satisfaction expectations.

While other stakeholders like the sponsor or domain SME validate alignment with business goals, the end user focuses on practical, value-based utility.

BABOK Reference:

Throughout the BABOK, particularly in Requirements Life Cycle Management and Solution Evaluation, the role of the end user is emphasized for validation and feedback based on real-world use.

NEW QUESTION # 195

When creating a use case diagram which of the following relationships may a business analyst (BA) use?

- A. Output, input
- **B. Extend, include**
- C. Extend, enhance
- D. Allow, prevent

Answer: B

Explanation:

In use case diagrams, the relationships between use cases may include "include" and "extend."

* Include indicates that a use case incorporates another use case as part of its behavior.

* Extend shows optional behavior that extends the base use case under certain conditions.

These relationships help modularize functionality and clarify dependencies.

BABOK Reference - Technique: Use Cases and Scenarios (Section 10.49):

"Use cases can have relationships such as include or extend to indicate reuse or conditional behavior extensions."

NEW QUESTION # 196

Which of the following is the integrated output that correctly reflects captured information agreed to by business analysts (BAs) and other stakeholders?

- A. Activity plan
- B. Business analysis information
