NEW QUESTION # 298

You need to recommend a solution for the business process testing plan. What should you recommend?

- A. SysTest framework
- B. LCS Business process library
- C. Derived test cases
- D. Chain test cases

Answer: C

Explanation:

Reference:

Topic 3, Margie's Travel

Background

Margie's Travel company (<http://www.margiestravel.com/>) provides travel services to consumers. These services include package offers, special deals, and excursion add-ons such as jet ski and horseback rides in Jamaica. Margie's Travel negotiates rates with multiple vendors and secures bundled pricing for consumers, serving as a travel broker. Margie's Travel only sells services and does not have any tangible products or merchandise.

Margie's Travel began in 1994 when Margie, CEO, and president, planned group trips for her friends in the United States (US). As this grew organically, Margie's created a second company based in Jamaica, followed by the acquisition of a third company in the United Kingdom (UK). The company has grown fast challenging the current systems that support the business model. Margie has determined it is time to implement Dynamics 365 Finance.

Applications and environment

The current system has the following structure:

- * In the US, employees use Software A, accounting software, which is a desktop installation package for small businesses and single users.
- * In the UK, employees use Software B, ERP (enterprise resource planning) software installed on local servers. The cost of maintaining Software B licensing is high, and Margie's Travel has decided against the software and associated overhead costs.
- * In Jamaica, employees use Software C, a homegrown application based on spreadsheets, local sales representatives use pen and paper in the field.
- * Margie's Travel employees use personal email addresses and chat tools and text each other directly due to the lack of corporate tools.
- * IT department resources are located in the US and are responsible for management of all software support.
- * Margie's Travel company does not have standardized processes across the organization.
- * The manager in each country/region is responsible for system downtime. This has proven to be a challenge due to the multiple time zones across the organization and the centralized IT department.

As customers purchase packages, Margie's Travel can claim rebates with the providing vendor for every package sold. The rebates are claimed quarterly, and internal workflows have been established for approval prior to vendor submission. The workflows for package offerings eligible for rebates can be complex. User2 has created Visio diagrams for the associated approval processes.

Customer relations

- * Customers exist in all three current countries/regions where Margie's Travel operates.
- * Margie's Travel offers consumers a loyalty program. Consumers can earn points per dollar spent across all in countries/regions in which Margie's operates. The loyalty program is currently managed by using a spreadsheet.

Application and environment

- * All three countries/regions must use Dynamics 365 Finance.
- * The system must allow for updates to be applied at the same time as they are periodically released.
- * Margie's Travel requires that the new business processes be standardized and follow industry best practices.
- * Margie's Travel requires implementation of Office 365 and Microsoft Teams to streamline operations. The IT department will be responsible for troubleshooting these applications, along with Dynamics 365 Finance.
- * The infrastructure team must ensure that separate environments are created for development and build, prior to moving to test and eventually gold environments.
- * The infrastructure team must move the code for the loyalty program to a test environment.
- * The CTO has directed the infrastructure team to guarantee they are on the most current version available at the time of go-live.
- * The go-live activities must be coordinated across all countries/regions, with data validation planned for each time zone.
- * Once user acceptance testing (UAT) has been completed, the project manager must report the number of tenants for production to Microsoft.
- * A report must show seasonality and weather patterns so that Margie's Travel does not offer excursions during timeframes where severe weather is predicted.
- * Sales representatives in the field will only be licensed for Microsoft 365 and Microsoft Power Platform.

Customer relations

- * Customers must be identified with the same customer ID across all companies and systems, and automatically update cross-references as new records are created.
- * Margie's Travel wants to enable customer self-service in the future for customers based in the US and UK. This feature is not planned for the initial system rollout; however, the CIO has asked that the roadmap be created for Dynamics 365 Customer Service and Dynamics 365 Commerce applications in the future. In addition, the CIO wants to ensure that the old customer numbers can be matched to a new standardized format.
- * New customers in Jamaica must be reviewed and approved due to frequent customer data discrepancies. The sales representatives in the field will enter information that must be routed to validate against existing data.
- * The rebates cannot be claimed because disparate systems today do not allow for consolidation to ensure that thresholds are met to claim rebates.
- * The accounts receivable and accounts payable departments are unclear about the workflows associated with the rebate process. User2 must ensure that representatives from each department validate that they have tested their respective steps in the overall

process. Testing feedback must be communicated to User2.

Customer relation

* Customers must be identified with the same customer ID across all companies and systems, and automatically update cross-references as new records are created.

* Margie's Travel wants to enable customer self-service in the future for customers based in the US and UK. This feature is not planned for the initial system rollout; however, the CIO has asked that the roadmap be created for Dynamics 365 Customer Service and Dynamics 365 Commerce applications in the future. In addition, the CIO wants to ensure that the old customer numbers can be matched to a new standardized format.

* New customers in Jamaica must be reviewed and approved due to frequent customer data discrepancies. The sales representatives in the field will enter information that must be routed to validate against existing data.

NEW QUESTION # 299

A company uses Dynamics 365 Supply Chain Management.

The system has a slow response time when sales orders are entered.

You need to identify any blocking SQL statements.

Which Lifecycle Services (LCS) tool should you use?

- A. Telemetry data monitoring
- **B. SQL Insights - Live View**
- C. SQL Insights - Index Analysis
- D. Performance SDK

Answer: B

Explanation:

All SQL performance tools in LCS are available under the SQL Insights tab on the Environment Monitoring page for a specific environment. The following tabs are available:

Live View - Shows executing statements and blocking statements. The current SQL Now page that shows performance issues will be replaced with Live View.

Index Analysis - Shows aggregated index and table information, based on user scans, user seeks, user updates, and row count. Like performance metrics, this tool shows the trend for the selected index along with additional table metrics. This feature is not available in self-service environments.

Queries - Shows a list of predefined queries that can be used to retrieve metrics on demand. Examples of queries include a current blocking tree, a list of active plan guides, and a list of most expensive queries.

Etc.

NEW QUESTION # 300

You need to recommend a tool to meet the solution requirement.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 301

A distribution center uses Dynamics 365 Supply Chain Management.

When product returns are received at the distribution center, they are inspected, and a replacement is sent to the customer.

Customer service processes both the return receipts and replacement orders to speed up the process.

The system must be able to prevent a single user from completing an entire return process.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Scenario	Recommendation
The ability to process the receipt of the returned product.	<div>Field security</div> <div>Security role</div> <div>Segregation of duties rule</div>
The ability to issue the shipment advice of the replacement product.	<div>Field security</div> <div>Security role</div> <div>Segregation of duties rule</div>
The ability to prevent the assignment of the permission to issue a customer credit.	<div>Field security</div> <div>Security role</div> <div>Segregation of duties rule</div>

Answer:

Explanation:

Scenario	Recommendation
The ability to process the receipt of the returned product.	<div>Field security</div> <div>Security role</div> <div>Segregation of duties rule</div>
