Both practice tests of BraindumpsVCE i.e. web-based and desktop are customizable, mimic Microsoft MB-500 real exam scenarios, provide results instantly, and help to overcome mistakes.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q55-Q60):

NEW QUESTION # 55

You are a Dynamics 365 Finance and Operations developer.

You need to use the Extensible Data Security (SDS) framework to restrict to the data in the Sales table form based on the customer group and the role of the user.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Step 1: Create a new user role and add required privileges.

Individual security permissions are combined into privileges, and privileges are combined into duties. The administrator grants

security roles access to the program by assigning duties and privileges to those roles.

Step 2: Assign the newly created role to the user.

Step 3: Define the list of constrained tables.

Add the constrained tables and views.

Step 4: Define the context of the rule.

Set the context.

Set the ContextType property to one of the following:

* ContextString - Set the property to this value if a global context is to be used to determine whether the policy should be applied.

When required, this context string needs to be set by the application using the XDS::SetContext API.

* RoleName - Set the property to this value if the policy should be applied only if a user in a specific role accesses the constrained tables.

* RoleProperty - Set the property to this value if the policy is to be applied only if the user is a member of any one of a set of roles that have the ContextString property set to the same value.
