To pass the exam, you need to score at least 69% marks.

Adobe Experience Manager Architect Master Sample Questions (Q61-Q66):

NEW QUESTION # 61

A client was successfully moved from AEM 6.5 to AEM as a Cloud Service (AEMaaCS) environment. The Content Transfer Tool was used to transfer the content to the AEMaaCS environment. The developed components render different renditions based on the breakpoint of the pages. The users reported that newly uploaded assets are not rendering or missing. What is the cause of this issue and how can it be resolved?

- A. The Asset Update workflow is not compatible with AEMaaCS. The solution is to use AEM Processing profiles to create the missing renditions.
- B. The Asset Update workflow was not migrated properly to the new AEMaaCS instance. The solution is to make sure that the workflow is present in the codebase.
- C. The Asset Update workflow was not migrated properly to the new AEMaaCS instance. The solution is to migrate the /var path and the workflow models using the Content Transfer Tool.
- D. The Asset Update workflow is not compatible with AEMaaCS. The solution is to rewrite the workflow to use the new APIs in the AEM SDK.

Answer: A

NEW QUESTION # 62

A media company wants to use AEM as content hub for multiple customer touch points:

- * Brand-specific marketing websites hosted on AEM Sites
- * Single Page Applications using headless content
- * Native mobile applications
- * Content offers in Adobe Target

The company wants to manage its content efficiently with its small editor staff. Text should be entered and reviewed only once, then reused for all touch points.

How should an Architect incorporate these requirements into a solution that leverages AEM Sites features?

- A)
- B)
- C)
- D)
-

- A. OptionB
- B. OptionD
- C. OptionA
- D. OptionC

Answer: B

NEW QUESTION # 63

A client wants their Active Directory (AD) users created into IMS automatically. These are AEMaaCS users where the user information is required to be aligned with user information from the company AD. Which step would be implemented?

- A. Define an Access Control List (ACLs)
- B. Integrate with the User Sync Tool
- C. Generate a CSV file and upload to Adobe IMS
- D. Use ACS Commons ACL Packager

Answer: B

NEW QUESTION # 64

A customer's photo gallery site uses query parameters to filter photo search results. The site experiences high AEM Publish server load when users filter photos on the site. The customer would like to identify the cause of this issue.

What should the Architect investigate first?

- A. Dispatcher load balancing configuration
- B. Volume of assets being loaded at a time
- C. Cache-Control Headers in dispatcher.any
- D. ignoreUrlParams configuration in dispatcher.any
