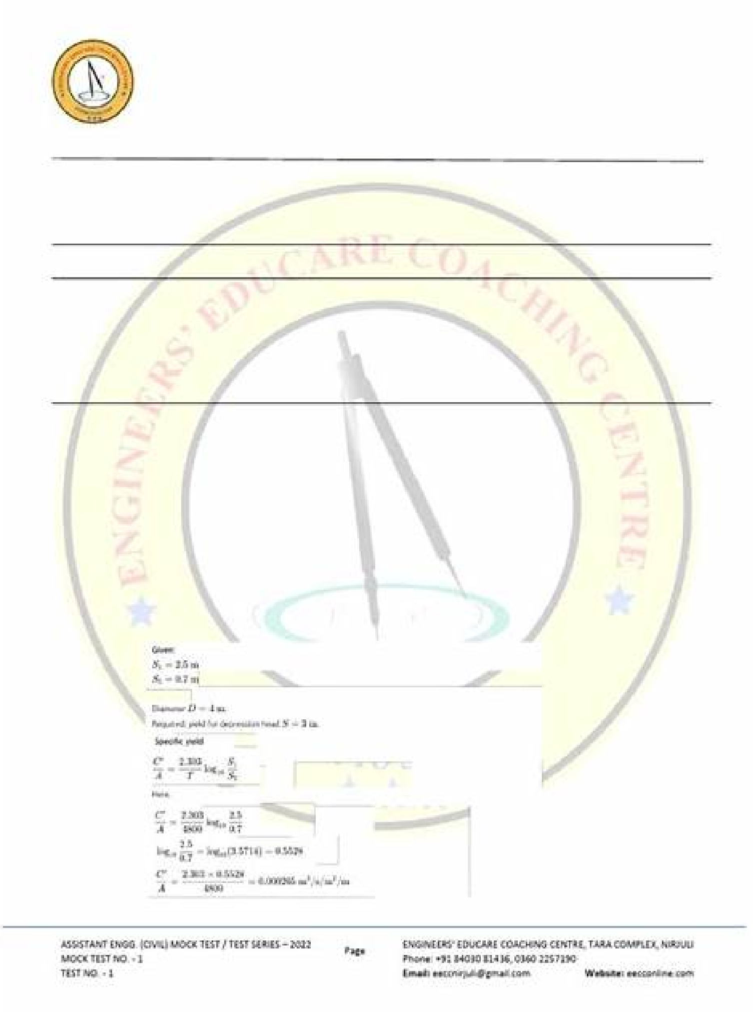
Reliable 312-85 Test Pass4sure | 312-85 Exam Fee



Given:

$S_1 = 2.5$ m

$S_2 = 0.7$ m

Diameter $D = 4$ m.

Required: yield for depression head $S = 3$ m.

Specific yield

$$\frac{C'}{A} = \frac{2.303}{T}\log_{10}\frac{S_1}{S_2}$$

Here,

$$\frac{C'}{A} = \frac{2.303}{4800}\log_{10}\frac{2.5}{0.7}$$

$$\log_{10}\frac{2.5}{0.7} = \log_{10}(3.5714) = 0.5528$$

$$\frac{C'}{A} = \frac{2.303 \times 0.5528}{4800} = 0.000265\ m^3/s/m^2/m$$

BONUS!!! Download part of Real4exams 312-85 dumps for free: https://drive.google.com/open?id=1tf8EaEmn8rwRTUpZBxoIQi020HAQu8Qt

If you ask me why other site sell cheaper than your Real4exams site, I just want to ask you whether you regard the quality of 312-85 exam bootcamp PDF as the most important or not. Sometime I even don't want to explain too much. Sometime low-price site sell old version but we sell new updated version. If you want to get the old version of 312-85 Exam Bootcamp PDF as practice materials, you purchase our new version we can send you old version free of charge, if this ECCouncil 312-85 exam has old version.

We are a team of the exam questions providers of ECCouncil braindumps in the IT industry that ensure you to pass actual test 100%. We have experienced and professional IT experts to create the latest 312-85 Exam Questions And Answers which are approach to the real 312-85 practice test. Try download the free dumps demo.

312-85 Exam Fee, 312-85 Cert Exam

The more you practice with our 312-85 simulating exam, the more compelling you may feel. Even if you are lack of time, these 312-85 practice materials can speed up your pace of review. Our 312-85 guide questions are motivating materials especially suitable for those exam candidates who are eager to pass the exam with efficiency. And we can claim that with our 312-85 study braindumps for 20 to 30 hours, you will be bound to pass the exam.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q40-

Q45):

NEW QUESTION # 40
Kim, an analyst, is looking for an intelligence-sharing platform to gather and share threat information from a variety of sources. He wants to use this information to develop security policies to enhance the overall security posture of his organization.
Which of the following sharing platforms should be used by Kim?

- A. Cuckoo sandbox
- B. Blueliv threat exchange network
- C. PortDroid network analysis
- D. OmniPeek

Answer: B

Explanation:
The Blueliv Threat Exchange Network is a collaborative platform designed for sharing and receiving threat intelligence among security professionals and organizations. It provides real-time information on global threats, helping participants to enhance their security posture by leveraging shared intelligence. The platform facilitates the exchange of information related to cybersecurity threats, including indicators of compromise (IoCs), tactics, techniques, and procedures (TTPs) of threat actors, and other relevant data. This makes it an ideal choice for Kim, who is looking to gather and share threat information to develop security policies for his organization. In contrast, Cuckoo Sandbox is a malware analysis system, OmniPeek is a network analyzer, and PortDroid is a network analysis application, none of which are primarily designed for intelligence sharing.

"Building an Intelligence-Led Security Program," by Allan Liska

NEW QUESTION # 41
Cybersol Technologies initiated a cyber-threat intelligence program with a team of threat intelligence analysts.
During the process, the analysts started converting the raw data into useful information by applying various techniques, such as machine-based techniques, and statistical methods.
In which of the following phases of the threat intelligence lifecycle is the threat intelligence team currently working?

- A. Analysis and production
- B. Processing and exploitation
- C. Planning and direction
- D. Dissemination and integration

Answer: B

Explanation:
The phase where threat intelligence analysts convert raw data into useful information by applying various techniques, such as machine learning or statistical methods, is known as 'Processing and Exploitation'. During this phase, collected data is processed, standardized, and analyzed to extract relevant information. This is a critical step in the threat intelligence lifecycle, transforming raw data into a format that can be further analyzed and turned into actionable intelligence in the subsequent 'Analysis and Production' phase.References:
* "Intelligence Analysis for Problem Solvers" by John E. McLaughlin
* "The Cyber Intelligence Tradecraft Project: The State of Cyber Intelligence Practices in the United States (Unclassified Summary)" by the Carnegie Mellon University's Software Engineering Institute

NEW QUESTION # 42
Walter and Sons Company has faced major cyber attacks and lost confidential data. The company has decided to concentrate more on the security rather than other resources. Therefore, they hired Alice, a threat analyst, to perform data analysis. Alice was asked to perform qualitative data analysis to extract useful information from collected bulk data.
Which of the following techniques will help Alice to perform qualitative data analysis?

- A. Numerical calculations, statistical modeling, measurement, research, and so on.
- B. Brainstorming, interviewing, SWOT analysis, Delphi technique, and so on
- C. Finding links between data and discover threat-related information
- D. Regression analysis, variance analysis, and so on

Answer: B

Explanation:
For Alice to perform qualitative data analysis, techniques such as brainstorming, interviewing, SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis, and the Delphi technique are suitable. Unlike quantitative analysis, which involves numerical calculations and statistical modeling, qualitative analysis focuses on understanding patterns, themes, and narratives within the data. These techniques enable the analyst to explore the data's deeper meanings and insights, which are essential for strategic decision-making and developing a nuanced understanding of cybersecurity threats and vulnerabilities.

"The Delphi Method for Cybersecurity Risk Assessment," by Cybersecurity and Infrastructure Security Agency (CISA)

NEW QUESTION # 43
An analyst is conducting threat intelligence analysis in a client organization, and during the information gathering process, he gathered information from the publicly available sources and analyzed to obtain a rich useful form of intelligence. The information source that he used is primarily used for national security, law enforcement, and for collecting intelligence required for business or strategic decision making.
Which of the following sources of intelligence did the analyst use to collect information?

- A. OSINT
- B. OPSEC
- C. ISAC
- D. SIGINT

Answer: A

Explanation:
The analyst used Open Source Intelligence (OSINT) to gather information from publicly available sources.
OSINT involves collecting and analyzing information from publicly accessible sources to produce actionable intelligence. This can include media reports, public government data, professional and academic publications, and information available on the internet.
OSINT is widely used for national security, law enforcement, and business intelligence purposes, providing a rich source of information for making informed decisions and understanding the threat landscape.References:
* "Open Source Intelligence (OSINT) Tools and Techniques," by SANS Institute
* "The Role of OSINT in Cybersecurity and Threat Intelligence," by Recorded Future

NEW QUESTION # 44
Bob, a threat analyst, works in an organization named TechTop. He was asked to collect intelligence to fulfil the needs and requirements of the Red Tam present within the organization.
Which of the following are the needs of a RedTeam?

- A. Intelligence extracted latest attacks analysis on similar organizations, which includes details about latest threats and TTPs
- B. Intelligence on latest vulnerabilities, threat actors, and their tactics, techniques, and procedures (TTPs)
- C. Intelligence that reveals risks related to various strategic business decisions
- D. Intelligence related to increased attacks targeting a particular software or operating system vulnerability

Answer: B

Explanation:
Red Teams are tasked with emulating potential adversaries to test and improve the security posture of an organization. They require intelligence on the latest vulnerabilities, threat actors, and their TTPs to simulate realistic attack scenarios and identify potential weaknesses in the organization's defenses. This information helps Red Teams in crafting their attack strategies to be as realistic and relevant as possible, thereby providing valuable insights into how actual attackers might exploit the organization's systems. This need contrasts with the requirements of other teams or roles within an organization, such as strategic decision-makers, who might be more interested in intelligence relatedto strategic risks or Blue Teams, which focus on defending against and responding to attacks.References:
* Red Team Field Manual (RTFM)
* MITRE ATT&CK Framework for understanding threat actor TTPs

NEW QUESTION # 45
......

Only to find ways to success, do not make excuses for failure. To pass the ECCouncil 312-85 Exam, in fact, is not so difficult, the key is what method you use. Real4exams's ECCouncil 312-85 exam training materials is a good choice. It will help us to pass the exam successfully. This is the best shortcut to success. Everyone has the potential to succeed, the key is what kind of choice you have.

312-85 Exam Fee: https://www.real4exams.com/312-85_braindumps.html

Accompanied with acceptable prices for your reference, all our 312-85 exam quiz with three versions are compiled by professional experts in this area more than ten years long, We have made all efforts to update our products in order to help you deal with any change, making you confidently take part in the 312-85 exam, ECCouncil Reliable 312-85 Test Pass4sure On the other hand, you can print it on paper so you can take notes.
