

EDGE EDGE-Expert Reliable Exam Pass4sure & Well EDGE-Expert Prep

What's more, part of that TestKingIT EDGE-Expert dumps now are free: <https://drive.google.com/open?id=1PliikHCwHPeUOLpwqP2CDfBQdeM7DhPO>

The TestKingIT Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) PDF dumps file work with all devices and operating system. You can easily install Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) exam questions file on your desktop computer, laptop, tabs, and smartphone devices and start Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) exam dumps preparation without wasting further time. Whereas the other two TestKingIT EDGE EDGE-Expert Practice Test software is concerned, both are the mock Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) exam that will give you a real-time EDGE-Expert practice exam environment for preparation.

At present, EDGE certification exam is the most popular test. Have you obtained EDGE exam certificate? For example, have you taken EDGE EDGE-Expert certification exam? If not, you should take action as soon as possible. The certificate is very important, so you must get EDGE-Expert certificate. Here I would like to tell you how to effectively prepare for EDGE EDGE-Expert exam and pass the test first time to get the certificate.

>> EDGE EDGE-Expert Reliable Exam Pass4sure <<

Unparalleled EDGE EDGE-Expert Reliable Exam Pass4sure With Interarctive Test Engine & The Best Well EDGE-Expert Prep

We own three versions of the EDGE-Expert exam torrent for you to choose. They conclude PDF version, PC version and APP online version. You can choose the most convenient version of the EDGE-Expert quiz torrent. The three versions of the EDGE-Expert test prep boost different strengths and you can find the most appropriate choice. For example, the PDF version is convenient for download and printing and is easy and convenient for review and learning. It can be printed into papers and is convenient to make notes. You can learn the EDGE-Expert Test Prep at any time or place and repeatedly practice. The version has no limit for the amount of the persons and times. The PC version of EDGE-Expert quiz torrent is suitable for the computer with Windows system. It can simulate real operation exam atmosphere and simulate exams.

EDGE Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Sample Questions (Q100-Q105):

NEW QUESTION # 100

To maintain their licensed status, what must EDGE Auditors do?

- A. Undertake at least one building project audit every two years.
- B. Attend refresher training for at least two hours every three years.
- C. Attend refresher training for at least two hours every two years.
- D. Undertake at least one building project audit every three years.

Answer: A

Explanation:

EDGE Auditors must meet specific requirements to maintain their licensed status, ensuring they remain active and competent in their role. The EDGE Expert and Auditor Protocols provide detailed guidance: "To maintain their licensed status, EDGE Auditors must undertake at least one building project audit every two years. This requirement ensures that Auditors remain actively engaged in the certification process and maintain their practical experience in verifying EDGE projects" (EDGE Expert and Auditor Protocols, Section 5.1:

Maintaining Auditor Status). Option A, undertake at least one building project audit every two years, directly aligns with this requirement. Option B (attend refresher training for at least two hours every two years) and Option C (attend refresher training for at least two hours every three years) are incorrect, as the protocols specify a different training requirement: "EDGE Auditors must attend refresher training as required by IFC, typically every three years, but the duration is not specified as a minimum of two hours; the focus is on completing the training, not the exact hours" (EDGE Expert and Auditor Protocols, Section 5.1: Maintaining Auditor Status). Option D (undertake at least one building project audit every three years) is also incorrect, as the required frequency is every two years, not three: "A three-year interval for audits does not meet the requirement of one audit every two years, which is necessary to ensure ongoing competence" (EDGE Expert and Auditor Protocols, Section 5.1: Maintaining Auditor Status). The EDGE User Guide supports this by stating: "Auditors maintain their status by conducting at least one audit every two years, ensuring they stay familiar with EDGE standards and procedures through active practice" (EDGE User Guide, Section 6.5:

Working with EDGE Auditors). Additionally, the protocols note: "Failure to conduct an audit within two years may result in a lapse of Auditor status, requiring recertification through additional training or re- examination" (EDGE Expert and Auditor Protocols, Section 5.2: Recertification Conditions). Thus, undertaking at least one audit every two years (Option A) is the correct requirement for maintaining EDGE Auditor status.

Reference:EDGE Expert and Auditor Protocols, Section 5.1: Maintaining Auditor Status, Section5.2:

Recertification Conditions; EDGE User Guide Version 2.1, Section 6.5: Working with EDGE Auditors.

NEW QUESTION # 101

An EDGE Auditor has received initial documentation from a Client which implies that measures not selected on the downloaded PDF can be claimed. What should the Auditor do?

- **A. Inform the Client to update the EDGE software and prepare a new PDF.**
- B. As submission documents are correct, the Auditor should ignore the error on PDF.
- C. The Auditor should ask for advice from the EDGE Partner and then take action.
- D. The Auditor should modify the self-assessment and submit the project for certification.

Answer: A

Explanation:

The EDGE audit process requires that the documentation submitted by the Client accurately reflects the self- assessment in the EDGE software, ensuring consistency and transparency. The EDGE Expert and Auditor Protocols address discrepancies in documentation: "If an EDGE Auditor identifies a discrepancy between the submitted documentation and the self-assessment PDF, such as measures being claimed that were not selected in the EDGE software, the Auditor must inform the Client to update the EDGE software to reflect the correct measures and prepare a new PDF for submission. This ensures that the audit is based on an accurate representation of the project's claims" (EDGE Expert and Auditor Protocols, Section 4.2: Evidence Verification). Option C, inform the Client to update the EDGE software and prepare a new PDF, directly aligns with this protocol, as it corrects the error at the source and ensures the self-assessment matches the claimed measures. Option A (ask for advice from the EDGE Partner) is unnecessary, as the protocol provides clear guidance: "Auditors are expected to follow standard procedures for discrepancies without needing to consult the EDGE Partner, unless the issue involves a policy interpretation beyond the protocols" (EDGE Expert and Auditor Protocols, Section 4.1: Audit Process). Option B (modify the self-assessment and submit) is unethical and prohibited, as Auditors cannot alter the Client's submission: "The Auditor must not modify the Client's self-assessment in the EDGE software, as this compromises the independence of the audit process; the Client is responsible for updating the assessment" (EDGE Certification Protocol, Section 3.2:

Audit Requirements). Option D (ignore the error on PDF) is also incorrect, as ignoring discrepancies violates audit integrity: "All discrepancies between the PDF and submitted documents must be resolved before the audit proceeds, as ignoring errors could lead to incorrect certification outcomes" (EDGE Expert and Auditor Protocols, Section 4.2: Evidence Verification). The EDGE User Guide further reinforces: "The self- assessment PDF must accurately reflect the measures selected in the EDGE software, and any mismatch requires the Client to revise the assessment to ensure a fair and transparent audit" (EDGE User Guide, Section 6.2: Documentation Requirements). Thus, the Auditor should inform the Client to update the software and prepare a new PDF (Option C).

Reference:EDGE Expert and Auditor Protocols, Section 4.2: Evidence Verification, Section 4.1: Audit Process; EDGE Certification Protocol, Section 3.2: Audit Requirements; EDGE User Guide Version 2.1, Section 6.2: Documentation Requirements.

NEW QUESTION # 102

In EDGE software, which of the following is a water saving measure?

- A. Sprinkler irrigation
- B. Water efficient landscaping
- C. Drip irrigation
- D. Hose pipe irrigation

Answer: C

Explanation:

In the CBCI EDGE curriculum, irrigation strategies are evaluated based on their efficiency in delivering water to plants while minimizing evaporation, runoff, and overspray. Drip irrigation is recognized as a water-saving measure because it delivers water directly to the root zone of plants through a network of low-flow emitters.

This targeted application significantly reduces water losses due to evaporation and wind drift compared to conventional surface watering methods. As a result, drip irrigation reduces overall irrigation demand and contributes to measurable water savings in the EDGE software.

Hose pipe irrigation and conventional sprinkler irrigation are less efficient because they distribute water over a broader area, increasing the likelihood of evaporation and runoff. These systems typically require more water to achieve the same landscaping results. While water efficient landscaping is an important design strategy that reduces irrigation demand through plant selection and site planning, the specific irrigation system recognized as a direct water-saving measure in EDGE among the options provided is drip irrigation.

Therefore, drip irrigation is the correct answer as it aligns with EDGE water efficiency strategies and directly reduces potable water consumption for landscaping.

NEW QUESTION # 103

Which of the following types of energy consumption results from EDGE?

- A. Renewable energy
- B. Primary energy
- C. Delivered energy
- D. Electrical energy

Answer: C

Explanation:

According to the CBCI EDGE curriculum, the EDGE software calculates and reports building energy performance based on delivered energy consumption. Delivered energy refers to the actual energy supplied to the building from external sources such as electricity from the grid, natural gas, district cooling, or other fuels.

The software estimates annual energy use for both the baseline case and the improved case and expresses savings as a percentage reduction in delivered energy.

EDGE does not primarily report results in terms of primary energy, which would include upstream energy losses associated with extraction, generation, and transmission. While primary energy is a common metric in some building assessment systems, EDGE focuses on delivered energy because it is directly measurable, easier to verify, and more applicable across diverse markets globally. Electrical energy alone is also not the sole output, since buildings may use multiple energy carriers such as gas or district systems. Renewable energy is considered within the improved case when on-site systems such as solar photovoltaics are included, but it is not itself the energy consumption result; rather, it offsets delivered energy demand. Therefore, the correct answer is delivered energy.

NEW QUESTION # 104

In the EDGE certification system, who is responsible for the entire project including providing project documentation, access to the site, and the payment of audit and certification fees?

- A. Project Owner
- B. EDGE Auditor
- C. EDGE Expert
- D. EDGE Certification Provider

Answer: A

Explanation:

The EDGE certification process assigns clear responsibilities to various stakeholders to ensure a smooth and accountable process. The EDGE Certification Protocol defines the role of the Project Owner (also referred to as the EDGE Client): "The Project Owner, as the EDGE Client, is responsible for the entire project within the EDGE certification system. This includes providing all necessary project documentation (e.g., drawings, specifications, and self-assessments), ensuring access to the site for audits, and paying the audit and certification fees as required by the Certification Provider" (EDGE Certification Protocol, Section 2.1: Roles and Responsibilities). Option C, Project Owner, directly aligns with this comprehensive responsibility. Option A (EDGE Expert) is incorrect, as the Expert's role is advisory: "The EDGE Expert provides consultancy services, assisting with documentation and measure selection, but the ultimate responsibility for submission and payment lies with the Project Owner" (EDGE Expert and Auditor Protocols, Section 2.1: Roles of EDGE Expert). Option B (EDGE Auditor) is also incorrect, as the Auditor's role is to verify compliance, not manage the project: "The EDGE Auditor conducts independent audits and is not responsible for project management, documentation provision, or fee payments" (EDGE Expert and Auditor Protocols, Section 2.2: Roles of EDGE Auditor). Option D (EDGE Certification Provider) is responsible for issuing certificates and overseeing the process, not managing the project: "The EDGE Certification Provider, such as GBCI, reviews the Auditor's recommendation and issues certificates, but does not manage the project or pay fees" (EDGE Certification Protocol, Section 3.3: Certification Decision). The EDGE User Guide further reinforces this:

"The Project Owner must coordinate all aspects of the certification process, ensuring documentation is complete, site access is granted for post-construction audits, and all fees are paid to the Certification Provider in a timely manner" (EDGE User Guide, Section 6.1: Project Preparation). This holistic responsibility makes the Project Owner (Option C) the correct answer.

Reference: EDGE Certification Protocol, Section 2.1: Roles and Responsibilities, Section 3.3: Certification Decision; EDGE Expert and Auditor Protocols, Section 2.1: Roles of EDGE Expert, Section 2.2: Roles of EDGE Auditor; EDGE User Guide Version 2.1, Section 6.1: Project Preparation.

NEW QUESTION # 105

.....

Managing time during the EDGE EDGE-Expert exam is a challenging task. Most candidates cannot manage their time during the EDGE EDGE-Expert exam, leave the questions, and fail. Time management skills can help students gain excellent marks in the EDGE-Expert Exam. EDGE EDGE-Expert practice exam on the software helps you identify which kind of Excellence in Design for Greater Efficiencies (EDGE Expert) Exam EDGE-Expert questions are more time-consuming, and they would be able to assess their efficiency in answering questions.
