It tests the ability to create optimized configurations, action plans, and digital experiences that enhance service delivery.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>Public Sector Solutions Implementation Strategies and Best Practices: This domain measures the ability to implement Salesforce Public Sector Solutions using strategic approaches and industry best practices. Focus areas include PSS solutions, data sharing, security, scalability, and data quality. Demonstrating expertise in mapping business processes and designing robust solutions reflects the technical consultant aptitude for driving successful implementations in complex public sector environments.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>Public Sector Solutions - Product-Specific Systems Knowledge: Proficiency of public sector technical consultants in configuring systems for licenses, permits, inspections, grants management, employee experience, and emergency response will be tested. Understanding document processing, eSignature technologies, and reporting options is critical. Success in this area demonstrates expertise in delivering tailored solutions aligned with customer objectives and lifecycle requirements.</li> </ul>

## Public-Sector-Solutions Prüfungsressourcen: Salesforce Public Sector Solutions Accredited Professional (AP-222) Exam & Public-Sector-Solutions Reale Fragen

DeutschPrüfung hat ein professionelles IT-Team, das sich mit der Forschung der Fragen und Antworten zur Salesforce Public-Sector-Solutions Zertifizierungsprüfung beschäftigt und Ihnen sehr effektive Prüfungsunterlagen und Online-Dienste bietet. Wenn Sie DeutschPrüfung Produkte kaufen, wird DeutschPrüfung Ihnen mit den neulich aktualisierten, sehr detaillierten Schulungsunterlagen von bester Qualität und genaue Prüfungsfragen und Antworten zur Verfügung stellen. So können Sie sich ganz unbesorgt auf Ihre Salesforce Public-Sector-Solutions Zertifizierungsprüfung vorbereiten. Benutzen Sie ganz beruhigt unsere DeutschPrüfung Produkte. Sie können 100% die Public-Sector-Solutions Prüfung erfolgreich ablegen.

### Salesforce Public Sector Solutions Accredited Professional (AP-222) Exam Public-Sector-Solutions Prüfungsfragen mit Lösungen (Q55-Q60):

#### 55. Frage

A Technical Consultant at the Department of Disaster Assistance is designing a solution for the eSignature related use cases. As part of the research, the architect discovered that Public Sector Solutions provide DocuSign integration without custom coding Which of the three functionalities is readily available with this functionality?

- A. Send a contract document for review and signatures.
- B. Ability/Request to update the contents of the documents before signing by the reviewer
- C. Approval process to invalidate a contract document that is pending signatures if a new contract document supersedes it.
- D. Automatically invalidate a contract document that is pending signatures if a new contract document supersedes it.
- E. Track the signed contract document and update the contract record status.

Antwort: A,D,E

#### Begründung:

Sending a contract document for review and signatures, tracking the signed contract document and updating the contract record status, and automatically invalidating a contract document that is pending signatures if a new contract document supersedes it are three functionalities that are readily available with DocuSign integration. DocuSign is an eSignature solution that can be integrated with Public Sector Solutions without custom coding. It can help public sector agencies to send, sign, and manage contracts and agreements electronically. DocuSign integration can provide features such as sending a contract document for review and signatures to multiple recipients, tracking the signed contract document and updating the contract record status in Salesforce, and automatically invalidating a contract document that is pending signatures if a new contract document supersedes it using DocuSign PowerForms. #### 56. Frage

The City of Bobahaven is setting up Employee Experience Management and needs to ensure that sensitive HR data is protected. What configuration should the Technical Consultant perform to assist with meeting this requirement?

- A. Disable the Grant Access Using Hierarchies setting on the Case object
- B. Disable all approval processes on the Case object
- C. Set the Organization-Wide Defaults (OWD) for the Case object to private
- D. Mirror the Org Chart into The Role Hierarchy

Antwort: C

#### Begründung:

Setting the Organization-Wide Defaults (OWD) for the Case object to private is a configuration that can help to protect sensitive HR data in Employee Experience Management. Employee Experience Management is a prebuilt app that comes with Public Sector Solutions. It can help public sector agencies to manage employee programs and benefits, such as leave requests or wellness surveys. The Case object is a standard object that can be used to track employee requests or issues in Employee Experience Management. Setting the OWD for the Case object to private means that only the owner of the case and users above them in the role hierarchy can access the case record by default. This can prevent unauthorized access to sensitive HR data by other users. ### 57. Frage

A government- supported agency that helps constituents track the status of their claims is using Public Sector Solutions. For claim assessors to review and process claims, it is crucial to see the applications' Decision Explanation Logs. Which component can be added to see the history of Decision Explanations for a claim?

- **A. Decision Explainer Log History**
- B. Audit Log
- C. Log History
- D. Record History

**Antwort: A**

Begründung:

Decision Explainer Log History. This selection keeps the implementation declarative and within the intended Public Sector operating model.

The Core Concept Explained: Business Rules Engine externalizes decision logic from custom code.

Expression Sets orchestrate calculations and can call decision assets so policy thresholds remain maintainable by authorized business users.

Step-by-Step Technical Analysis: Identify the inputs that drive the decision, declare them as Expression Set resources, and use Decision Matrices or Decision Tables where business users must maintain rule thresholds.

Execute representative samples before activation, then confirm the output and Decision Explainer history match the expected eligibility, fee, or prioritization result. Add the Decision Explainer Log History component to the relevant Lightning record page.

Why the Incorrect Options Are Wrong: A may look related, but it does not place the logic in the correct declarative Public Sector or OmniStudio configuration layer. B may look related, but it does not place the logic in the correct declarative Public Sector or OmniStudio configuration layer. D may look related, but it does not place the logic in the correct declarative Public Sector or OmniStudio configuration layer.

### 58. Frage

A government agency is currently using Business Rules Engine (BRE). Part of the current Prioritization matrix includes household income and household size. To correctly calculate the Households Area Median Income (AMI) pool, the Expression Set needs to calculate the AMI and then evaluate the percentage against a predefined Federal Income Limit table to determine the prioritization pool. To accomplish this, the BRE designer should include how many decision matrices?

- A. 1; Only one to contain the prioritization pools with the Federal Income Limits.
- **B. 2; One to contain the percentages in each prioritization pool and the second to contain the Federal Income limits to evaluate.**
- C. 1; Only to contain the prioritization pools.
- D. 3; One to contain the percentages in each prioritization pool, a second to contain the household data, and the third to contain the Federal Income limits to evaluate.

**Antwort: B**

Begründung:

2; One to contain the percentages in each prioritization pool and the second to contain the Federal Income limits to evaluate. This maps the scenario to the Salesforce-native capability that owns the requirement.

The Core Concept Explained: Business Rules Engine externalizes decision logic from custom code.

Expression Sets orchestrate calculations and can call decision assets so policy thresholds remain maintainable by authorized business users.

Step-by-Step Technical Analysis: Identify the inputs that drive the decision, declare them as Expression Set resources, and use Decision Matrices or Decision Tables where business users must maintain rule thresholds.

Execute representative samples before activation, then confirm the output and Decision Explainer history match the expected eligibility, fee, or prioritization result. Use two decision matrices: one for the Federal Income Limits and one for the prioritization pool percentages.

Why the Incorrect Options Are Wrong: A is useful for functional validation, but it does not prove capacity under the expected production load. C may look related, but it does not place the logic in the correct declarative Public Sector or OmniStudio configuration layer. D may look related, but it does not place the logic in the correct declarative Public Sector or OmniStudio configuration layer.

### 59. Frage

Bobahaven wants to implement the Grants Management module of Public Sector Solutions. They would like to allow constituents to apply online for grants and check the progress of grant applications. The Chief Marketing Officer and Head of Constituent Services have expressed their concerns about the security of the solution. They want to ensure they comply with privacy regulations around the storage and use of constituent's data, and they are wondering how to protect against bots potentially spamming the application forms.

What should the Technical Consultant suggest to Bobahaven to protect the application forms?

- A. Enable the Salesforce Spam Check for Experience Sites.
- **B. Set the external organization-wide default sharing settings for grant applications objects to Private.**
- C. Deploy grant application OmniScripts on Bobahaven's Experience Site pages set to 'Requires Login.'
- D. Provide constituents with a search page on Bobahaven's website to look up application reference numbers and check the applications progress.
- **E. Implement spam checking for Bobahaven's Experience Site forms using CAPTCHA.**

**Antwort: B,E**

Begründung:

Implementing spam checking for Bobahaven's Experience Site forms using CAPTCHA can help prevent bots from submitting fake or malicious grant applications. CAPTCHA is a feature that requires users to prove that they are human by solving a simple challenge before submitting a form. Setting the external organization-wide default sharing settings for grant applications objects to Private can help protect the privacy of the constituents' data. This means that external users cannot see any grant applications by default, unless they are explicitly shared with them.
