2026 Interactive 220-1201 Testing Engine 100% Pass | The Best Study CompTIA A+ Certification Exam: Core 1 Materials Pass for sure

Many ambitious IT professionals want to make further improvements in the IT industry and be closer from the IT peak. They would choose this difficult CompTIA certification 220-1201 exam to get certification and gain recognition in IT area. CompTIA 220-1201 is very difficult and passing rate is relatively low. But enrolling in the CompTIA Certification 220-1201 Exam is a wise choice, because in today's competitive IT industry, we should constantly upgrade ourselves. However, you can choose many ways to help you pass the exam.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q74-Q79):

NEW QUESTION # 74

A customer needs to install a new printer in their network. The customer reports that users had intermittent connectivity issues with previous printers.

Which of the following should the technician configure on the new printer to prevent this issue?

- A. Gateway IP address
- **B. Static IP address**
- C. Public IP address
- D. DHCP IP address

Answer: B

Explanation:

Intermittent connectivity issues with network printers are commonly caused by changing IP addresses when using DHCP. Assigning a static IP address ensures that the printer is always reachable at the same IP address by client machines.

NEW QUESTION # 75

A technician is troubleshooting a recently installed printer that is leaving multiple lines and streaks on print jobs. Which of the following should the technician replace first?

- A. Drum
- **B. Toner**
- C. Rollers
- D. Fuser

Answer: B

Explanation:

Streaks and multiple lines on print jobs are commonly caused by an issue with the toner cartridge, such as a damaged or improperly installed cartridge. The technician should replace the toner first as it is the most likely and simplest component to check.

NEW QUESTION # 76

A company is installing a new shared printer for all employees. Some managers need to print sensitive HR material, and the company does not want to purchase separate printers. Which of the following should the company implement?

- A. Duplex settings
- B. Audit logging
- **C. Secure printing**
- D. Wired connectivity

Answer: C

Explanation:

Comprehensive and Detailed Explanation (100-150+ words):

Secure printing ensures that print jobs are not immediately output to the tray but instead held in a secure queue. The user must enter a PIN, password, or badge authentication directly at the printer to release the job.

CompTIA A+ emphasizes secure printing as the correct method for environments where sensitive information such as HR files, performance reviews, or confidential reports must not be viewed by unauthorized individuals.

Audit logging tracks usage but does not protect documents from being seen on the printer tray. Wired connectivity has no relation to security or confidentiality. Duplex is simply a printing mode.

Secure printing is widely used in corporate environments so shared devices can remain shared without compromising sensitive data. The A+ curriculum describes this as a security control that ensures confidentiality in shared-print environments, making Secure Printing the proper solution.

NEW QUESTION # 77

An end user's domain password expires while they are working from home. The end user tries to reset the password using Ctrl+Alt+Delete and then receives the following message:

Configuration information could not be read from the domain controller, either because the machine is unavailable or because access is denied.

Which of the following will resolve this issue?

- A. Restart the computer.
- **B. Connect to the VPN.**
- C. Join the Wi-Fi network.
- D. Reset the account in Active Directory.

Answer: B

Explanation:

To change a domain password from a remote location, the system must communicate with the domain controller. Since the user is

working from home, they need to connect to the corporate VPN to establish that secure connection. Without it, the password change cannot be authenticated.

Option A: Restarting will not resolve the lack of connection to the domain controller.

Option C: Resetting the password in AD could help, but doesn't let the user reset it themselves.

Option D: The user may already be on Wi-Fi; the issue is with connecting to the corporate network, not local.

CompTIA A+ Core 1 Exam Objective Reference:

Objective 1.6: Given a scenario, configure basic mobile device network connectivity and application support.

NEW QUESTION # 78

Which of the following is designed to be used in commercial spaces?

- A. Plenum cabling
- B. USB 3.1 Gen 2
- C. Straight tip fiber connector
- D. Cat 8

Answer: A

Explanation:

Plenum cabling is designed for use in commercial spaces where cables run through air ducts or plenum spaces, as it has fire-resistant properties and emits less toxic smoke.

Why Not A (USB 3.1 Gen 2): USB is for peripheral connections, not large-scale commercial installations.

Why Not B (Straight tip fiber connector): Fiber connectors are for high-speed connections but are not specifically for commercial spaces.

Why Not D (Cat 8): While Cat 8 is high-speed, it is not uniquely suited for commercial spaces like plenum cabling.

CompTIA A+ Exam Reference: Core 1 (220-1201), Section 3.1, cabling standards.

NEW QUESTION # 79

.....

Our 220-1201 exam prep is elaborately compiled and highly efficiently, it will cost you less time and energy, because we shouldn't waste our money on some useless things. The passing rate and the hit rate are also very high, there are thousands of candidates choose to trust our 220-1201 guide torrent and they have passed the exam. We provide with candidate so many guarantees that they can purchase our study materials no worries. So we hope you can have a good understanding of the 220-1201 Exam Torrent we provide, then you can pass your exam in your first attempt.
