

High-quality Most CloudSec-Pro Reliable Questions Covers the Entire Syllabus of CloudSec-Pro

The third and last format is the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) desktop practice test software that can be used on Windows laptops and PCs. Students with laptops or computers can access the software and prepare for it efficiently. The Palo Alto Networks Cloud Security Professional (CloudSec-Pro) dumps of TestSimulate have many premium features, one of which is practice exams (desktop and web-based).

Many clients may worry that their privacy information will be disclosed while purchasing our CloudSec-Pro quiz torrent. We promise to you that our system has set vigorous privacy information protection procedures and measures and we won't sell your privacy information. The CloudSec-Pro Quiz prep we sell boost high passing rate and hit rate so you needn't worry that you can't pass the exam too much. But if you fail in please don't worry we will refund you. Take it easy before you purchase our CloudSec-Pro quiz torrent.

Palo Alto Networks CloudSec-Pro Practice Test (Web-Based)

All contents are masterpieces from experts who imparted essence of the exam into our CloudSec-Pro practice materials. So our high quality and high efficiency CloudSec-Pro practice materials conciliate wide acceptance around the world. By incubating all useful content CloudSec-Pro practice materials get passing rate from former exam candidates of 98 which evince our accuracy rate and proficiency. If your problems are divulging during the review you can pick out the difficult one and focus on those parts.

Palo Alto Networks Cloud Security Professional Sample Questions (Q110-Q115):

NEW QUESTION # 110

What is the purpose of Incident Explorer in Prisma Cloud Compute under the "Monitor" section?

- **A. To correlate individual events to identify potential attacks and provide a sequence of process, file system, and network events for a comprehensive view of an incident**
- B. To identify and suppress all audit events generated by the defender
- C. To store large amounts of forensic data on the host where Console runs to enable a more rapid and effective response to incidents
- D. To sort through large amounts of audit data manually in order to identify developing attacks

Answer: A

Explanation:

The purpose of Incident Explorer in Prisma Cloud Compute under the "Monitor" section is to provide a comprehensive view of incidents by correlating individual events. This helps identify potential attacks through a sequence of processes, file system, and network events, thereby giving a complete picture of an incident's timeline and impact.

NEW QUESTION # 111

Match the correct scanning mode for each given operation.

(Select your answer from the pull-down list. Answers may be used more than once or not at all.)

Answer:

Explanation:

□ Explanation:

- * Create SNS Topic Triggers: No data security scan
- * Select an S3 bucket: Forward Scan only
- * Select an S3 bucket with existing files: Forward or Backward Scan
- * Link an S3 logging to CloudTrail: Backward Scan only

The scanning mode for Data Security in AWS typically depends on the configuration and the desired outcomes for monitoring and protecting data within S3 buckets.

Creating SNS Topic Triggers is a configuration step that does not directly involve scanning. It is part of setting up notifications for events in S3 buckets, but on its own, it does not initiate a data security scan.

Selecting an S3 bucket without specifying existing files typically implies that you intend to scan new objects as they are added to the bucket, which is known as a Forward Scan. This mode is proactive and scans files upon their arrival in the bucket.

When you select an S3 bucket with existing files, you can perform either Forward Scanning for new files or Backward Scanning to scan all existing files in the bucket. This option provides the most comprehensive scanning coverage for both new and existing data.

Linking an S3 logging to CloudTrail is usually a step taken to monitor access and changes to S3 resources. In the context of scanning, linking S3 to CloudTrail does not initiate a scan, but the CloudTrail logs can be used to trigger a Backward Scan if configured to do so, which scans historical files in the bucket based on CloudTrail events.

NEW QUESTION # 112

A customer wants to monitor the company's AWS accounts via Prisma Cloud, but only needs the resource configuration to be monitored for now.

Which two pieces of information do you need to onboard this account? (Choose two.)

- **A. Cloudtrail**
- B. External ID
- C. Subscription ID
- D. Active Directory ID
- **E. Role ARN**

Answer: A,E

Explanation:

To onboard an AWS account into Prisma Cloud for the purpose of monitoring resource configurations, the necessary information includes the Role ARN (Amazon Resource Name) and CloudTrail setup. The Role ARN (Option E) is crucial because Prisma Cloud requires permission to access and monitor resources within the AWS account, which is facilitated through an IAM role that

Prisma Cloud can assume. This IAM role must have the necessary permissions to access AWS services and resources that Prisma Cloud needs to monitor. CloudTrail (Option A) is essential for auditing and monitoring API calls within the AWS environment, including those related to resource configurations. It provides visibility into user and resource activity by recording API calls made on the account. CloudTrail logs are used by Prisma Cloud to detect changes in resource configurations and ensure compliance with security policies. Subscription ID (Option B) and Active Directory ID (Option C) are more relevant to Azure cloud environments, not AWS. External ID (Option D) is used in a cross-account role trust relationship to prevent the "confused deputy" problem, but it's not specifically required just to onboard the account for resource configuration monitoring.

NEW QUESTION # 113

Which Defender type performs registry scanning?

- A. Serverless
- B. RASP
- C. Container
- D. Host

Answer: C

Explanation:

In Prisma Cloud, the Defender type responsible for performing registry scanning is the Container Defender.

Registry scanning is crucial for ensuring that container images stored in registries are free from vulnerabilities and compliance issues before they are deployed. Container Defenders scan images within container registries, identifying security risks and ensuring that only secure container images are used in deployment, thereby maintaining the integrity and security of containerized applications.

NEW QUESTION # 114

Order the steps involved in onboarding an AWS Account for use with Data Security feature.

Answer:

Explanation:

□ Explanation:

- 1 - Create Stack
- 2 - Enter SNS Topic in Cloudtrail
- 3 - Create Cloudtrail with S3 as Storage
- 4 - Enter RoleARN and SNSARN

NEW QUESTION # 115

.....

Our CloudSec-Pro practice questions attract users from all over the world because they really have their own charm. No product like our CloudSec-Pro study guide will seriously consider the needs of users in all aspects. From product content to system settings, we will give you what you want! Firstly, you definitely want to pass the exam for sure. Our CloudSec-Pro Exam Questions are highly effective with a high pass rate as 98% to 100%. So don't hesitate, just come and buy our CloudSec-Pro learning braindumps!

Valid Dumps CloudSec-Pro Ppt: <https://www.testsimulate.com/CloudSec-Pro-study-materials.html>

Although you will take each CloudSec-Pro online test one at a time - each one builds upon the previous, Our PDF version of the CloudSec-Pro learning braindumps can print on papers and make notes, After purchasing our CloudSec-Pro practice materials, the free updates will be sent to your mailbox for one year long if our experts make any of our CloudSec-Pro guide materials, Our CloudSec-Pro study materials won't deviate from the pathway of the real exam and provide wrong and worthless study materials to the clients.

A formal approach will map applicable portions of regulations to control statements CloudSec-Pro explaining how the organization will comply, However, these are permanent solutions that can be tedious and time-consuming to get working.

Most CloudSec-Pro Reliable Questions - Free PDF Quiz 2026 First-grade Palo Alto Networks Valid Dumps CloudSec-Pro Ppt

Although you will take each CloudSec-Pro Online Test one at a time - each one builds upon the previous, Our PDF version of the CloudSec-Pro learning braindumps can print on papers and make notes.
