GARP SCR (Sustainability and Climate Risk) Exam is a globally recognized certification that focuses on the integration of environmental, social, and governance (ESG) factors into risk management and investment decision-making processes. SCR exam is offered by the Global Association of Risk Professionals (GARP) and aims to equip risk management professionals and investment managers with the knowledge and skills needed to address the challenges posed by climate change and other sustainability issues.

GARP Sustainability and Climate Risk Sample Questions (Q110-Q115):

NEW QUESTION # 110

Senior management at a global manufacturer of commercial flooring explores strategies to reduce capital costs and improve company valuation, resulting in a comprehensive sustainability strategy. Management determines all future flooring products will be carbon neutral across their full product life cycle. The risk team is tasked with updating the company ERM framework in accordance with COSO guidelines to include ESG and climate-related risks. The team reviews and updates each of the ERM components. What action should the team recommend the company take as part of the communication component of the ERM framework?

- A. Establish processes to convey climate and sustainability risk exposure.
- B. Assess the relative importance of various climate risk and sustainability risk drivers.
- C. Determine which transmission channel of climate risk drivers is most relevant for the company.
- D. Build climate risk into existing legal and compliance processes.

Answer: A

NEW QUESTION # 111

To improve sustainability, a railroad and transportation services company will revitalize its rail network by installing an operating system that reduces idle time. A reduction in idle time will decrease GHG emissions.

To finance this plan, the company will issue green bonds beginning in 2024. The company sustainability director develops sustainability objectives and eligibility criteria to communicate to investors.

The director is fulfilling which core component of the Green Bond Principles?

- A. Reporting
- **B. Process for project evaluation and selection**
- C. Use of proceeds
- D. Management of proceeds

Answer: B

NEW QUESTION # 112

In response to consumer demand for eco-friendly products, a global personal care company develops a net-zero transition plan.

The company sustainability team recommends an appropriate carbon accounting method for the plan. Which of the following country-level emission accounting methods is most likely recommended and why?

- A. Production-based accounting to measure GHG emissions regardless of location
- B. Consumption-based accounting to specifically measure emissions from supply chain imports
- C. Production-based accounting to highlight GHG emission reduction in operations
- **D. Consumption-based accounting to calculate the carbon footprint of the entire product life cycle**

Answer: D

NEW QUESTION # 113

In response to policy and technology changes, a cement manufacturer looks for new opportunities to raise profits by reducing GHG emissions. Because the cement industry accounts for a considerable percentage of global emissions, the manufacturer joins a coalition of company peers. The coalition lobbies country governments to adhere to the Paris Agreement nationally determined contributions (NDCs).

Which of the following actions does the coalition recommend?

- A. Revise NDC targets annually and submit to the UN for review and approval.
- B. Set 2019-2022 NDCs at a smaller scale to comply with the "ratchet" mechanism.
- C. Tighten NDCs and report NDC progress every 5 years at COP meetings.
- **D. Aligned the first round of NDCs with a 2°C warming limit, followed by a second round of a 1.5°C limit.**

Answer: D

NEW QUESTION # 114

A climate resilience consultant prepares an overview for a regional agency client. The overview summarizes climate policies that significantly reduce emissions. The client expresses a strong preference for a policy that limits emissions and offers flexibility in participant permits.

What policy should the consultant recommend to the client?

- A. Feed-in tariffs
- B. Carbon tax
- **C. Cap-and-trade scheme**
- D. Fuel efficiency standards

Answer: C

NEW QUESTION # 115
