## Practice Microsoft MB-335 Tests - Exam MB-335 Bible

The MB-335 Practice Exam software is specially made for the students so they can feel real-based examination scenarios and feel some pressure on their brains and don't feel excessive issues while giving the final Microsoft exam. There are a lot of customers that are currently using Itexamguide and are satisfied with it. Itexamguide has designed this product after getting positive feedback from professionals and is rated one of the best study materials for the preparation of the Microsoft MB-335 Exam.

## Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q143-Q148):

### NEW QUESTION # 143

Note. This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing. The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations

depending on the ingredient and vendor. IngredientA is the primary active ingredient in the lotion. IngredientB is used as a compensating ingredient. You need to ensure that the system is set up to support the manufacturing process.  
Solution: Configure the catch weight of IngredientA to allow for the variances of the concentrations received from the different vendors.  
Does the solution meet the goal?

- A. No
- B. Yes

**Answer: A**

#### NEW QUESTION # 144

You need to configure each item for plastic manufacturing.  
Which production types should you use? To answer, select the appropriate option in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

#### NEW QUESTION # 145

A manufacturer is implementing Dynamics 365 Supply Chain Management to create blends of oil and industrial lubricant. The manufacturer requires detailed documentation for the production order process before manufacturing begins for the products. The shop floor must review, approve, and anticipate all production runs. Before production starts, the manufacturer wants to ensure that the order can be completed by a certain timeframe based on capacity.  
You need to define the production life cycle stages.  
Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

To define the production life cycle stages, you should perform the following actions in sequence:

- \* Create a production order. A production order is a document that authorizes the production of a specific product or product variant in a given quantity on a specific date<sup>1</sup>. You can create a production order manually, from a sales order line, or from master planning execution<sup>2</sup>.
  - \* Estimate the order. Estimating a production order calculates the material and capacity requirements for the order based on the bill of materials (BOM) and the route<sup>3</sup>. You can also estimate the cost and revenue of the order based on the planned consumption and output.
  - \* Schedule production jobs. Scheduling production jobs determines the start and end dates and times for each operation in the route based on the available capacity, efficiency, and calendar of the resources. You can use either operations scheduling or job scheduling methods to schedule production jobs.
  - \* Release the order. Releasing a production order makes it available for picking, production, and reporting activities. You can release an order manually or automatically based on a release rule that specifies criteria such as site, warehouse, status, priority, or start date.
  - \* Generate a picking list. A picking list is a document that lists the materials that must be picked from inventory and consumed for production. You can generate a picking list for an entire production order or for selected jobs or operations within an order.
- 1: Production process overview 2: Production order lifecycle overview 3: Estimate a production order :  
[Estimate cost and revenue for a production order] : [Schedule production jobs] : [Scheduling methods] :  
[Release a production order] : [Release rules] : [Picking list overview] : [Generate picking lists]

#### NEW QUESTION # 146

A discrete manufacturer uses the time and attendance registration for production operations.  
All employees register daily clock in and clock out times during a 40-hour, Monday through Friday workweek.

Pay periods are every two weeks. Workers are paid hourly.

The production manager will create work schedules with the following windows:

- \* Mandatory work hours
- \* Work hours during which employees can leave early without accruing absences
- \* Work hours during which employees can work extra time

If a junior production worker works over 90 hours in a pay period, the worker will receive time and a half over 80 hours. If a senior production worker works over 90 hours in a pay period, the worker will receive double time over 80 hours.

You need to configure the system for these requirements.

Where should you configure this functionality? To answer, drag the appropriate forms to the correct requirements. Each form may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

To configure the system for these requirements, you should use the following forms:

- \* Configure the overtime calculations: You should use the Workers form. This form allows you to set up and maintain information about workers, such as their personal details, employment status, and compensation<sup>1</sup>. You can also specify the overtime rate for each worker on the Time and attendance tab<sup>2</sup>. For example, you can set the overtime rate to 1.5 for junior production workers and 2 for senior production workers.
- \* Configure the periods of time that a worker can choose whether to work: You should use the Flex groups form. This form allows you to set up and maintain flex groups, which are groups of workers who have flexible work hours<sup>3</sup>. You can also define flex profiles for each flex group, which specify the mandatory work hours, the flex time hours, and the extra time hours for each day of the week<sup>3</sup>. For example, you can create a flex profile that has mandatory work hours from 8:00 AM to 4:00 PM, flex time hours from 4:00 PM to 6:00 PM, and extra time hours from 6:00 PM to 8:00 PM.

1: Workers 2: Set up overtime rates 3: Flex groups : [Flex profiles]

#### NEW QUESTION # 147

You need to configure the system to meet the order requirements for unscented cleaning solution. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- **A. On the inventory management parameters, set the value for the Print Product Safety Data Sheet and Prevent Sales Pack Slip/Invoke Posting to TRUE**
- **B. Configure the ingredient as a restricted and regulated product.**
- C. In Document Handling, associate the PSDS file with the PSDS record and set restriction field set to Internal
- **D. Add the ingredients for unscented cleaning solution to a regulated products inclusion list**
- E. Ensure that the PSDS file is active and within the expiration date requirements.

**Answer: A,B,D**

#### NEW QUESTION # 148

.....

Did you often feel helpless and confused during the preparation of the MB-335 exam? Do you want to find an expert to help but feel bad about the expensive tutoring costs? Don't worry. Our MB-335 exam questions can help you to solve all the problems. Our MB-335 Study Material always regards helping students to pass the exam as its own mission. And we have successfully helped numerous of the candidates pass their exams.
