Remember to fill in the correct mail address in order that it is easier for us to send our JN0-481 study guide to you, therefore, this personal message is particularly important. We are selling virtual products, and the order of our JN0-481 exam materials will be immediately automatically sent to each purchaser's mailbox according to our system. In the future, if the system updates, we will still automatically send the latest version of our JN0-481 learning questions to the buyer's mailbox.

As long as you insist on using our JN0-481 learning prep, you can get the most gold certificate in the shortest possible time! Want to see how great your life will change after that! You can make more good friends and you can really live your fantasy life. Don't hesitate, the future is really beautiful! If you are still not sure if our product is useful, you can free download the free demos of our JN0-481 practice quiz. It is easy and fast.

Your Ultimate Resource Actual of Juniper JN0-481 Questions

Based on the research results of the examination questions over the years, the experts give more detailed explanations of the contents of the frequently examined contents and difficult-to-understand contents, and made appropriate simplifications for infrequently examined contents. JN0-481 test questions make it possible for students to focus on the important content which greatly shortens the students' learning time. With JN0-481 Exam Torrent, you will no longer learn blindly but in a targeted way. JN0-481 exam torrent will also help you count the type of the wrong question, so that you will be more targeted in the later exercises and help you achieve a real improvement. JN0-481 exam guide will be the most professional and dedicated tutor you have ever met, you can download and use it with complete confidence.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q12-Q17):

NEW QUESTION # 12

What are two types of policies that Juniper Apstra uses to push to switches using Security Policies? (Choose two.)

- A. firewall filters
- B. access control lists (ChooseACLs)
- C. policy-based routing (ChoosePBR)
- D. filter-based forwarding (ChooseFBF)

Answer: A,B

Explanation:

Firewall filters are one of the policy types that Juniper Apstra pushes to switches to enforce security rules.

Access control lists (ACLs) are also used by Apstra security policies to control traffic flows at the switch level.

NEW QUESTION # 13

You have a virtual network that needs controlled access to other virtual networks in the same routing zone. Using the Juniper Apstra UI, which feature would be used to accomplish this task?

- A. security policy
- B. routing policy
- C. anti-affinity policy
- D. interface policy

Answer: A

Explanation:

A security policy is the feature that would be used to accomplish the task of controlling access to other virtual networks in the same routing zone using the Juniper Apstra UI. A security policy allows you to define rules that specify which traffic is allowed or denied between different virtual networks, IP endpoints, or routing zones. A security policy can be applied to one or more virtual networks in the same routing zone, and it can use various criteria to match the traffic, such as source and destination IP addresses, protocols, ports, or tags. A security policy can also support DHCP relay, which enables the forwarding of DHCP requests from one virtual network to another. The other options are incorrect because:

A . interface policy is wrong because an interface policy is a feature that allows you to configure the interface parameters for the devices in a blueprint, such as interface names, speeds, types, or descriptions. An interface policy does not affect the access control between different virtual networks in the same routing zone.

B . anti-affinity policy is wrong because an anti-affinity policy is a feature that allows you to prevent certain devices or logical devices from being placed in the same rack or leaf pair in a blueprint. An anti-affinity policy is used to enhance the availability and redundancy of the network, not to control the access between different virtual networks in the same routing zone.

C . routing policy is wrong because a routing policy is a feature that allows you to configure the routing parameters for the devices in a blueprint, such as routing protocols, autonomous system numbers, route filters, or route maps. A routing policy does not affect the access control between different virtual networks in the same routing zone, unless the routing policy is used to filter or modify the routes exchanged between different routing zones. Reference:

Security Policy

Interface Policy

Anti-Affinity Policy

Routing Policy

NEW QUESTION # 14

Which three statements describe intent-based analytics? (Choose three.)

- A. It is a real-time information processing pipeline.
- B. It is used to establish network performance baselines.
- C. It indicates when device operating versions require updating.
- D. It collects information from vendor websites.
- E. It alerts the network operator when network performance moves away from the baseline.

Answer: A,B,E

Explanation:

Intent-based analytics (IBA) is a feature of Juniper Apstra that allows you to combine intent from the network design with current and historic data from devices to reason about the network at- large.

IBA has the following characteristics:

It is a real-time information processing pipeline. This means that IBA can ingest, process, and analyze large amounts of data from devices in real time, using agents and probes.

Agents are software components that collect data from devices and send them to the Apstra server.

Probes are user-defined queries that aggregate data across devices and generate advanced data that can be more easily reasoned about.

It is used to establish network performance baselines. This means that IBA can use the advanced data to measure and monitor the network performance against the expected outcomes and service levels.

IBA can also use the historic data to create baselines that represent the normal behavior and state of the network.

It alerts the network operator when network performance moves away from the baseline. This means that IBA can detect and

report any anomalies or deviations from the baseline or the intent in the network.
IBA can also provide insights and recommendations for troubleshooting and resolving the issues.

NEW QUESTION # 15

In Juniper Apstra, which statement about resources is correct?

- A. The scope of a pool can be defined as global or blueprint specific.
- B. The scope of a pool is limited to a single blueprint.
- C. User-defined resources are supported.
- D. Only the default resources are supported globally.

Answer: A

Explanation:

In Juniper Apstra, resource pools (such as IP pools, VLAN pools, and ASN pools) can have their scope defined as either global (available to all blueprints) or blueprint-specific (available only within a single blueprint). This flexibility allows for centralized resource management or isolated per-blueprint allocations.

NEW QUESTION # 16

You have an EVPN-VXLAN data center IP fabric, with all single-homed hosts/servers.

Which two EVPN route types are present in this scenario? (Choose two.)

- A. Type 3
- B. Type 7
- C. Type 4
- D. Type 2

Answer: A,D

Explanation:

In an EVPN-VXLAN data center fabric with all single-homed hosts, the following EVPN route types are present:

- Type 3 (Inclusive Multicast Ethernet Tag):

Used for building multicast trees to support BUM (Broadcast, Unknown unicast, and Multicast) traffic in the VXLAN fabric.

- Type 2 (MAC/IP Advertisement):

Used to advertise MAC and optional IP addresses associated with end hosts (such as servers), which is necessary for host reachability in the EVPN fabric.

NEW QUESTION # 17

.....

These Juniper JN0-481 exam practice questions will greatly help you to prepare well for the final JN0-481 certification exam.

Juniper JN0-481 exam preparation and boost your confidence to pass the JN0-481 Exam. All Juniper JN0-481 exam practice test questions contain the real and updated Juniper JN0-481 exam practice test questions.

JN0-481 Cert: https://www.itbraindumps.com/JN0-481_exam.html

Have Trouble Finding Your Exam On Itbraindumps JN0-481 Cert, Generally speaking, these JN0-481 Cert - Data Center, Specialist (JNCIS-DC) free pdf study covers an all-round scale, which makes it available to all of you who use it whether you are officer workers or students, Juniper Exam JN0-481 Outline Convenience for reading and making notes, Besides, our JN0-481 latest study vce is compiled according to the original exam questions and will give you the best valid study experience.

You must check if the authentication type and keys are the same on both the Exam JN0-481 Outline neighbouring router interfaces, Ryan wants to keep all his documentation in order, and is currently doing duration estimating for his project.

Quiz Juniper - The Best Exam JN0-481 Outline

Have Trouble Finding Your Exam On Itbraindumps, Generally speaking, these Data Center, Specialist (JNCIS-DC) JN0-481 free pdf study covers an all-round scale, which makes it available to all of you who use it whether you are officer workers or students.

Convenience for reading and making notes, Besides, our JN0-481 latest study vce is compiled according to the original exam questions and will give you the best valid study experience.

We will never carry out the JN0-481 real exam dumps that are under researching.
