## C\_S4PM2\_2507 Exam Registration - Pass Guaranteed Quiz 2026 SAP C\_S4PM2\_2507 First-grade Materials

With our SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects (C\_S4PM2\_2507) study material, you'll be able to make the most of your time to ace the test. Despite what other courses might tell you, let us prove that studying with us is the best choice for passing your SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects (C\_S4PM2\_2507) certification exam! If you want to increase your chances of success and pass your C\_S4PM2\_2507 exam, start learning with us right away!

## SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Which of the following are prerequisites for using the "RISE with SAP system transition workbench"? Note: There are 2 correct answers to this question.

- A. A migration server has been provisioned.
- B. All custom ABAP code have been removed from the system.
- C. The user received permission to access the operating system of the target system.
- D. The SAP Host Agent has been correctly configured.

Answer: A,D

Explanation:

Step 1 - Understanding the question

This question relates to the RISE with SAP System Transition Workbench, a tool designed to support system conversions and migration to SAP S/4HANA Cloud, Private Edition.

It helps automate and monitor the transition process, providing visibility and control during system migration.

Step 2 - Evaluate each option

Option A: A migration server has been provisioned.

This is correct.

Before using the System Transition Workbench, a migration server must be provisioned to serve as the technical environment where migration and transition activities are executed.

This server handles data transfer, configuration, and monitoring tasks during the transition.

Option B: The user received permission to access the operating system of the target system.

This is incorrect.

RISE with SAP environments are managed cloud environments, and users (including consultants) do not receive operating system-level access.

All activities are performed using SAP-provided tools and interfaces, not through direct OS access.

Option C: The SAP Host Agent has been correctly configured.

This is correct.

The SAP Host Agent is required for the System Transition Workbench to communicate with the systems involved in the migration.

It must be properly configured to enable the workbench to read system information, manage services, and perform health checks.

Option D: All custom ABAP code has been removed from the system.

This is incorrect.

Custom ABAP code is not required to be removed before using the workbench. Instead, it should be analyzed and remediated using the Custom Code Migration app or ABAP Test Cockpit (ATC), but its existence does not block the use of the workbench.

#### NEW QUESTION # 42

In the SAP Activate run phase the new system is monitored, maintained, and optimized to ensure it runs smoothly and efficiently.

Which change management activity can only be realized in the run phase of the cloud implementation?

- A. Development of the user adoption strategy
- B. Measurement of actual user adoption metrics
- C. Conduction of a pulse check
- D. Mapping of SAP roles to employees

**Answer: B**

#### NEW QUESTION # 43

Which of the following components are involved in an SAP S/4HANA Cloud Private Edition migration project? Note: There are 2 correct answers to this question.

- A. Cloud-based storage
- B. Migration server
- C. HANA System Replication ( HSR) server
- D. Sandbox system

**Answer: A,B**

#### NEW QUESTION # 44

What findings do you document in the Explore Phase Fit-to-standard workshops? Note: There are 3 correct answers to this question.

- A. Key user documentation
- B. Detailed design of extensions
- C. Confirmation of scope
- D. Key business decisions
- E. Process models

**Answer: C,D,E**

### NEW QUESTION # 45

What are the key components of RISE with SAP Methodology? Note: There are 3 correct answers to this question.

- A. Follow a standardized framework
- B. Explore Business AI scenarios
- C. Leverage the integrated toolchain
- D. Provide solution activations
- E. Access to expert guidance

**Answer: A,C,E**

Explanation:

Step 1 - Understanding the Question

The question refers to the key components of the RISE with SAP Methodology- the structured approach SAP uses to guide customers through their digital transformation journey from SAP ECC or legacy systems to SAP S/4HANA Cloud, Private Edition. This methodology ensures a standardized, guided, and value-focused transformation process supported by tools, expertise, and best practices.

Step 2 - Evaluate Each Option

A). Explore Business AI scenarios

\* Business AI capabilities are part of SAP's innovation portfolio, but they are not defined as core components of the RISE with SAP Methodology itself.

\* The methodology focuses on transformation framework and execution, not specific technologies like AI.

Result: Incorrect.

B). Follow a standardized framework

\* RISE with SAP is built around SAP Activate, a standardized implementation framework with defined phases (Discover, Prepare, Explore, Realize, Deploy, Run).

\* It ensures consistent project execution, governance, and delivery quality across transformation projects.

Result: Correct - A standardized framework is a foundation of RISE with SAP Methodology.

C). Access to expert guidance

\* RISE with SAP includes access to SAP experts, advisory services, and best practices through the Customer Success Partner and SAP Value Assurance teams.

\* This ensures expert-led support throughout the migration and transformation journey.

Result: Correct - Expert guidance is a formal component of the methodology.

D). Provide solution activations

\* Solution activation activities belong to the SAP Activate methodology phases, not directly to RISE with SAP's high-level transformation methodology components.

Result: Incorrect.

E). Leverage the integrated toolchain

\* RISE with SAP provides access to an integrated toolchain that includes:

\* SAP Signavio Process Insights- for process discovery and optimization.

\* SAP LeanIX- for enterprise architecture and application portfolio management.

\* SAP Cloud ALM- for implementation and operations management.

\* This toolchain supports continuous improvement and smooth transition to S/4HANA.

Result: Correct - The integrated toolchain is a core pillar of RISE with SAP Methodology.

### NEW QUESTION # 46

.....

Are you worried about your poor life now and again? Are you desired to gain a decent job in the near future? Do you dream of a better life? Do you want to own better treatment in the field? If your answer is yes, please prepare for the C\_S4PM2\_2507 Exam.
