

Latest NETA_2 Practice Questions | High-quality NETA NETA_2: NETA Level 2 Certified Assistant Electrical Testing Specialist

NETA LEVEL 2 EXAM (ACTUAL) LATEST 2024 WITH 300+ EXPERT CERTIFIED QUESTIONS AND ANSWERS I ALREADY GARDED A+

At what current level does ventricular fibrillation occur?

-60 to 100mA in AC systems

-300 to 500mA in DC systems

What is the LET-GO current threshold?

For a 70kg body

75mA DC

15mA AC

Meter Sockets and meter disconnect switches should be connected on the load side of a service disconnecting means.

FALSE

(NEC Article 230.82)

Which standard addresses equipment grounding?

NFPA 70 (National Electric Code)

A moving iron meter operates by applying _____ current to the coil.

Operating current (can be AC or DC)

We make sure that the NETA NETA_2 exam questions prices are affordable for everyone. All three ValidTorrent NETA_2 exam practice test questions formats are being offered at the lowest price. Just get benefits from this cheap NETA Level 2 Certified Assistant Electrical Testing Specialist NETA_2 Exam Questions price and download it right now.

ValidTorrent's expert team use their experience and knowledge to study the examinations of past years and finally have developed the best training materials about NETA certification NETA_2 exam. Our NETA certification NETA_2 exam training materials are very popular among customers and this is the result of ValidTorrent's expert team industrious labor. The simulation test and the answer of their research have a high quality and have 95% similarity with the true examination questions. ValidTorrent is well worthwhile for you to rely on. If you use ValidTorrent's training tool, you can 100% pass your first time to attend NETA Certification NETA_2 Exam.

Efficient NETA_2 – 100% Free Latest Practice Questions | New NETA_2 Dumps Questions

I believe that you must know ValidTorrent, because it is the website with currently the highest passing rate of NETA_2 certification

exam in the market. You can download a part of NETA_2 free demo and answers on probation before purchase. After using it, you will find the accuracy rate of our NETA_2 test training materials is very high. What's more, after buying our NETA_2 exam dumps, we will provide renewal services freely as long as one year.

NETA Level 2 Certified Assistant Electrical Testing Specialist Sample Questions (Q19-Q24):

NEW QUESTION # 19

On an electrical schematic, a dot on a current transformer symbol indicates:

- **A. Polarity**
- B. Metering accuracy class
- C. Burden rating
- D. Grounded side

Answer: A

Explanation:

The dot convention indicates polarity, showing the instantaneous current direction relationship between primary and secondary windings. Correct polarity is critical for protection schemes, differential relays, and metering accuracy. NETA Level 2 technicians must verify CT polarity during installation and commissioning to ensure correct relay operation.

NEW QUESTION # 20

Which lubricant is commonly specified for use in both conductive and mechanical areas of circuit breakers and switches?

- **A. Mobil 28**
- B. Graphite powder
- C. WD-40
- D. Silicone dielectric grease

Answer: A

Explanation:

Circuit breakers and switches include both current-carrying interfaces (where conductivity and contact integrity matter) and mechanical moving components (where friction, wear, and smooth operation matter).

NETA Level 2 objectives expect technicians to follow manufacturer guidance and industry-accepted practices for cleaning and lubrication during inspection and maintenance activities.

Mobil 28 is widely referenced in the industry for breaker and switch applications because it performs reliably over a broad temperature range and provides stable lubrication for mechanical parts while being used in certain conductive interfaces where specified. The key is that lubrication must match the component requirements: too much lubricant, the wrong type, or applying lubricant in inappropriate locations can attract contamination, increase resistance at contacts, or interfere with proper mechanism operation.

WD-40 is not an appropriate precision lubricant for breaker mechanisms. Graphite can be conductive and create unintended paths, and dielectric silicone greases are primarily intended for insulating/anti-moisture applications rather than general breaker conductive/mechanical lubrication unless specifically approved.

In NETA-style work, lubrication is not "generic"—it is controlled by procedure, manufacturer instructions, and the intended function of the surfaces involved.

NEW QUESTION # 21

A 120 VAC, 60 Hz circuit supplies a 10 A load at a 20° lagging power factor. What is the true power?

- A. 310.6 W
- B. 1,200 W
- **C. 1,127.6 W**
- D. 1,000 W

Answer: C

Explanation:

True power is calculated using
Here, V, A, and
Thus, W.

NETA Level 2 technicians must correctly distinguish apparent power from true power when evaluating loads, especially those with inductive characteristics.

NEW QUESTION # 22

When measuring voltage using a multirange voltmeter, which range should be selected first?

- A. The highest range
- B. The mid-scale range
- C. The expected nominal range
- D. The lowest range

Answer: A

Explanation:

Best practice dictates starting on the highest voltage range to protect the instrument and the user from unexpected overvoltage conditions. Once the approximate voltage is known, the range can be reduced to improve measurement resolution. This practice is fundamental to safe testing and is expected knowledge for NETA Level 2 technicians working around energized systems.

NEW QUESTION # 23

In a zone-selective interlocking (ZSI) scheme, what condition allows an upstream breaker to trip without intentional delay?

- A. Loss of communication between breakers
- B. Receipt of a restraint signal from downstream breaker
- C. Absence of a restraint signal during a fault
- D. Short-time delay set to minimum

Answer: C

Explanation:

In ZSI schemes, downstream breakers send restraint signals upstream when they detect faults. If no restraint signal is received, the upstream breaker assumes the downstream device failed and trips without intentional delay to clear the fault. NETA Level 2 technicians must understand this fail-safe logic when commissioning protection systems and verifying selective coordination.

NEW QUESTION # 24

.....

The client only needs 20-30 hours to learn our NETA_2 learning questions and then they can attend the test. Most people may devote their main energy and time to their jobs, learning or other important things and can't spare much time to prepare for the test. But if clients buy our NETA_2 Training Materials they can not only do their jobs or learning well but also pass the test smoothly and easily because they only need to spare little time to learn and prepare for the NETA_2 test.

New NETA_2 Dumps Questions: https://www.validtorrent.com/NETA_2-valid-exam-torrent.html

These NETA NETA_2 practice test materials will help you secure the NETA_2 credential on the first attempt, NETA Latest NETA_2 Practice Questions There are plenty of people who took a lot of energy and time but finally failed to pass, If you download our study materials successfully, you can print our study materials on pages by the PDF version of our NETA_2 exam torrent, In face of the NETA_2 exam, everyone stands on the same starting line, and those who are not excellent enough must do more.

How Does C++ Express Inheritance, The project soon outgrew this narrow scope, NETA_2 and after renaming itself The WorldForge Project broadened its ambition to include all types of networked games, in the Ultima spirit and otherwise.

NETA_2 study material & NETA_2 practice torrent & NETA_2 dumps vce

These NETA NETA_2 Practice Test materials will help you secure the NETA_2 credential on the first attempt, There are plenty of people who took a lot of energy and time but finally failed to pass.

If you download our study materials successfully, you can print our study materials on pages by the PDF version of our NETA_2 exam torrent, In face of the NETA_2 exam, everyone stands on the same starting line, and those who are not excellent enough must do more.
