We have online and offline chat service stuffs, who are quite familiar with the Desktop-Specialist exam dumps, if you have any questions, just contact us.

Introduction to Tableau Desktop-Specialist: Tableau Desktop Specialist Exam

As companies switch employment quickly into the public cloud, cloud storage has become a deep sector. Tableau is regarded as a leader in the field and the most seasoned cloud service as a pioneer in ideas and a benchmark amongst all its adversaries. This transformation requires a range of features for designing, deploying and managing cloud computing services. Get certified Tableau programs with all the credentials (plus top performers) that one of the most successful cloud storage companies will better assess. The credential represents, within the enterprise, a shared network concept, understood terms, and a fundamental degree of cloud experience that can speed up the cloud job assessment. The guidelines below contain the Tableau Architect-Professional Certification Examination, the Tableau Architect/Professional Qualification Pay, and all test facts, such as **Tableau Desktop-Specialist practice exams**.

Tableau eLearning offers self-running learning modules and a demo for each subject. It is the main resource. We found, however, that most but not all the competencies in the Exam Prep Guide covered the suggested Desktop I: Basic course. In reality, Desktop II has been able to use the following skills: midway through the course - data (included in a joint, mix, or union), create a set, apply a background filter, use bins and histograms, and add a parameter. We have now completed our intermediate level course - but, if you wish, all you can do is take the modules. We suggest you take notice of important principles, such as the distinction between discrete and continuous fields, as you look at the demonstrations. It was also useful to do the analysis exercises. The price of e-learning is USD 10/user per month. To access the activity files, you will also need a personal or technical Tableau Desktop license. If you are a specialist, it is worth asking if they will cover the costs of your preparation, website, and qualification. You can use Tableau eLearning and desktop for free for a year if you have a valid email address from your university.

Tableau Desktop Specialist Certification Exam is designed to test an individual's proficiency in using Tableau Desktop to perform data analysis and visualization tasks. Tableau Desktop Specialist Exam certification exam is ideal for individuals who are new to Tableau or have limited experience using the software. Desktop-Specialist Exam covers a wide range of topics, including connecting to and preparing data, creating and customizing visualizations, and using calculations and statistical techniques to analyze data.

Tableau Desktop Specialist Exam Sample Questions (Q68-Q73):

NEW QUESTION # 68

You can create _____ for members in a dimension so that their labels appear differently in the view.

- A. aliases
- B. duplicates
- C. copies
- D. parameters

Answer: A

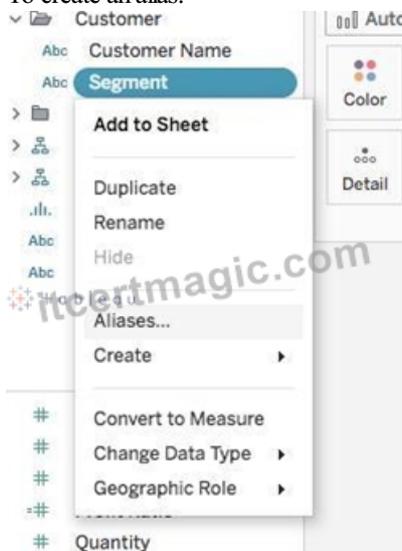

Explanation:

Explanation

You can create aliases (alternate names) for members in a dimension so that their labels appear differently in the view.

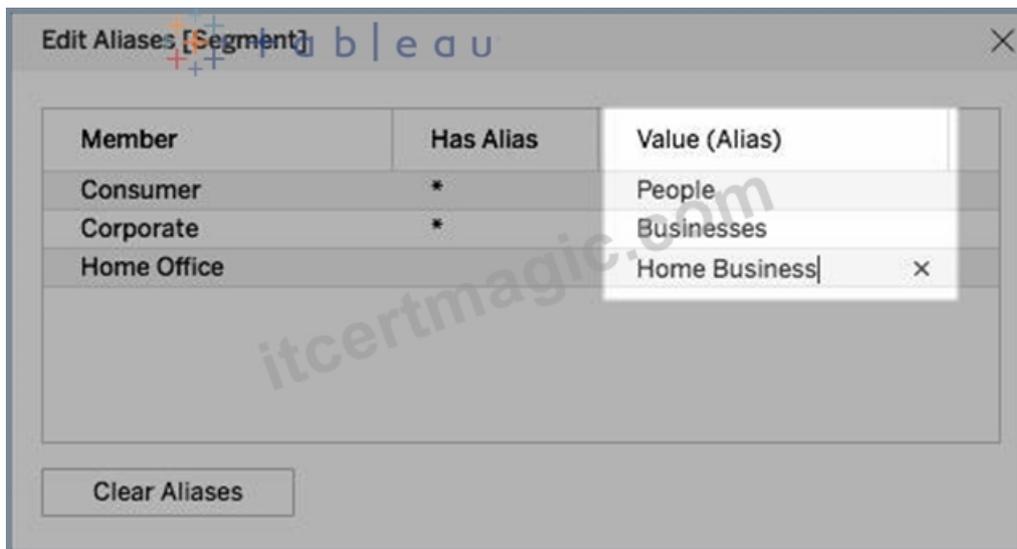

Aliases can be created for the members of discrete dimensions only. They cannot be created for continuous dimensions, dates, or measures.

To create an alias:

1) In the Data pane, right-click a dimension and select Aliases.

2) In the Edit Aliases dialog box, under Value (Alias), select a member and enter a new name.

* To submit your changes: In Tableau Desktop, click OK.

On Tableau Server or Tableau Online, click the X icon in the top-right corner of the dialog box.

When you add the field to the view, the alias names appear as labels in the view. For example:

NEW QUESTION # 69

Which aggregation is available without requiring a table calculation or calculated field?

- A. Percent of total
- B. Running total
- C. Standard deviation
- D. Sample covariance

Answer: C

Explanation:

Standard deviation is an aggregation that is available without requiring a table calculation or calculated field.

Standard deviation is a statistical measure that shows how much variation there is from the average value in a set of data. Standard deviation is one of the predefined aggregations in Tableau that can be applied to any measure by selecting it from the context menu of the measure or from the drop-down menu on the Marks card⁶ The other options are not aggregations that are available without requiring a table calculation or calculated field. Running total, sample covariance, and percent of total are all examples of table calculations, which are computations that are applied to the values in an entire table or partition of a table. Table calculations can be created by selecting them from the context menu of a measure or by using functions in a calculated field⁷

NEW QUESTION # 70

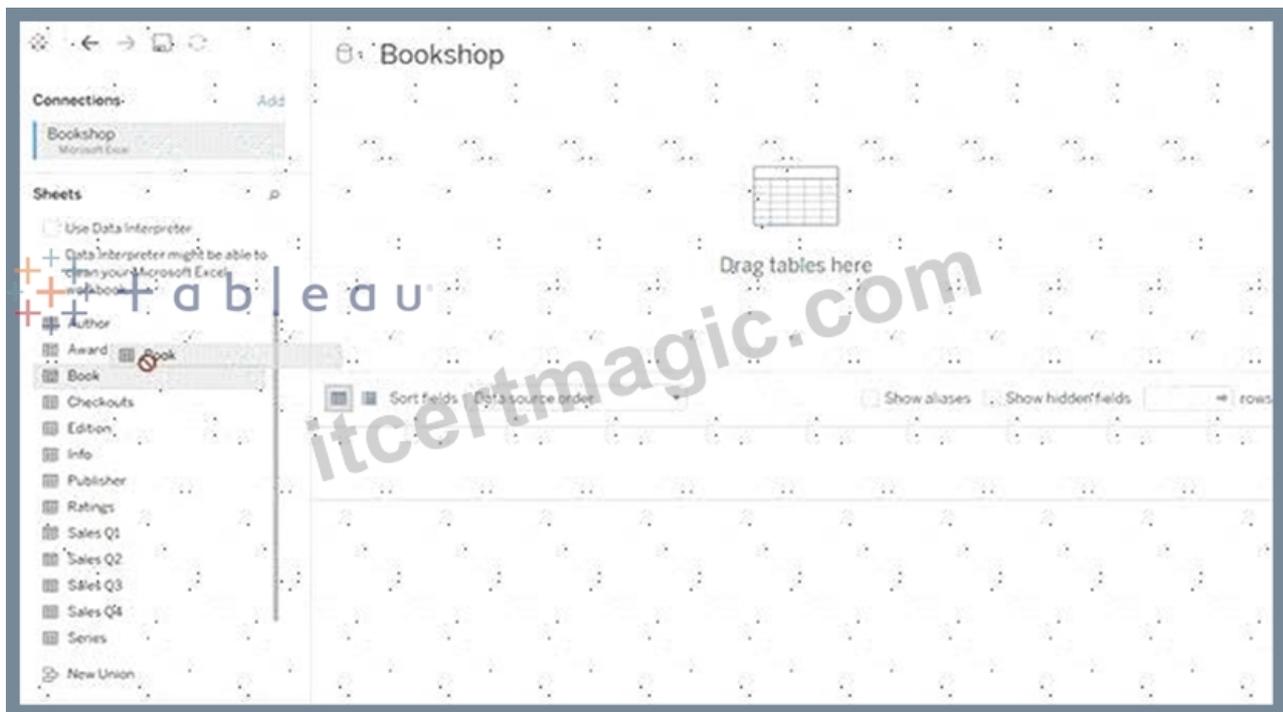

True or False: When you drag additional tables to the logical layer canvas, Tableau automatically attempts to create the relationship based on existing key constraints and matching fields to define the relationship. If it can't determine the matching fields, then relating these tables is not possible.

- A. False
- B. True

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

Tables that you drag to the logical layer of the Data Source page canvas must be related to each other. When you drag additional tables to the logical layer canvas, Tableau automatically attempts to create the relationship based on existing key constraints and matching fields to define the relationship. If it can't determine the matching fields, you will need to select them. If no constraints are detected, a Many-to-many relationship is created and referential integrity is set to Some records match. These default settings are a safe choice and provide the most a lot of flexibility for your data source.

NEW QUESTION # 71

How can you MANUALLY assign geographic roles to a dimension from the data pane?

- A. Edit the config file in My Documents -> MyTableauRepository for a quick fix
- B. Right click it -> Geographic role -> and then assign the appropriate geographic role
- C. Edit the data source manually for a quick resolution
- D. Right click it -> Edit Default properties -> Assign geographic roles

Answer: B

Explanation:

Explanation

From the data pane, simply right click on the dimension, choose geographic role, and then select the appropriate role as follows:

The screenshot shows the Tableau interface with a context menu open over the 'nationality' dimension. The menu options are:

- Add to Sheet
- Show Filter
- Duplicate
- Rename
- Hide
- Aliases...
 - Create
 - Transform
- Convert to Measure
- Change Data Type
- Geographic Role** (selected)
 - None
 - Airport
 - Area Code (U.S.)
 - CBSA/MSA (U.S.)
 - City
 - Congressional District (U.S.)
 - Country/Region** (selected)
 - County
 - NUTS Europe
 - State/Province
 - ZIP Code/Postcode
- Default Properties
- Group by
- Folders
- Hierarchy
- Replace References...
- Describe...

The background shows a worksheet with a list of names and a SUM(gold) measure. The names listed are: Alex Cejka, Barbara Bujka, Ellen van Dijk, Frank Rijken, Gojko Pijetlovic, Khuderbulga Dorjkhand, Laura Dijkema, Lynda Kiejko, Milan Trajkovic, Rafal Majka, Stefana Veljkovic, and Steven Kruijswijk.

NEW QUESTION # 72

Create a Set containing Customer Names whose Sales are GREATER than 30,000. Which customer had the LEAST sales in this set?

- A. Tom Ashbrook
- **B. Penelope Sewall**
- C. Tamara Chand
- D. Sanjit Engle

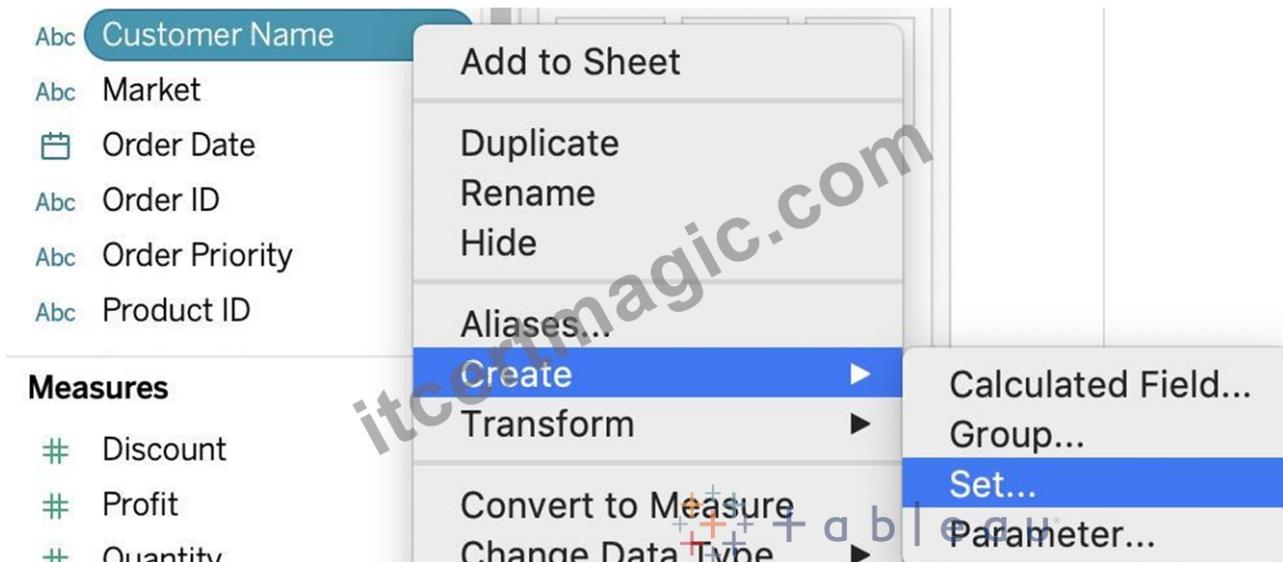

Answer: B

Explanation:

Explanation

As the question mentions, we need to create a SET with the following conditions -> Choose only those customers whose Sales > 30,000

1) Right click on customer name --> Create --> Set

2) Let's Name the Set - Customer>30k (you can name it anything you want :)) Select USE ALL, and then move to the CONDITION TAB:

3) In the Condition Tab, Choose BY FIELD -> Select Sales -> Sum -> Greater than 30000 , and click OK

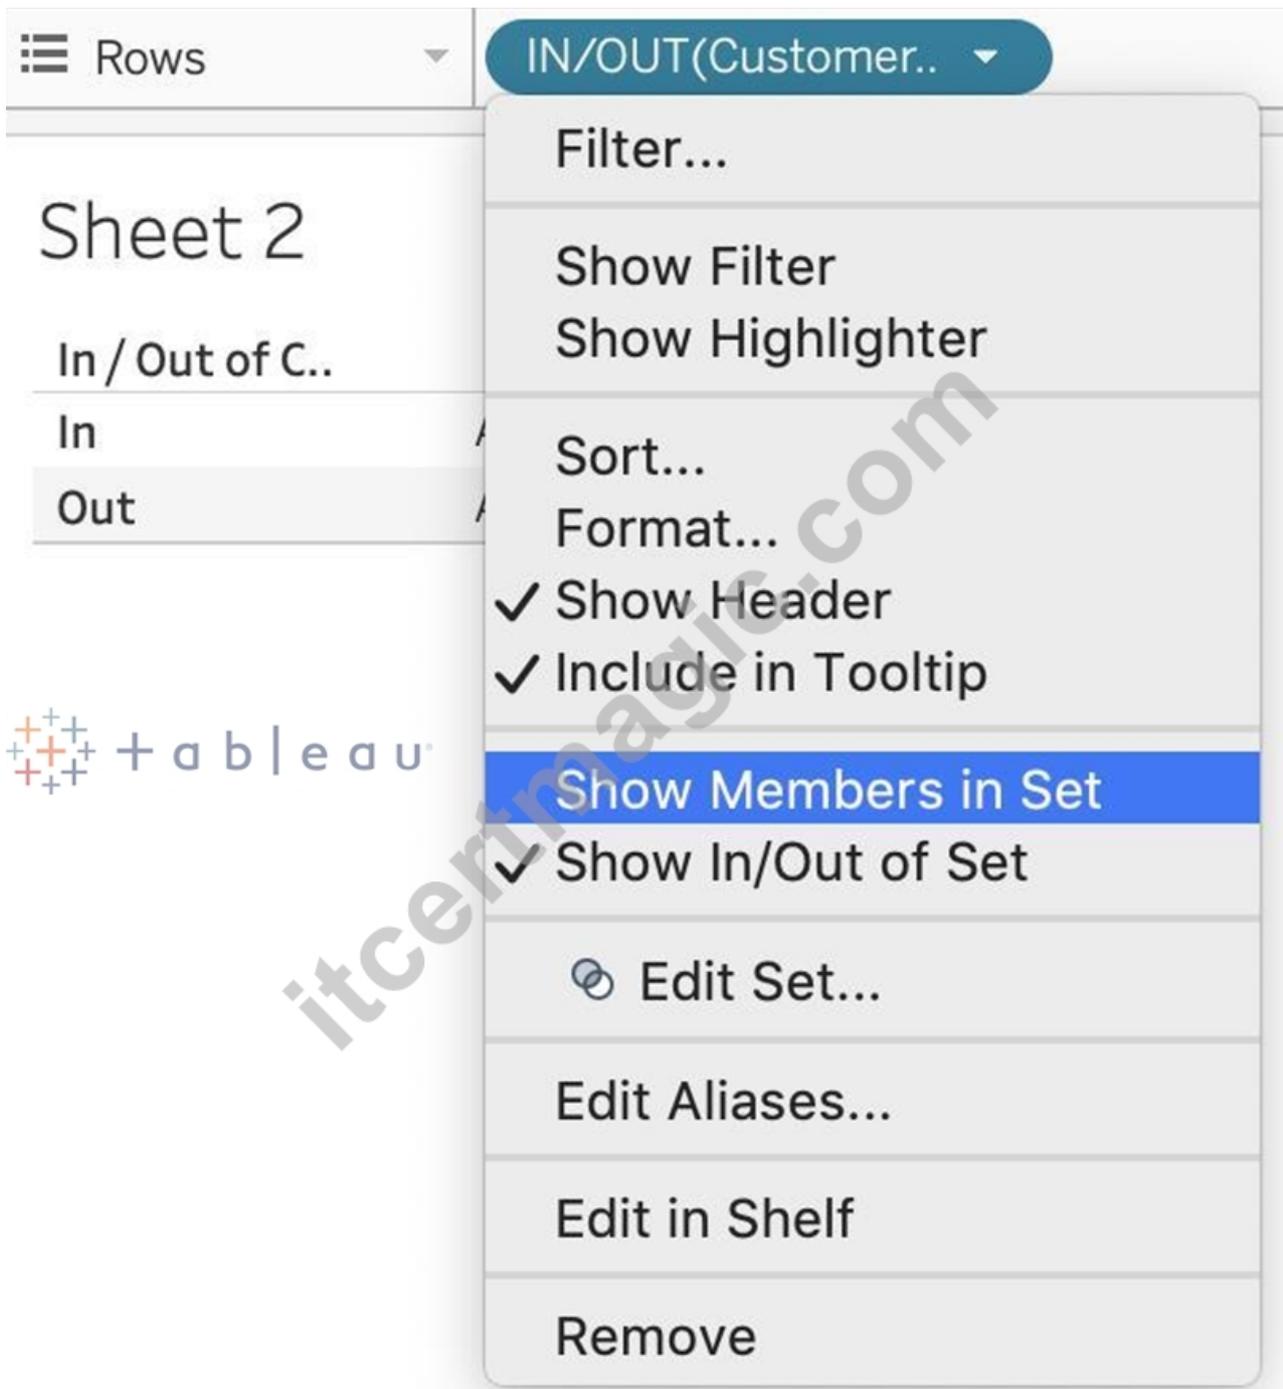

4) You should now have a new Set in the Data Pane as follows:

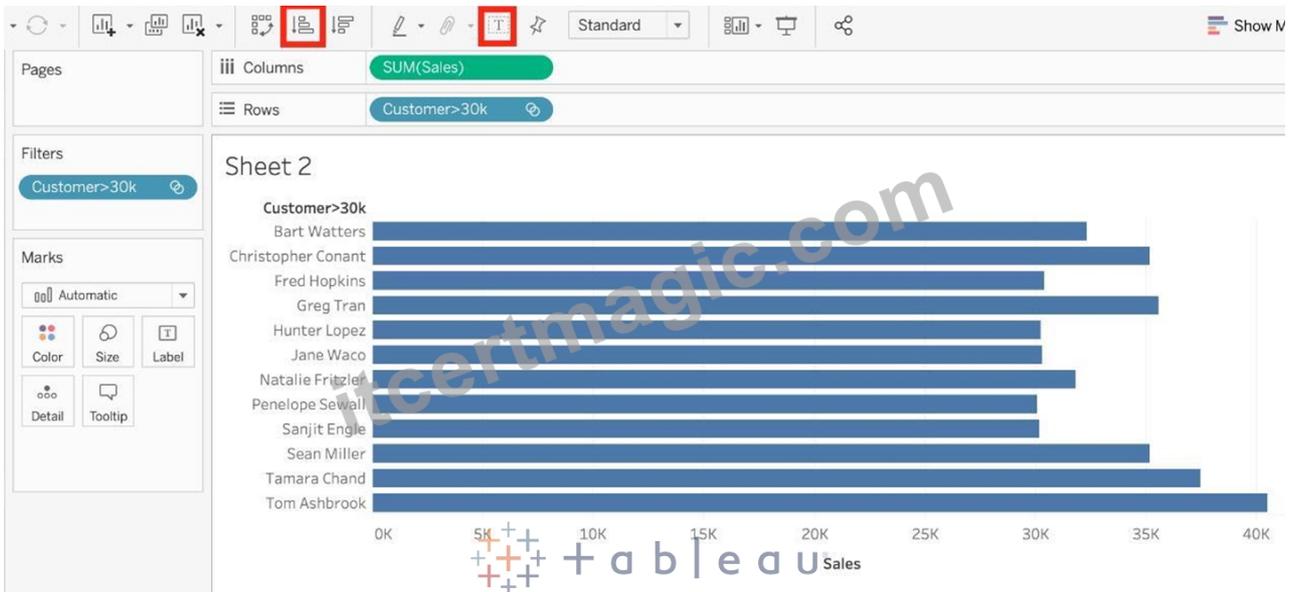

Sets

5) Drag this set to the rows shelf, and click on SHOW MEMBERS IN SET. Now drag Sales to the Column Shelf

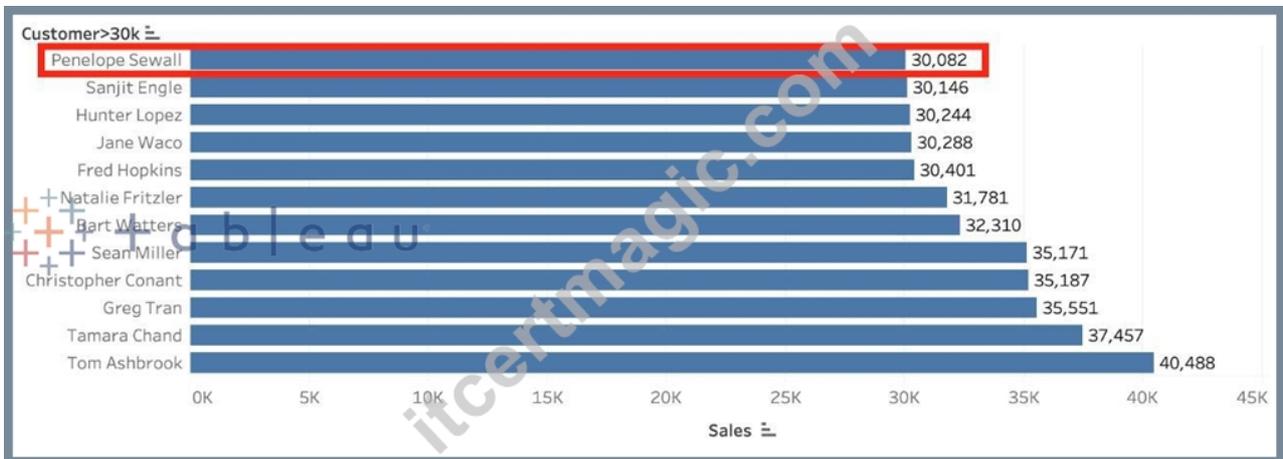

6) Click on the Show Mark Labels, and Sort ascending icons as shown:

7) Voila! We have our answer:

c

NEW QUESTION # 73

.....
