최신 SAP Certified Associate C_SEC_2405 무료샘플문제 (Q14-Q19):

질문 # 14

Which of the following is part of the SAP S/4HANA central UI component?

- A. SAP Fiori transactional application
- B. SAP Fiori launchpad
- C. SAP Fiori analytical application
- D. SAP Fiori object page

정답: B

설명:

TheSAP Fiori launchpadis the central UI component of SAP S/4HANA, providing a unified and role-based access point for:

- * Applications:Access to SAP Fiori transactional, analytical, and fact sheet applications.
- * Personalization:Users can personalize their launchpad layout and manage frequently used applications.
- * Navigation:Facilitates seamless navigation between apps and integration with backend systems.

SAP Security References:

- * SAP Help Portal: Fiori Launchpad Administration Guide
- * SAP S/4HANA Central UI Overview Documentation

질문 # 15

Which application in SAP S/4HANA Cloud Public Edition allows you to upload employee information independent of the customers' HR system?

- A. Manage Workforce app
- B. Maintain Business User app
- C. Display Technical Users app
- D. Identity and Access Management app

정답: A

설명:

* Context:In SAP S/4HANA Cloud Public Edition, employee information can be uploaded independently of external HR systems for workforce management.

* Solution Explanation:

* TheManage Workforce appallows customers to manage and upload employee-related data without requiring integration with an external HR system

SAP Security References:

- * SAP S/4HANA Cloud Documentation
- * SAP Workforce Management Guidelines

질문 # 16

SAP BTP distinguishes between which of the following users? Note: There are 2 correct answers to this question.

- A. Business users
- B. Technical users
- C. Platform users

- D. Key users

정답: A,C

설명:

SAP Business Technology Platform (BTP) distinguishes between Business users and Platform users. Business users are end-users who access applications, such as SAP Fiori apps or custom solutions, hosted on BTP to perform business tasks. Their access is managed via role collections that grant permissions to specific business functionalities. Platform users, in contrast, are administrators or developers who manage the BTP environment, including subaccounts, services, and configurations, using tools like the BTP Cockpit. They have administrative privileges to configure and deploy applications. Key users, while relevant in some SAP contexts, are not a distinct BTP user type, often overlapping with business users. Technical users are not a standard category in BTP's user classification, as their functions are covered by platform users or system accounts. This distinction ensures clear separation of responsibilities, enabling secure and efficient management of BTP resources while supporting business operations and administrative tasks in a cloud-based environment.

질문 # 17

Which levels of security protection are provided by Secure Network Communication (SNC)? Note: There are 3 correct answers to this question.

- A. Availability
- B. Integrity
- C. Privacy
- D. Authorization
- E. Authentication

정답: B,C,E

질문 # 18

Following an upgrade of your SAP S/4HANA on-premise system to a higher release, you perform a Modification Comparison using SU25.

What does this comparison do?

- A. It compares your changes to the SAP defaults in USOBX and USOBT with the new SAP defaults in the current release and allows you to make adjustments.
- B. It compares the Role Maintenance data from the previous release with the data for the current release and writes any new default values in tables USOBX_C and USOBT_C.
- C. It compares your changes to the SAP defaults in USOBX_C and USOBT_C with the new SAP defaults in the current release and allows you to make adjustments.
- D. It compares the Role Maintenance data from the current release with the data for the previous release and allows you to adjust any custom default values in tables USOBX and USOBT.

정답: A

설명:

* Context: The SU25 transaction is used after an SAP system upgrade to align role and authorization configurations with new release defaults.

* Solution Description:

* SU25 compares existing changes in tables USOBX and USOBT (default authorization checks and field values) against the new defaults in the upgraded release. This allows administrators to adjust roles and authorization settings accordingly.
