## 100% Pass 2026 Salesforce - Valid Mule-Dev-301 Exam Forum

We are proud that our Salesforce Mule-Dev-301 exam preparation material is one of the best in the market. You should buy our Salesforce Certified MuleSoft Developer II (Mule-Dev-301) valid dumps and start preparation now because of some amazing offers. These offers are up to 1 year of Free Mule-Dev-301 Dumps updates, free demos of our Mule-Dev-301 exam product, and a full refund guarantee. What are you waiting for? Buy actual Salesforce Mule-Dev-301 now at discount and start your preparation.

## Salesforce Certified MuleSoft Developer II Sample Questions (Q20-Q25):

### NEW QUESTION # 20

A healthcare portal needs to validate the token that it sends to a Mule API. The developer plans to implement a custom policy using the HTTP Policy Transform Extension to match the token received in the header from the healthcare portal.

Which files does the developer need to create in order to package the custom policy?

- A. Deployable ZIP file, YAML configuration file
- B. JSON properties file, YAML configuration file
- C. JSON properties file, XML template file

- D. XML template file, YAML configuration file

**Answer: D**

Explanation:

To package a custom policy using the HTTP Policy Transform Extension, the developer needs to create an XML template file and a YAML configuration file. The XML template file defines the policy logic using Mule components and placeholders for user-defined properties. The YAML configuration file defines the metadata of the policy, such as its name, description, category, parameters, and dependencies. Reference: <https://docs.mulesoft.com/api-manager/2.x/http-policy-transform#packaging-the-policy>

#### NEW QUESTION # 21

Which statement is true about using mutual TLS to secure an application?

- A. Mutual TLS increases the encryption strength versus server-side TLS alone
- B. Mutual TLS ensures only authorized end users are allowed to access an endpoint
- C. Mutual TLS authenticates the identity of the server before the identity of the client
- D. Mutual TLS requires a hardware security module to be used

**Answer: C**

Explanation:

Mutual TLS (mTLS) is an extension of TLS that requires both parties (client and server) to present their certificates to each other during the handshake process. This way, both parties can verify each other's identity and establish a secure connection. The authentication of the server happens before the authentication of the client, as the server sends its certificate first and then requests the client's certificate. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/tls-configuration#mutual-authentication>

#### NEW QUESTION # 22

A Mule application contains two policies: Policy A and Policy B. Policy A has order 1, and Policy B has order 2. Policy A, Policy B, and a flow are defined by the configuration below.

When a HTTP request arrives at the Mule application's endpoint, what will be the execution order?

- A. B1, A1, F1, A2, B2
- B. F1, B1, A1, A2, B2
- C. F1, A1, B1, B2, A2
- D. A1, B1, F1, B2, A2

**Answer: D**

Explanation:

Based on the configuration below, when a HTTP request arrives at the Mule application's endpoint, the execution order will be A1, B1, F1, B2, A2. This is because policies are executed before and after the API implementation flow according to their order attribute. Policy A has order 1, which means it is executed first before Policy B, which has order 2. The flow is executed after both policies are executed before the flow. Then, Policy B is executed after the flow before Policy A is executed after the flow. Reference: <https://docs.mulesoft.com/api-manager/2.x/policies-policy-order>

#### NEW QUESTION # 23

Which properties are mandatory on the HTTP Connector configuration in order to use the OAuth 2.0 Authorization Code grant type for authentication?

- A. External callback URL, access token URL, client ID, response refresh token
- B. External callback URL, access token URL, client ID, response access token
- C. External callback URL, access token URL, local authorization URL, authorization URL, client ID, client secret
- D. Token URL, authorization URL, client ID, client secret, local callback URL

**Answer: C**

Explanation:

To use the OAuth 2.0 Authorization Code grant type for authentication, the HTTP Connector configuration requires the following

properties: token URL, authorization URL, client ID, client secret, and local callback URL. The token URL is the endpoint of the authorization server that provides access tokens. The authorization URL is the endpoint of the authorization server that initiates the user consent flow. The client ID and client secret are the credentials of the Mule application registered with the authorization server. The local callback URL is the endpoint of the Mule application that receives the authorization code from the authorization server. Reference: <https://docs.mulesoft.com/http-connector/1.6/http-authentication#oauth-2-0>

#### NEW QUESTION # 24

In a Mule project, Flow-1 contains a flow-ref to Flow-2 depends on data from Flow-1 to execute successfully. Which action ensures the test suites and test cases written for Flow-1 and Flow-2 will execute successfully?

- A. Use "Before Test Case" To collect data from Flow-1 test cases before running Flow-2 test cases
- B. Use 'After Test Case' to produce the data needed from Flow-1 test cases to pass to Flow-2 test cases
- C. Use "Set Event to pass the input that is needed, and keep the test cases for Flow-1 and Flow-2 independent
- D. Chain together the test suites and test cases for Flow-1 and Flow-2

**Answer: C**

Explanation:

To ensure the test suites and test cases written for Flow-1 and Flow-2 will execute successfully, the developer should use a Set Event processor to pass the input that is needed by Flow-2, and keep the test cases for Flow-1 and Flow-2 independent. This way, the developer can isolate the testing of each flow and avoid coupling them together. Reference: <https://docs.mulesoft.com/munit/2.3/munit-test-flow>

#### NEW QUESTION # 25

.....

We have installed the most advanced operation system in our company which can assure you the fastest delivery speed on our Mule-Dev-301 learning guide, you can get immediately our Mule-Dev-301 training materials only within five to ten minutes after purchase after payment. At the same time, there is really no need for you to worry about your personal information if you choose to buy the Mule-Dev-301 Exam Practice from our company.

**Mule-Dev-301 Most Reliable Questions:** <https://www.examlabs.com/Salesforce/Salesforce-MuleSoft/best-Mule-Dev-301-exam-dumps.html>

We have free demos of the Mule-Dev-301 exam materials that you can try before payment, Salesforce Valid Mule-Dev-301 Exam Forum If you have any questions about our products, please feel free to contact us, We stress the primacy of customers' interests on our Mule-Dev-301 training quiz, and make all the preoccupation based on your needs, Our valid Mule-Dev-301 practice questions are created according to the requirement of the certification center based on the real questions.

Before appearing in the Mule-Dev-301 actual exam, it would be worthwhile to go through the mock tests and evaluate your level of Mule-Dev-301 exam preparation, Before you decide to buy, you can try a free trial version, so that you will know the quality of the Salesforce Mule-Dev-301 practice dumps.

### Salesforce Mule-Dev-301 Questions To Complete Your Preparation

We have free demos of the Mule-Dev-301 exam materials that you can try before payment, If you have any questions about our products, please feel free to contact us.

We stress the primacy of customers' interests on our Mule-Dev-301 training quiz, and make all the preoccupation based on your needs, Our valid Mule-Dev-301 practice questions are created according to the requirement of the certification center based on the real questions.
