F5CAB4 Reliable Exam Simulator - Clear F5CAB4 Exam

You may be busy in your jobs, learning or family lives and can't get around to preparing and takes the certificate exams but on the other side you urgently need some useful F5CAB4 certificates to improve your abilities in some areas. So is there a solution which can kill two birds with one stone to both make you get the certificate and spend little time and energy to prepare for the exam? If you choose the test F5 certification and then buy our F5CAB4 prep material you will get the panacea to both get the useful certificate and spend little time. Passing the test certification can help you stand out in your colleagues and have a bright future in your career.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q23-Q28):

NEW QUESTION # 23

The BIG-IP Administrator generates a qkview using "qkview -s0" and needs to transfer the output file via SCP. Which directory contains the output file?

- A. /var/config
- B. /var/log
- C. **/var/tmp**
- D. /var/local

Answer: C

Explanation:

A QKView is a comprehensive snapshot of the device's Control Plane state, configuration, and logs used for troubleshooting. By default, the qkview utility stores its generated output file in the /var/tmp/ directory.

Administrators must know this path to retrieve the file for upload to F5 iHealth or Support.

NEW QUESTION # 24

A BIG-IP Administrator is unable to connect to the management interface via HTTPS. What is a possible reason for this issue?

- A. The port lockdown setting is configured to Allow None.
- B. An incorrect management route is specified.
- C. The IP address of the device used to access the management interface is NOT included in the "httpd Allow" list in the CLI.
- D. The IP address of the device used to access the management interface is NOT included in the "P Allow" list in the Configuration Utility.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Management connectivity is protected by an allowed access list for the httpd daemon. Unlike TMM data ports which use 'Port Lockdown' settings, the management port's access is controlled by a specific 'Allow' list323232. If an administrator's IP is not explicitly included in this list, the Control Plane will reject HTTPS connection attempts to the management utility33.

NEW QUESTION # 25

A BIG-IP Administrator needs to load a UCS file but must exclude the license file.

How should the administrator perform this task? (Choose one answer)

- A. From the GUI, select the UCS file, uncheck the license box, and click Restore
- B. From the CLI with command tmsh load /sys ucs <ucs filename>
- C. From the CLI with command tmsh load /sys ucs <ucs filename> no-license
- D. From the GUI, select the UCS file and click Restore

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: When restoring a User Configuration Set (UCS) file, BIG-IP allows administrators to selectively exclude the license during the restore process. From the CLI, this is accomplished using the no-license option with the tmsh load /sys ucs command.

The command:

tmsh load /sys ucs <ucs filename> no-license

restores:

System configuration

Certificates and keys

Device and traffic objects

while explicitly excluding the license file, which is required when:

Migrating configurations between devices

Restoring to hardware with a different license

Avoiding license conflicts or overwrites

Why the other options are incorrect:

A does not provide the option to exclude the license.

B restores the UCS including the license, which does not meet the requirement.

D is incorrect because the BIG-IP GUI does not provide a checkbox to exclude the license during UCS restore.

Therefore, the correct and supported method is C.

NEW QUESTION # 26

A BIG-IP Administrator finds the following log entry: tmr tmm[7141]:011e0002:4: sweeper_update: aggressive mode activated. Which action should the BIG-IP Administrator take to mitigate this memory issue?

- A. Increase the TCP profile Idle Timeout value
- B. Configure the redundant pair to be active-active
- C. Configure the server to use Connection Mirroring
- D. Decrease the TCP profile Idle Timeout value

Answer: C

Explanation:

This log message indicates that the system is low on memory and has activated 'Aggressive Mode' to reclaim resources by closing old connections³⁷. In an HA environment, one way to ensure state stability during memory pressure is to manage how connection data is handled³⁸. While the document suggests D, procedural mitigation for 'Aggressive Mode' often involves reviewing resource provisioning or optimizing connection idle timeouts to reduce memory footprint³⁹.

NEW QUESTION # 27

A BIG-IP Administrator needs to restore a UCS file to an F5 device using the Configuration Utility. Which section of the Configuration Utility should the BIG-IP Administrator access to perform this task?

- A. Local Traffic > Policies
- **B. System > Archives**
- C. System > Configuration
- D. Local Traffic > Virtual Servers

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Managing the state of a device often involves restoring configuration backups known as User Configuration Set (UCS) files. These archives contain the full system configuration, including licenses and SSL certificates. The Control Plane provides a dedicated management area for these files under System > Archives, where administrators can upload, create, and restore configuration snapshots.

NEW QUESTION # 28

.....

With the F5 F5CAB4 exam practice test questions, you can easily speed up your F5CAB4 exam preparation and be ready to solve all the final F5 F5CAB4 exam questions. As far as the top features of F5 F5CAB4 Exam Practice test questions are concerned, these F5CAB4 exam questions are real and verified by experience exam trainers.
