Exam C_SAC_2501 Outline & New C_SAC_2501 Dumps Pdf

1.What source system can you connect to with a live connection?
A. SAP ERP Central Component
B. SAP SuccessFactors
C. SAP Business ByDesign Analytics
D. SAP Datasphere
Answer: D
SAP Analytics Cloud can establish a live connection with various source systems, including SAP Datasphere. This allows for real-time data access and analysis without the need to replicate data into the cloud, which is beneficial for scenarios where data privacy and security are paramount.

SAP Analytics Cloud: Expand Live Data Source Options3
Live connection in SAP Analytics Cloud: advantages and challenges4 Explaining Where the Data Comes From - SAP Learning5

2.You are using a live connection for a model. Where is the data stored?
A. Public dataset
B. SAP Analytics Cloud model
C. Source system
D. Embedded data set
Answer: C
Connections and data preparation
When using a live connection in SAP Analytics Cloud, the data remains stored in the source system. This means that no data is imported or replicated into SAP Analytics Cloud; instead, it is accessed and analyzed in real-time directly from the source system. This approach ensures that the most current data is always used for analysis and that data governance and security policies of the source system remain in control.
Reference: Live Data Connections to SAP S/4HANA | SAP Help Portal1 SAP Analytics Cloud Connection Guide2
SAP Analytics Cloud Data Connections - InsightCubes
In the context of SAP Analytics Cloud, when using a live connection to connect to a data source, the data remains stored in the source system. This setup means that SAP Analytics Cloud directly queries the data in its original location, without importing or copying it into the SAP Analytics Cloud environment. This approach is advantageous for several reasons, including maintaining a single source of truth, reducing data redundancy, and ensuring data is always up-to-date without the need for synchronization processes. Live connections are particularly useful for real-time or near-real-time data analysis and reporting, providing insights based on the most current data available without the overhead of data replication.
Reference: SAP Analytics Cloud documentation and user guides typically emphasize the benefits and use cases of live connections, highlighting how they maintain data in the source system to ensure real-time data access and analysis.
SAP training materials for Data Analysts using SAP Analytics Cloud, including study guides and official certification resources, explain the technical and practical aspects of live connections, including where data is stored and how it is accessed.

New C_SAC_2501 Dumps Pdf | Reliable C_SAC_2501 Mock Test

As long as you have a try on our products you will find that both the language and the content of our C_SAC_2501 practice braindumps are simple. The language of our C_SAC_2501 study materials is easy to be understood and suitable for any learners.

The content emphasizes the focus and seizes the key to use refined C_SAC_2501 Exam Questions And Answers to let the learners master the most important information by using the least amount of them.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q29-Q34):

NEW QUESTION # 29
You are creating an allocation step to distribute expenses from the HR cost center to your operating cost centers. Which dimension setting controls how much is distributed to each operating cost center?

- A. Distribute
- B. Reference
- C. Driver
- D. Redistribute

Answer: C

Explanation:
In the context of creating an allocation step to distribute expenses from the HR cost center to operating cost centers in SAP Analytics Cloud, the "Driver" dimension setting is crucial. This setting determines the basis or criteria on which the distribution is calculated and applied to each operating cost center. For instance, the driver could be the number of employees, square footage, or any other relevant metric that justifies the distribution of costs. By defining a driver, you ensure that the allocation of expenses is proportional and fair based on the selected criteria.

NEW QUESTION # 30
You are creating a data action to copy data from one year to the next.In the parameter for the source year, which default setting must you change?

- A. Granularity
- B. Hierarchy
- C. Cardinality
- D. Level

Answer: C

NEW QUESTION # 31
What must you use to transform data in a dataset using if/then/else logic?

- A. Formula bar
- B. Calculations editor
- C. Transform bar
- D. Custom expression editor

Answer: D

Explanation:
To transform data in a dataset using if/then/else logic in SAP Analytics Cloud, you must use the Custom expression editor. This tool allows you to write complex logical conditions and perform conditional data transformations. The steps involved are:
Open the dataset you want to transform.
Navigate to the "Custom expression editor".
Write your if/then/else logic using the syntax supported by SAP Analytics Cloud. For example:
IF([Sales] > 1000, "High", "Low")
Apply the expression to the relevant column.
Validate and save your changes.
This approach allows for flexibility and precision in transforming your data based on specific conditions.
