NEW QUESTION # 200

When configuring a GlobalProtect Portal, what is the purpose of specifying an Authentication Profile?

- A. To enable client machine authentication to the Portal
- B. To enable user authentication to the Portal
- C. To enable Portal authentication to the Gateway
- D. To enable Gateway authentication to the Portal

Answer: B

Explanation:

The additional options of Browser and Satellite enable you to specify the authentication profile to use for specific scenarios. Select

Browser to specify the authentication profile to use to authenticate a user accessing the portal from a web browser with the intent of downloading the GlobalProtect agent (Windows and Mac). Select Satellite to specify the authentication profile to use to authenticate the satellite.
